Woodbine Holsteins win big

HARRISBURG - A total of 347 head of registered Holsteins were shown before Judge John L. Morris, extension dairyman, University of Maryland at the 23rd Annual Pennsylvania State Holstein Show held here a week ago.

Selected as senior champion female and grand champion of this year's show was Blue-Jay Jenket Maple, a three year old cow shown by Donald Hostetter, Parkesburg, Pa. and James Repard, Holcomb, New York. Following with reserve champion honors was Huntsdale Paula Black Eagle, a four year old cow from the herd of Meryl and Thomas Sheaffer, Carlisle, Pa. Judge Morris praised the quality of the class winners when selecting the champions. A senior yearling bull, Mr. Gala Double M Jon Boy was named champion bull. He was exhibited by Alan Black of Martinsburg, Pa.

The coveted premier breeder and exhibitor award, based on points earned by high placing entries in the individual classes, was bestowed upon Woodbine Holsteins, George M. Knight, Jr. and family of Airville, Pa.

The highly contested best three females class was captured by Huntsdale Stock Farms of Carlisle, Pa. This class recognizes the breeder who has bred and developed three top cows which make up this group class.

Four daughters by Paclamar Astronaut won the senior get of sire Class for Richard Curtis, Robert Kauffman, and Andrew Stoltzfus. The junior get of sire class was topped by Edward P. Karpa with four daughters of Zeldenrust Fond Memory.

The top produce of dam went to two daughters of Ri Co Peg Belle Boy Flo exhibited by Richard Curtis of Union City, Pa., and Debra Holler of Jamestown, Pa. The dam and daughter combination was headed by two cows owned by Providence Haven Holsteins, Inc., Fred Strouse and Assoc's., and Fair Hill Farms.

Morris selected the first place senior yearling, Pequea R Maple Heather shown by James Bowen of Wellsboro as the junior champion female. Edwin C. Todd of Spring City, Pa. exhibited the reserve junior champion.

This show is one of the

Miss Pennsylvania, Connie Harness; and the Pennsylvania Poultry Queen, Dawn Heisler, graced the annual fund raising banquet for the Pennsylvania Poultry Federation on Thursday night. In the center is Pennsylvania's Secretary of Agriculture, Raymond Kerstetter. With him are William Carlin, left, president of PPF, and John Hoffman, executive director of the organization.

Poultry banquet sets a record

By DIETER KRIEG

LANCASTER — The 1976 annual fund raising banquet of the Pennsylvania Poultry Federation, held here at the Host Farm on Thursday evening, turned out to be the biggest event of its kind ever staged in the Northeast. The Federation had predicted that 750 persons would show up, but the actual turnout was 900. John Hoffman, PPF executive director and toastmaster for the evening, proclaimed that the roomful of people represented an entire industry.

On hand for the gala affair were Miss Pennsylvania, Connie Harness; the Pennsylvania Poultry Queen, Dawn Heisler; The Honorable Raymond Kerstetter, Pa. Secretary of Agriculture; and hundreds of representatives from the producer, processor, and allied industry segments of the poultry business.

Speeches were kept short during the evening, with most of the time spent in consuming a meal and being entertained by nationally known comedian Bob Lewis. Also on hand to entertain guests were Lewis' wife,

Milk prices, future pondered

Editor's Note: The following is taken from an address given by Herbert Wessel, president of the Maryland Cooperative Milk Producers Cooperative. The occasion was the annual meeting held recently.

COCKEYSVILLE, Md. - Recently the milk prices have risen. The rise is well deserved and much needed. Let's hope that history does not repeat itself and we have a re-run of the 1974 situation when the prices rose rapidly and two things then happened -

1. Consumer resistance resulting in fewer sales because of the higher prices, and
2. Increased production - also from the higher prices.

Either of these in itself can hurt prices but when the two of them get together, the result can be disastrous.

Since prices bottomed out in August 1974, they have been steadily rising - even higher than any of us predicted. They have now peaked and the curve is starting down.

Dairy production awards given

By DIETER KRIEG

SMOKETOWN - The fifth annual Pennfield Dairy Day Program was held here recently with the highlight being the presentation of awards to owners of top dairy herds and - or high individual cow records.

Leading the pack of 34 dairymen who were recognized for having herd averages of more than 17,000 pounds of milk per cow was Sinking Springs Farm, Inc., of York. Herman Stebbins, manager, was on hand to receive a special plaque and plate. The Sinking Springs herd of 67 registered Holsteins chalked up an average production of 19,823 pounds of milk and 785 of butterfat.

Clarence and Earl Stauffer's Sunny Craft Farm, Ephrata, was recognized for having shown the highest increase within one year. Their herd of 34 Holsteins most recently averaged 14,827 pounds of milk and 583 of fat - representing an increase of 4,196 for milk and 163 for fat.

More than 100 individual cow records were called off during the 3-hour long presentation. The 21-page program listed records of cows and herds from many parts of Pennsylvania and portions of Maryland.

Completing the list of herds which exceeded an average of 17,000 pounds of

Land-use legislation called for

HARRISBURG - Rep. Kenneth E. Brandt, R-Lancaster on Wednesday urged the Governor to sign legislation that would require that an agricultural impact statement be prepared before any of Pennsylvania's farm lands are taken in the construction of interstate highways.

Brandt, a prime sponsor of the bill, said not many people realize that hundreds of acres of prime Pennsylvania farm lands are ruined in the construction of interstate roadways.

"Each mile of highway destroys hundreds of acres of agricultural lands," he said. "Another 50 to 75 acres are consumed in the construction of each interchange on that highway.

"As one can well see as a highway cuts through a county, hundreds of acres of prime, fertile agricultural lands are literally laid to waste."

Brandt said the bill (House Bill 219) would require that an agricultural impact statement, similar to an environmental impact statement, be drafted and submitted to a special committee set up to oversee the balance between highway building and the destruction of farm lands.

"These agricultural impact statements will be considered by a special seven man committee before the highway could be built," he added. "The committee will consist of the Director of the State Planning and Development office, the Dean of the College of Agriculture, the Secretary of Agriculture, the Secretary of Environmental Resources, and the Secretary of Transportation.

"Two farmers appointed by the Governor shall also sit on the committee."

Kent Shelhamer is among those listed as one of the primary sponsors of the bill, and since he's the gentleman whom Gov. Shapp would like to see as the state's next Secretary of Agriculture, Brandt says the Governor may be receptive to signing the bill.

The measure has passed the House by a 172-0 margin and next goes to the Senate where legislators are likely to take a serious look at it.

"I urge the Governor to sign this bill as soon as possible," he said.

PROGRESSIVE FARMERS WANT PROFESSIONAL CONSULTATION

1. Is pH a false indicator of calcium levels in your soils?
2. Is sulphur holding back the yield, protein content and digestibility of your crops?
3. Is excessive magnesium what makes your land so wet and late?

If your present soil tests don't answer these questions, you will profit by our technical help. SOIL TESTS ARE DIFFERENT! Our **complete** soil analysis will help you **balance** soil fertility, which means more efficient cropping and feeding - less bought feed and fertilizer - more yield and profit.

WE SELL NO PRODUCTS — ONLY RECOMMENDATIONS

There is a reason why progressive farmers with sharp pencils hire us year after year for soil analyses and recommendations. We save them dollars. Balance makes crops to be proud of. Now is the time to talk it over with:

Delmarva Poultry

Wednesday, March 31

RTC movement fairly good on prior commitments; though generally slow on new business. Slaughter schedules fairly heavy at most plants. Today's LTL asking prices unchanged to 2 cents lower on both Plant & US Grade A. Advance interest fairly good though no confirmed negative reported. Live supplies fully adequate; undertone unsettled to weak.

Current broiler-fryer negotiated prices for immediate includes mostly multiple-drop; shipments to New York City from Delmarva:

Range: US Grade A 43-44; Plant Grade 42-43; Premium X US Grade A 45-48; Premium X Plant Grade 44-46.

Wtd. Avg.: US Grade A 43.57; Plant Grade 42.54; Premium X US Grade A 47.18; Premium X Plant Grade 45.95.

X includes special services, selected competitive brands, etc.

Baltimore Eggs

Wednesday, March 31

Market steady. Demand slow to only fair. Heavy supplies held for holiday trading.

Cartoned eggs: Prices to Retailers, state graded (min one case sale) White:

Grade A Large 65-68; Grade A Medium 57-60.

Eastern Pa. & N.J. Poultry

Wednesday, March 31

Prices unchanged, on light type hens, though a weak undertone prevails as increased offerings finds only a fair steady call. Offerings of heavy type though limited adequate for a fair demand.

Prices paid at farm: Light type hens 8-13 mostly 12-12½ in Pa., mostly 11-12 in NJ. Heavy type hens TFEWR.

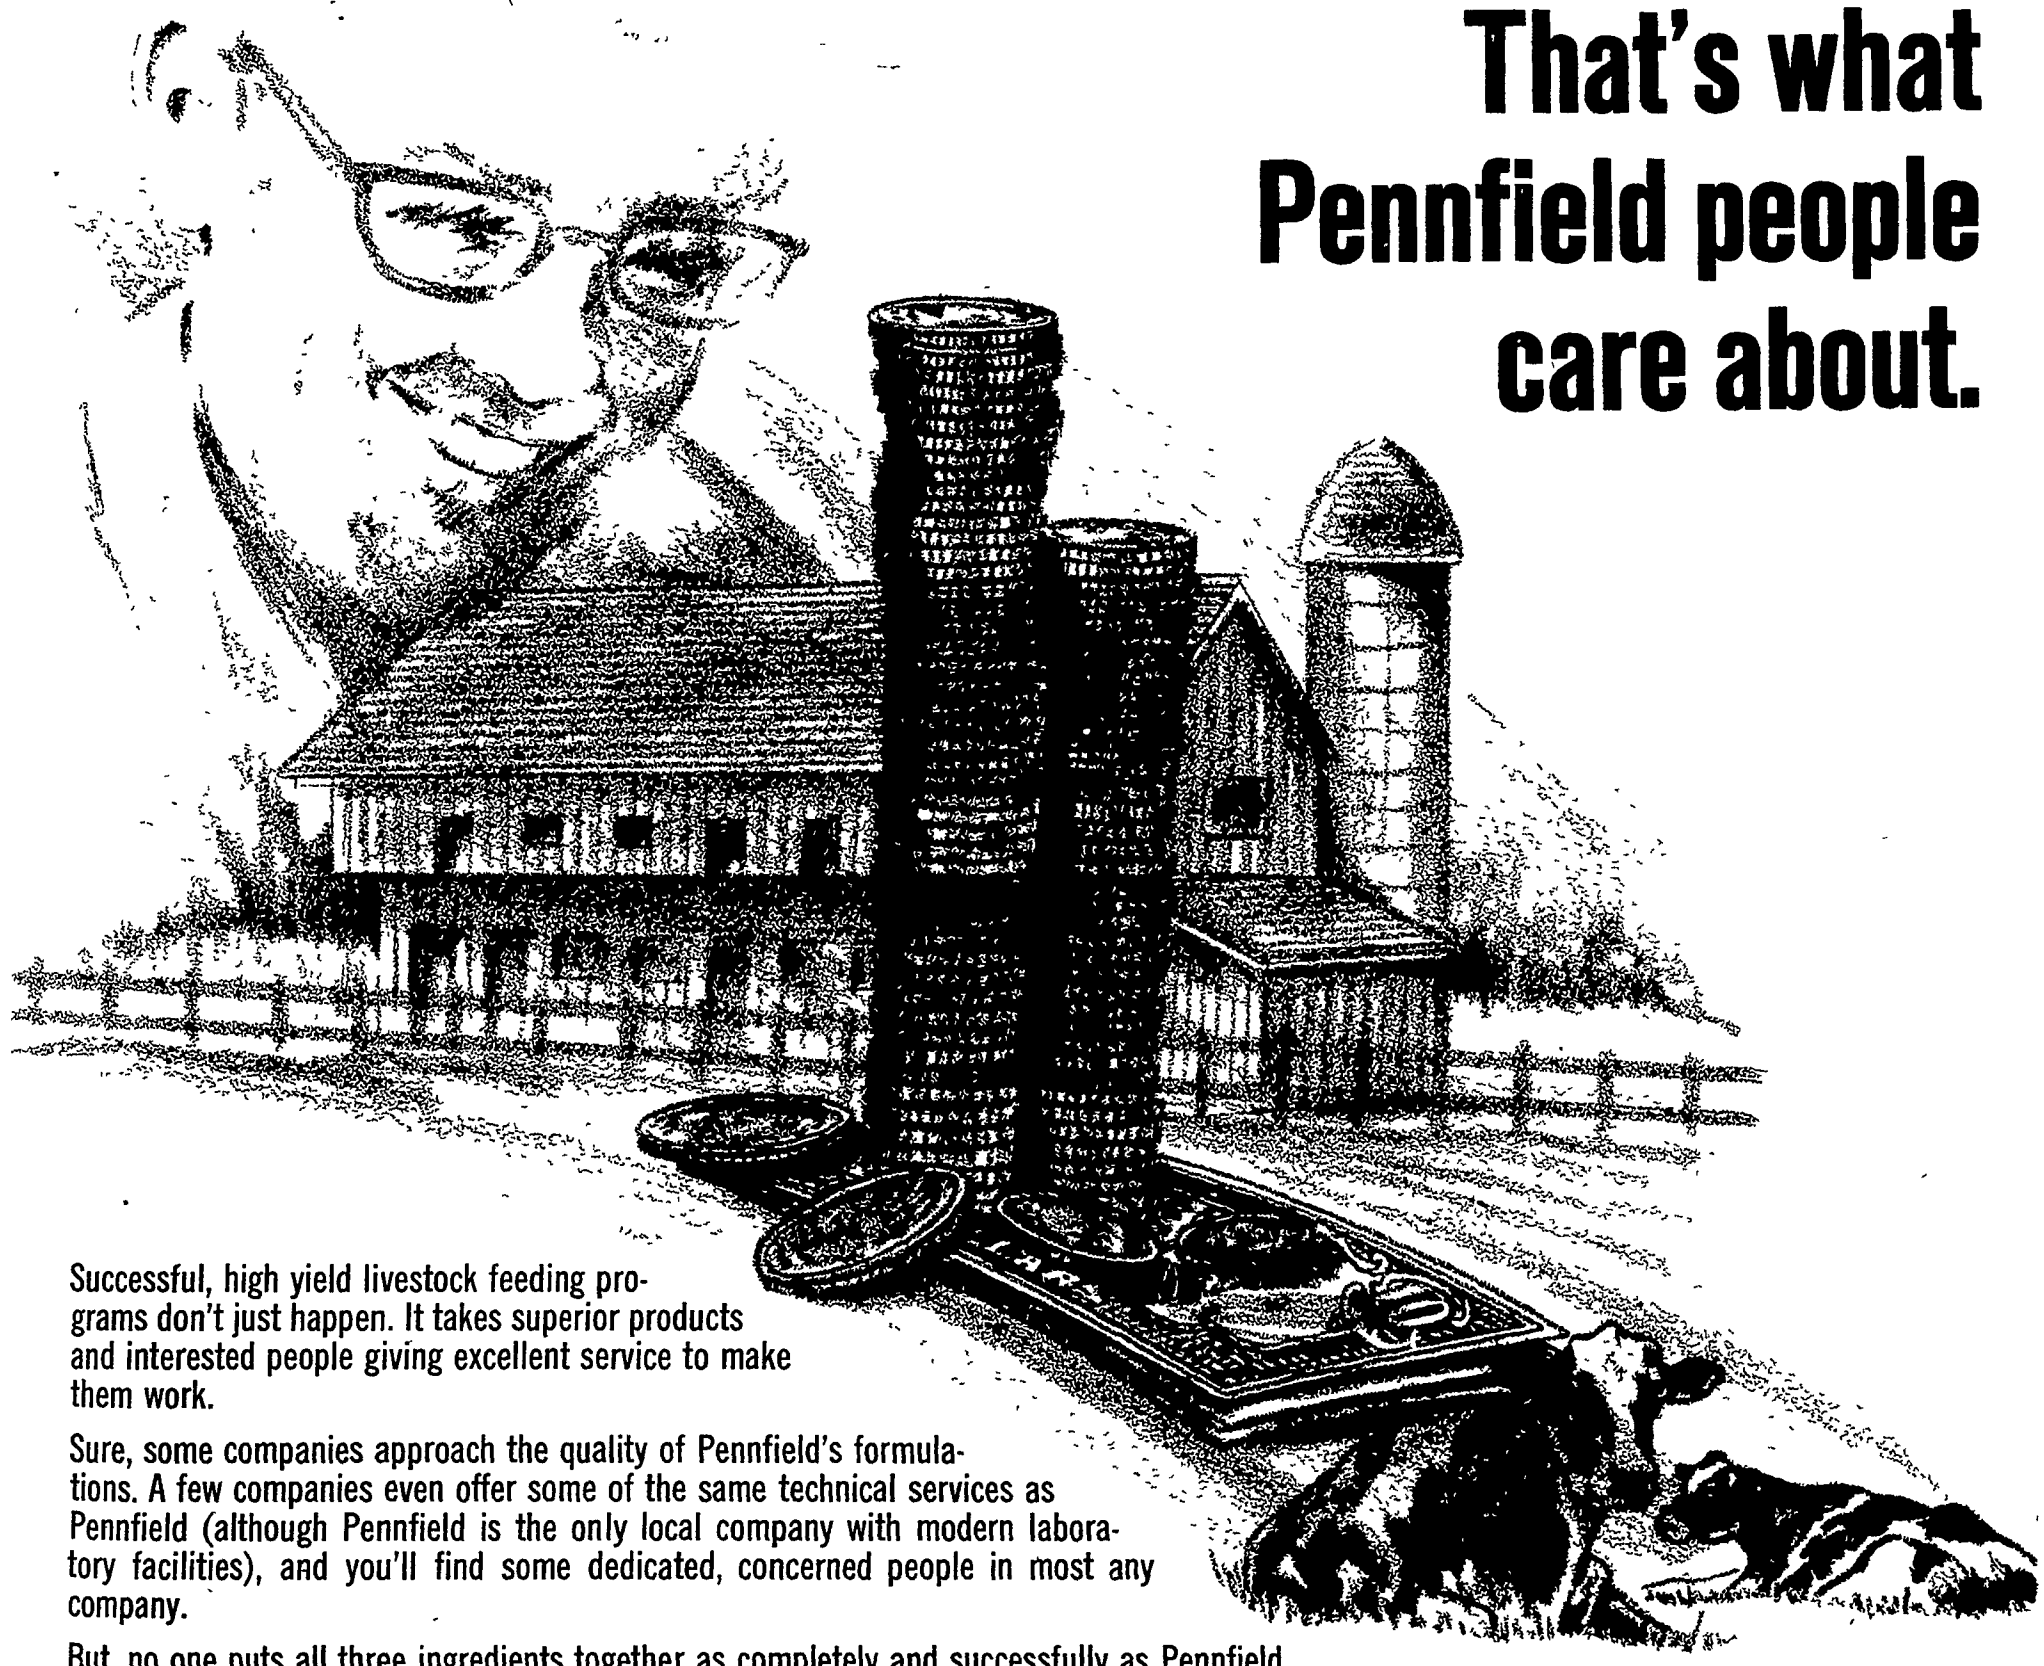
Your LIVESTOCK PRODUCTIVITY, your PROFITABILITY.



That's what Pennfield people care about.

Successful, high yield livestock feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete livestock feeding and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy!

Want to know how Pennfield people can work for you to improve your yields and profit? Complete and mail this coupon for a no obligation survey.

Peoria Auction

April 1, 1976

CATTLE: Receipts this week 5400; last week 4900; last year 4400.

Compared with last week's close, slaughter steers 1.00-2.75 higher. Slaughter heifers 1.50-2.50 higher. Cows 1.00-2.00 higher. Bulls firm. Receipts about 70 pct. slaughter steers, 25 pct. slaughter heifers and the balance mostly cows. With reduced receipts and a higher dressed trade, slaughter steers and heifers moved sharply higher. Also a factor was possibility of a truckers strike.

SLAUGHTER STEERS: Choice and Prime 3-4, 1140-1235 lbs. 38.00-38.50. YG 3-5, 1200-1300 lbs. 37.50-38.00. Choice 2-4, 950-1200 lbs. 37.00-38.00.

CHOICE 2-4, 900-1300 lbs. 36.00-37.25. Good 2-3, 35.50-36.00. Monday, load Good 2-3, holsteins 35.00 and load standard and good 2-3, 33.50.

SLAUGHTER HEIFERS: Choice and Prime 3-4, few 5S, 900-1100 lbs. 36.50-37.50. Choice 2-4, 850-1050 lbs. 35.00-36.50. Mixed Good and Choice 2-4, 750-1100 lbs. 33.50-35.50. Good 31.00-33.50.

COWS: Utility and Commercial 2-4, 26.50-30.00. Couple 31.00. Cutter 2-4, 25.00-28.50. Canner 21.00-25.50.

BULLS: Yield Grade 1-2, 1100-1800 lbs. 26.00-33.00. Few YG 1, 35.00-36.00.

New Holland Horse

Monday, March 29

Reported receipts of 442 horses, mules and ponies. Market steady.

Load of Illinois driving singles 410-710. Riding horses 275-470.

Load of Virginia riding horses 435-610.

Local work horses 495-840, mules 370-630; better horses 275-480, driving horses 175-400; riding horses 150-250; lightweight killers 19-23; heavyweight killers 28-30; mares 15-50; colts 10-25; geldings 15-50; larger ponies 65-130.

Leb. Valley Auction

March 30, 1976

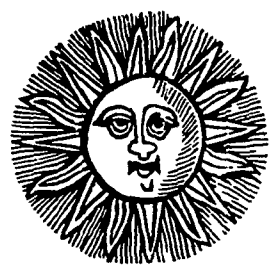
THE OLD FARMER'S ALMANAC

APRIL 5-11, 1976

Scene set for air serene.

Begin spring cleaning now Rosenbergs convicted April 5, 1951 . First quarter of the moon April 7 . . Blue herons return to Maine . . . Average length of days for the week, 13 hours, 4 minutes . Safety pin patented April 10, 1849 Pony Express started April 9, 1860 . . *A different world cannot be built by indifferent people*



Old Farmer's Riddle: Who was our only bachelor President? (Answer below.)

Ask the Old Farmer: Where did the expression getting "the upper hand" originate? F Y, Sacramento, Calif

The two-handed sword was used in Europe before the 12th century, and the expression probably started when the sword was invented The upper hand, in this case, was the guiding hand and thus the more important

Home Hints: To make buttonholes in material that ravels easily, use a small piece of iron-on tape under the place where the buttonhole is to be worked

Riddle answer: James Buchanan

OLD FARMER'S WEATHER FORECASTS

New England: Turning mild and spring-like early week, latter part sunny and warm inland and in north, cool on coast with light rain.

Greater New York-New Jersey: Cloudy and colder than normal with rain midweek; end of week generally fair and warm.

Middle Atlantic Coastal: Intermittent light rain with seasonal temperatures first part of week; sunny and mild latter part, but some rain and very cool by week's end.

Piedmont & Southeast Coastal: Week begins still very cold, but then warming; rain latter part, weekend partly sunny and turning very warm.

Florida: Week begins with moderate to heavy rain and cold, possible freeze in north, partly sunny and slightly warmer than normal latter part, some showers possible.

Upstate N.Y.-Toronto & Montreal: Very cold with light snow at first, then clearing and warmer; week ends with storm in east and west, and much colder.

Greater Ohio Valley: Week begins seasonably warm and fair, then light rain; partly sunny, hot spell latter part, but rain and colder by weekend.

Deep South: Rain starts in west, reaches east by midweek and warming; clearing and very warm in central and south, some showers in north.

Chicago & Southern Great Lakes: First part of week sunny and very cold, then unseasonably warm; rain changes to snow latter part, very cold.

Northern Great Lakes: Sunny and very warm, some showers in north, early week; cloudy and cold, with light or freezing rain in south and snow in north by week's end.

Central Great Plains: Gradual clearing and turning hot and sunny, cooler only at week's end, with showers in central and east.

Texas-Oklahoma: Week begins clear and cool, then scattered rain, moderate in north; latter part clear in north, partly cloudy in south and unseasonably warm.

Rocky Mountain: Most of week sunny and warming in central and north; cloudy and cold in south at first, then becoming very warm and clear.

Southwest Desert: Early week sunny and warming in west, but slightly cooler than normal in east; clear and hotter than normal end of week.

Pacific Northwest: Week starts sunny in south, partly sunny in north, and warmer than normal; latter part cloudy and seasonably cool, with rain in north and snow in mountains.

California: Rain and thunderstorms in north, hot with local high winds in south at first, end of week partly cloudy and warm on coast, clear and hot inland.

Sale reports

Holstein Dispersal

Buyers from four states, as far west as Wisconsin, gathered at East Knoll Farm near Canton, Pa. this past Monday for a complete Holstein Dispersal. The 90 head sold for an average price of $1,393 with a top of $4,200.

The owners of East Knoll are Melvin G. Peifer and family, who moved to Bradford County about ten years ago from Lancaster County.

High at $4,200 was a "Flame" daughter with a beautiful udder that scored "Excellent" in the mammary system the Saturday before the sale. She sold to Clark Dempsey, Eagle, Wisconsin.

Second at $3,800 and going to Richard Yule, W. Winfield, N.Y. was a "Lucky" daughter that had just moved 5 points to 88 on classification.

Carl Miller, Kutztown, bought a whole family as he took a pair of VG-88 full sisters by "Brett" at $3,500 and $2,750. He also bought a third full sister as a yearling, daughters of both cows, and their dam.

Robert H. Kauffman, Elizabethtown, paid $3,750 for an Excellent Grand Champion show daughter of Agro Acres Marquis Ned.

A 100-lb. "Image" daughter sold for an even $3,000 to William Ingles, So. Kortright, N.Y.

The breakdown of averages shows 46 cows averaging $1,823; 11 bred heifers at $1,263; 17 open yearlings at $1,014; 11 heifer calves over 3 months at $545; and 5 heifer calves and bulls to service age just under $400.

The cattle were beautifully prepared for the sale and would have shown well at the state show at the Farm Show Buildings last week had they been there.

The sale was managed by R. Austin Backus Inc. and Pa. Holstein Assn.

Carlisle

Carlisle, PA

LIFE on the farm

By DIETER KRIEG

"Good morning, this is Dieter Krieg Woodbine . . . I have two cows in heat for late service this afternoon . . . one to be bred to "Ivanhoe Star," the other to an Angus bull . . . thank you." With that I hung up the phone, picked up the registration papers for "Blossom" and "Cindy" and walked back to the barn.

Down in the exercise lot, most of the cows were basking in the sunshine. Some were nosing around fence lines and an adjacent corn crib. "Blossom" and "Cindy," however, were riding each other almost constantly and "Cindy" was bellowing loud enough to be heard all over the township.

"I'd hate to lose "Cindy," I thought to myself. She was one of the most profitable cows in the herd, but if she couldn't come back with a calf the following year, her days would be numbered. This was going to be her fifth and last chance to be bred. After four unsuccessful services — all without explanation from either the service technician or veterinarian — she had reached her limit.

It was almost milking time when Lloyd, the representative from the breeders' cooperative arrived. He stepped out of his car, unlatched the trunk, pulled his boots on, and opened the liquid nitrogen tank. Curls of vapor crawled out of the top and slid down the sides gracefully while he removed two ampules of semen from two separate canes. He dropped them into an ice-water bath and allowed the life-giving mixture to thaw while he wrote out appropriate breeding slips.

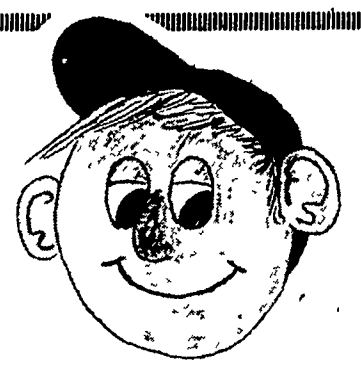
"What do you think?" I asked Lloyd when the job was done. "Everything seems okay," he answered. His words weren't very reassuring. There was no sign of anything being wrong, but that had been the case on previous breedings too — not just with "Cindy," but with other cows as well. "It's always the better cows which are difficult to get with calf," I remarked. Many other dairymen have said the same thing as they time and time again face the cruel reality of not getting a good cow with calf.

Fortunately, this particular episode of life on the farm came to a happy ending. "Cindy" conceived and stayed in the herd for a number of years thereafter. But some other cows weren't as lucky

© Dieter Krieg 1976

Nixnutz's Corral

By BARNEY NIXNUTZ



"All the news that's unimportant, but still interesting."

They're all wet

Word has been received by this roving reporter that Idaho potato farmers have developed a new method for growing potatoes which eliminates the need for irrigation. The development is expected to cut production costs by the millions of dollars. How do they do it?

By planting alternating rows of potatoes with onions. The onions make the potatoes' eyes water and presto! the need for additional water is unnecessary.

Big playground

A grade-schooler from town visited a farm one day and went bananas over all the nifty things he saw. It was like a huge playground to him and he and his young farm friend had a good time with calves, cats, forts built out of straw, and anything else. After all this frolicing, the youngster from town took a moment to wonder about it all.

"Tell me, where does your Daddy work?" the young lad asked.

Good suggestion

A cow was in the process of giving birth to a calf while a little six-year-old girl stood close by witnessing the miraculous event. Speechless throughout the process, the pig-tailed youngster eventually turned to her father, who was assisting the cow, and asked quite innocently: "Wouldn't it be easier if cows had zippers?"

Hard to see

Who was the County Extension Agent who showed up at a dinner one day, and when he was introduced, the emcee suggested he get up on a chair so everyone could see him?

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W ALTHOUSE

THE MOST FOR THE LEAST

Lesson for April 4, 1976

Background Scripture: Matthew 25.

Devotional Reading: Matthew 25:19-30.

There isn't anyone who hasn't seen Jesus at some time.

Of course, that doesn't mean we recognized him. More than likely we didn't. Nevertheless, you have seen him and so have I.

Recently I saw him in a prison cell. He appeared in the guise of a young man who has been in and out of trouble for most of his twenty years. In his haunted eyes I saw a life that is still redeemable — providing he gets some help, providing some one takes an interest in him and shows him that all is not lost.

When did we see you?

I saw him also in a convalescent home. He appeared as a frail woman of seventy-five who for the past few years has passed each solitary day in the confines of her tiny room. Her eyes are too weak to watch television; her hearing too poor to listen to the radio; her family is "too busy" to visit her. Jesus looked at me through her eyes and it was enough — he didn't need to say anything to me, my own conscience spoke loudly enough.

But there's nothing unique about my experience: everyone can see Jesus . . . if they look closely enough. Some of us have the opportunity to see him every day, perhaps often each day. He meets us in many different disguises, but he is ever walking, standing, and sitting along the paths we take each day.

You, for example.

When did you last see him?

Was it last night as you watched the evening news? Was it his face that looked at you through hunger-glazed eyes as the commentator spoke in matter-of-fact tones about hundreds of thousands dying of starvation in Africa? Perhaps like many you averted those eyes and complained about showing "such things" at mealtimes.

Then again, it may have been Jesus who came knocking at your door the other day and asking for used clothing and furniture for the family whose home was destroyed by fire. Perhaps it was Jesus whose disguised face appeared on the little brochure asking for support of community agencies and services.

As you did it

No matter where we go and what we do, Jesus is waiting for us in the lives of people who are hungry, thirsty, naked, sick, strangers, and in prison. And it is how we respond to him in these circumstances that matters in the long run. Not, what church do we go to, not how perfect or unperfect is our attendance, not the doctrines we affirm, or the church offices we hold, nor the respectability ascribed to us by others. However important these things may be—and they are—they are only peripheral to the basic question of how we respond to our fellowmen in need, no matter how unlovely they may appear, and give our most for those whom Jesus called "the least of these my brethren."

NOW IS THE TIME . . .

To Fence Out Rabbits

Many calls received at the Extension Office refer to the control of rabbits in flower and vegetable gardens. It seems there is more trouble in the suburbs than in the rural areas. The solution is not easy because most of the repellents only last a few days at the best. I would suggest a chicken wire fence be built around the area as soon as the plants are set into the ground. If this is not possible, then I'm at a loss to suggest a good method of preventing them from eating plants. The local Game Wardens may be in a position to provide traps, but the demand may exceed the supply and time of the Warden.

To Utilize Manure As A Fertilizer

This is the time of the year

CO-OP LEADERS

Officers and board members for 1976 posed for this picture following the fifteenth annual meeting of the Maryland Council of Farmer Cooperatives last month at Frederick. Seated are (left to right): Patrick H. Murray of Bryantown (Charles county), president; Richard F. Price of Phoenix (Baltimore county), vice-president; Robert J. Beiter of Lewisdale (Prince George county), secretary, and Glenn E. Eaves of LeGore (Fredrick county), treasurer. Standing are (left to right): Cecil K. Holter, Jr., of Middletown (Frederick county); Robert E. Vaughn of Braddock Heights (Frederick county); Garvin E. Tankersley of Barnesville (Montgomery county); B. Earl Duncan, Jr., of Walkersville (Frederick county), and Frederic G. Lodge of Frederick. Murray, Duncan and Lodge are associated with Southern States Cooperative, Inc., of Richmond, Va.; Tankersley is associated with the Farm Credit Associations of Frederick; Holter is president of the Farmers Cooperative Association, Inc., at Frederick; Beiter is an Extension agricultural economist at the University of Maryland in College Park, and the other three persons represent three dairy producer cooperatives operating in Maryland.

Guernseys recognized

PETERBOROUGH, N.H. —Kelsos Emorys Crumdale, a Jr. two year old registered Guernsey cow, owned by Crumdale Farm, Eugenia C. Madeira, has completed an official DHIR actual production record of 12,570 pounds of milk and 548 pounds of butterfat, in 305 days two times a day milking, according to the American Guernsey Cattle Club.

The testing was supervised by Pennsylvania State University, University Park.

Two other registered Guernsey cows in the herd of Crumdale Farm, Berwyn, Pa., have recently completed top official DHIR actual production records.

Guernsey milk is world famous for its high protein, delicious flavor and golden yellow color.

Kelsos Rulers Annora, a twelve year old, produced 14,910 pounds of milk and 733 pounds of fat, in 305 days. Kelsos Challengers Jeanette, a Jr. three year old, produced 13,150 pounds of milk and 632 pounds of fat, in 305 days.

GOOD WORD from the Bible

But ask now the beasts, and they shall teach thee; and the fowls of the air and they shall tell thee;

Or speak to the earth, and it shall teach thee: and the fishes of the sea shall declare unto thee. Job 12: 7-10

Deficiency pay cut

Secretary of Agriculture Earl L. Butz has announced that it will not be necessary to make deficiency payments for 1975-corn and sorguhm, according to B. Snavely Garber, chairman of the Lancaster County Agricultural Stabilization and Conservation Committee.

As provided by the Agriculture and Consumer Protection Act of 1973, deficiency payments shall be made to producers when the national weighted average price received by farmers for the first five months of the marketing year - October-February - is less than the established target price for these crops.

The national weighted average price received by producers for the first five months of the 1975 marketing year was $2.44 per bushel for corn and $2.31 per bushel (4.13 per hundredweight) for sorguhm. Since this is in excess of the target prices of $1.38 for corn and $1.31 for sorghum, there will be no deficiency payments for the 1975 crop.

Adams elected to agricultural council

John Schwartz, Adams County agricultural agent, was elected chairman of the Adams County Council of Agricultural Organizations at its March 30 meeting. Other officers elected were Stanley Wolf, Orrtanna, vice chairman; and Robert Whitman, Agway, Secretary - Treasurer.

The purpose of the Agricultural Council is to promote agriculture in general by providing a forum for consideration of agricultural problems and exchange of ideas and information among agricultural leaders and the public. To accomplish this the group developed the following objectives: (1) To provide a means of bringing all the agricultural groups in Adams County together for the purpose of presenting the agricultural story to the public. (2) To provide an opportunity for leaders in the agricultural community to meet and become better acquainted. (3) To promote and sustain agriculture as a leading industry in Adams County and (4) provide a forum for exchange of ideas and concerns among agricultural leaders and the public.

Schwartz stated at the next meeting the group will be developing a permanent membership list, policies and activities, and programs for the coming year.

The next meeting will be held 8:00 p.m., Thursday, April 29 at the Adams County Cooperative Extension Service Office.

AWARD WINNER - Amos Funk, well-known Lancaster County farmer and soil conservationist, recently received recognition in the 1975 "Spokesman of the Year" contest, sponsored annually by the Chevron Chemical Co. and "Farm Chemicals" magazine. Funk was one of the second-place winners.

The first silver dollar was coined in Philadelphia, Pennsylvania in 1794!

Nonfat dry milk to be donated to poor lands

The U.S. Department of Agriculture has announced that a total of 300 million pounds of Commodity Credit Corporation-owned nonfat dry milk has been made available for donation under Title II of the Public Law 480 Program, according to B. Snavely Garber, Chairman of the Lancaster County Agricultural Stabilization and Conservation Committee.

Approximately 100 million pounds of the milk, valued at an estimated $67 million, is budgeted for use through September 30, 1976. Another 200 million pounds, valued at about $134 million, is programmed for use from October 1 through September 30, 1977.

A primary goal of the Title II Donations Program is combatting malnutrition in less developed countreis through aiding small children and pregnant and nursing women.

The U.S. government is currently discussing with officials of the World Food Program and private U.S. voluntary relief agencies requirements for nonfat dry milk.

In Hindu mythology the afterworld has 28 divisions, including one in which people are required to eat cake

Now is the time

[Continued from Page 10]

when all types of fertilizer and plant food should be applied and worked into the soil. Commercial fertilizer is readily available and commonly used. Livestock and poultry producers should keep in mind the real fertilizer value of the manure crop. The 1976 Agronomy Guide will give the average fertilizer values in various types of manure; this by-product of the farm enterprise is usually quickly available to most plants and should be considered when calculating the actual needs. Caution should be used when applying straight poultry manure to land because it is high in nitrogen and may burn plants.

To Take Time To Be Safe

This is an old word of caution that comes to mind every spring. However, it is still very important for all farmers and operators of animals and machinery. Many of us may recognize and realize certain hazards in our every-day life, and these should be corrected or removed. However, we never take time to do that very thing. With the spring planting season at hand, I'm sure many folks will be getting in a hurry and overlook a dangerous hazard that may injure someone. At the moment I'm thinking of too much speed in our high-powered tractors. Also, the great danger in permitting youngsters to ride on the tractor or other machinery. I know the temptation is great and it takes hard discipline to say "no", but it is better to be safe than sorry. Practice safety measures at all times.

To Condition Livestock Gradually

Lush pastures are developing and soon the livestock will be enjoying this forage which they have been thinking about all winter. Some temporary pastures such as winter rye will soon be ready for grazing. We suggest that livestock owners be very careful the first week by allowing the herd on the grass only a short time each day. Excess intake of the new grass may cause scouring and bloating. Dairymen should be very careful with this lush grass in order to prevent "grassy" flavored milk. The grazing of the milking herd should not be permitted for at least 4 to 5 hours prior to the milking period. The feeding of hay and silage should be continued while becoming acclimated to the new pasture growth.

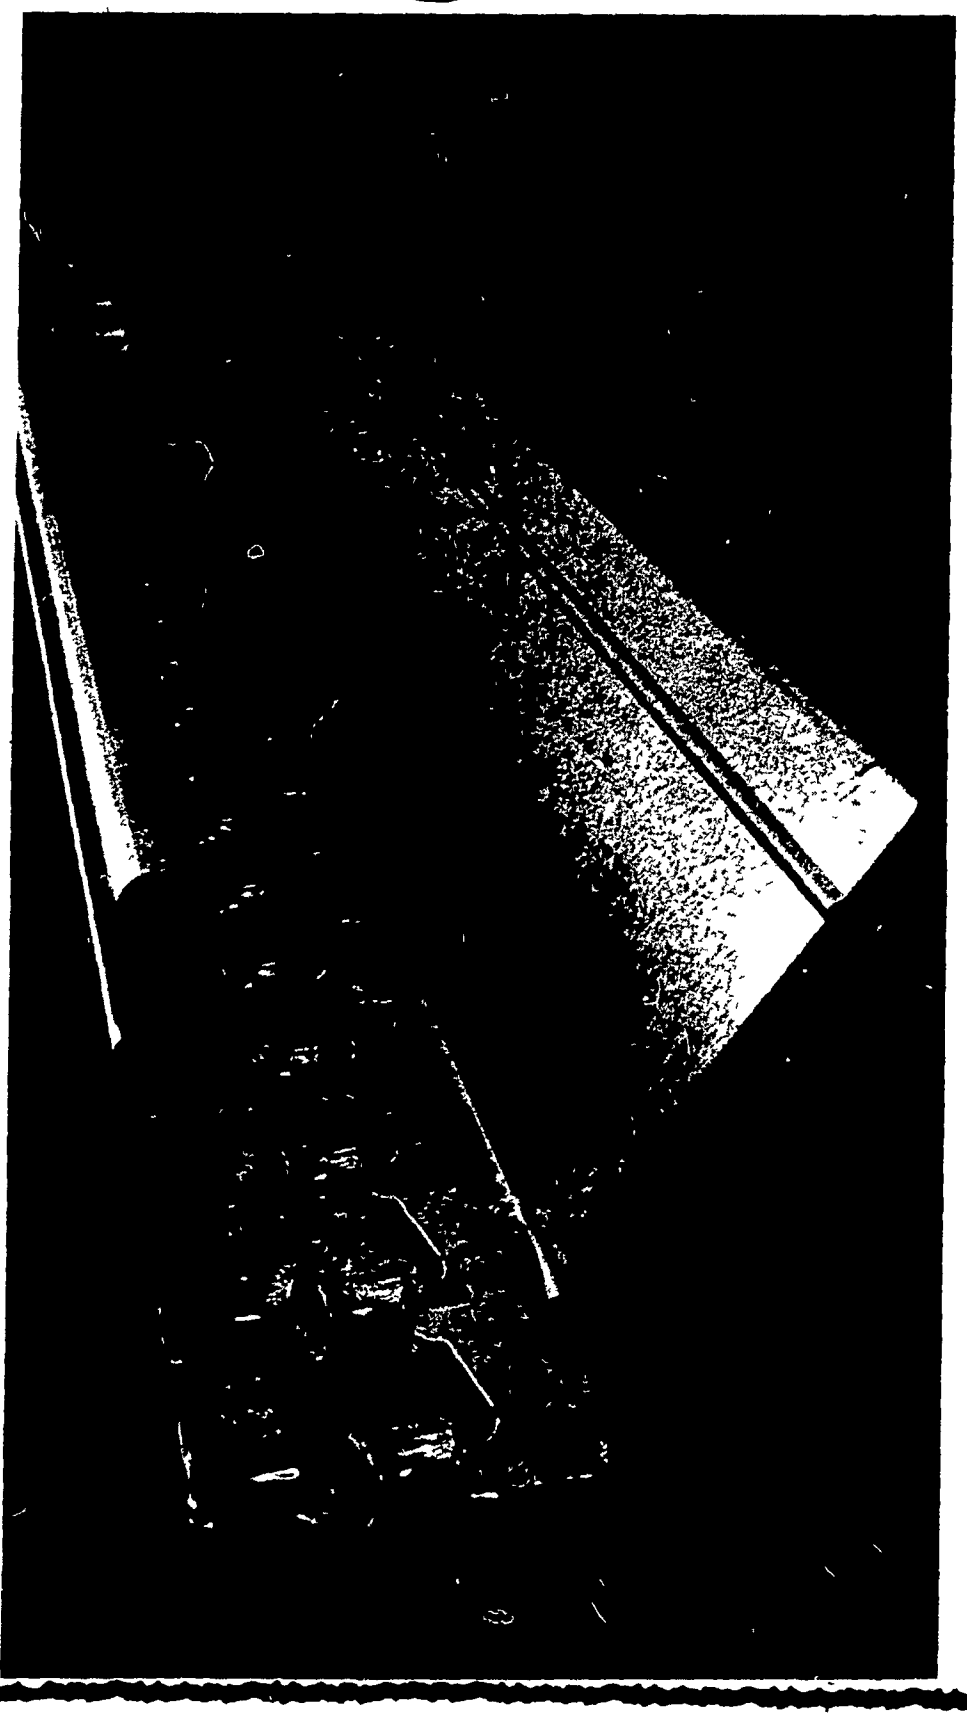
A Cage isn't enough



It takes more than wire to make a cage system. More than anything else it takes a feeder.

Sure, other components are important, but mainly it's the feeder that makes the system. That's why the Big Dutchman Tri-Deck system outsells the others. Tri-Deck is equipped with our SPEED FEED chain feeder that feeds every bird the right amount at the right time, without waste.

When you compare poultry equipment remember that the real test of a cage system is its feeder. Big Dutchman is ready for the test.

Big Dutchman, where proven ideas are put into action.

Weed control in corn... so good it's guaranteed!

You can rely on Sutan®+ herbicide and atrazine to do the job. Rain or shine, it works so well that Stauffer guarantees performance.

Just mix Sutan+ and atrazine in the soil as you work the ground for planting. Incorporation puts your herbicide right in the weed sprouting zone. This makes sure that you control weeds as fast as they sprout. You don't gamble on rain coming soon after corn planting to put your herbicide in the soil. That's the chance you take with surface-applied herbicides.

Most weed experts rate Sutan+ and atrazine tops for broad spectrum weed control in corn. This tank mix combination controls ever-present foxtails, crabgrass, barnyardgrass, pigweeds, lambsquarters and ragweed. And many others. Plus tough weeds like nutsedge, fall panicum and others.

The low rate of atrazine reduces chances of residue carryover. Sutan+ is biodegradable with no residue problems for rotation crops. Use Sutan+ and Bladex* for weed control with no carryover.

Performance of Sutan+ and atrazine, and of Sutan+ for grass weeds, is guaranteed in the continental United States when used as the label directs, or Stauffer will replace the Sutan+. Verify purchase, leave a check strip and notify Stauffer promptly.

Don't take a chance on losing control of weeds in your corn. Incorporate Sutan+ and atrazine in the soil before planting and you won't need to rush out with catch-up herbicides and cultivation. See your Stauffer supplier now. Always follow label directions carefully. Stauffer Chemical Company, Agricultural Chemical Division, Westport, Connecticut 06880.

Dairy production

[Continued from Page 1]

milk or 600 of butterfat percow were:

Dale Hostetter and sons, Annville; Benuel Stoltzfus, Gordonville; G. Hershey Hostetter, Gap; Paul Zimmerman, Ephrata; Wallace Mellott, Harrisonville. Mellott's herd of 56 Jersey came through with an average of 13,238 and 677 for milk and butterfat, respectively. The performance placed him and his herd sixth among the 34 Pennfiled dairymen customers who were recognized.

Continuing with the top ten on the list: Maple Lawn Farms, Inc., Fulton, Md.; Norman and Dale Rothermel, Pitman; Blossomelle Holsteins, Lancaster; and Kingstead Farm, Damascus, Md.

Individual records which exceeded 1000 pounds of butterfat were registered by the following:

Har Cream Farm, White Hall, Md., with "Sinking Spring Acre Angle," who produced 27,760 and 1053; Star Rock Farms, Conestoga, with "Lorenzo Mamie Four Cross" (29,216 and 1043) and "No. 153 with 26,917 and 1001. Springzie Farm, Meedmore, with "Needmore Reflection Swinger," 24,622 and 1012; Len-Lyn Farms, Stevens, with "D-T-Y Vigo Charmcross Dancer," 25,066 and 1,006; Rocksvu Farm, Street, Md., with No. 18, who produced 25,810 pounds of milk and 1028 of fat.

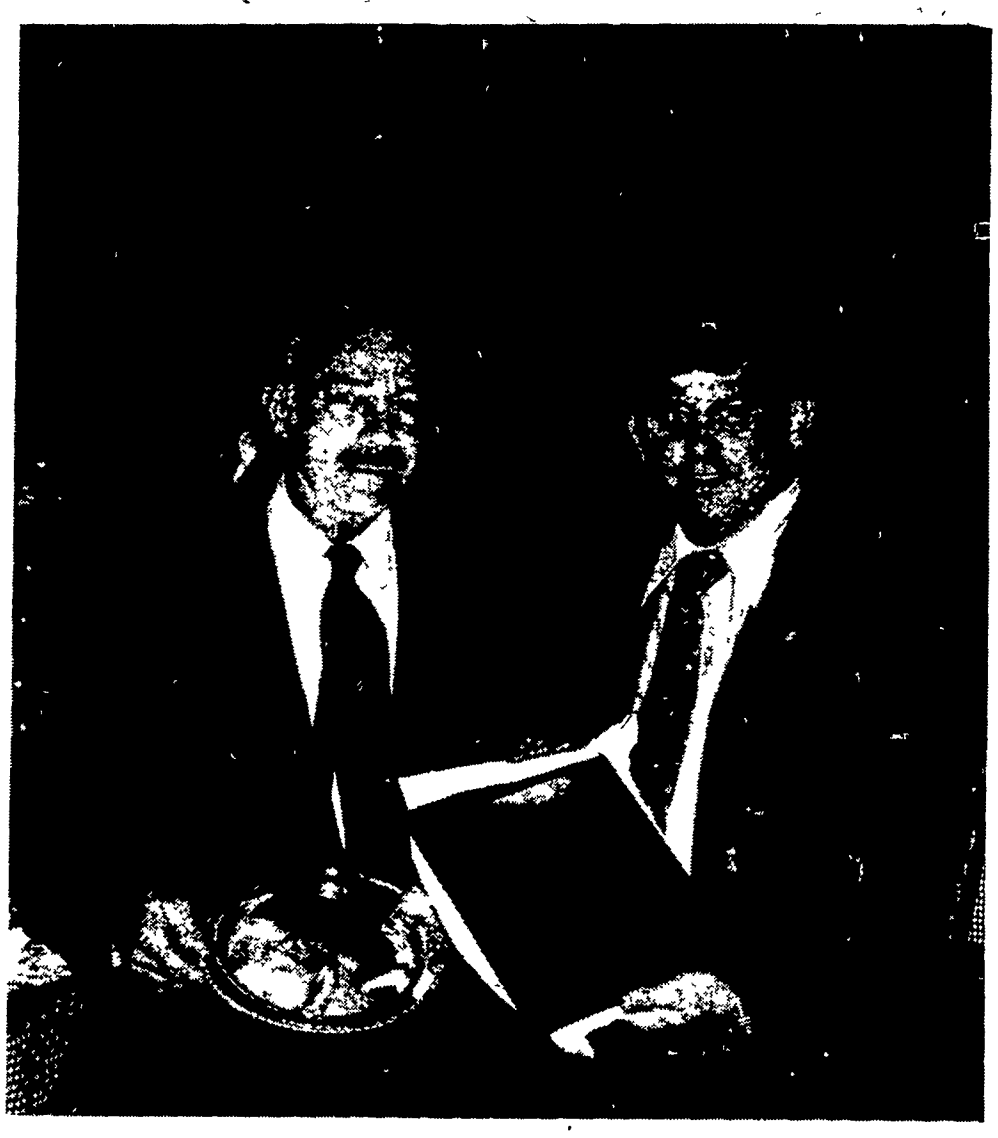
Hershey Hostetter, Gap, with "Arlene" 25,982 and 1025; Kingstead Farm, Damascus, Md., with "Kingstead Bess Mystery" (21,570 and 1003), "Kingstead Fond Jill," (24,470 and 1071), and "Kingstead Fond Jac," (23,610 and 1005). Loudal Farm, Rising Sun, Md., with "Lovdal Princess Fawn," 23,090 and 1001; Moses Lapp, Gordonville, with "Mistress" and "Chief" who had records of 23,587 - 1030 and 23,660 - 1010, respectively.

Leader Farms, New Freedom, had a Guernsey with 22,510 for milk and 1014 of fat. She was "leaders D. Cynthis." Great View Farms at Linglestown had "Great View Select Farn" with 25,215 for milk and 1128 for fat. Mowry Farms at Roaring Spring topped the field of 1000-pound butterfat cows by checking in with 15 sych records. The hgihest for milk was 34,727 pounds, turned in by "Ida." Three others in the herd produced more than 30,000 pounds of milk as well. The highest individual for butterfat was Mowry's "Glamour" who had 1326 pounds in 359 days.

Pep-L-Lea Holsteins, owned by Bob and Jane Pepple of Oxford, had three cows go over the half-ton of fat mark. Bloosomelle Holsteins, Lancaster went over the 1000 mark with their "Blossomeele Ivanhoe Jody" who produced 30,658 pounds of milk and 1033 of fat in 365 days. M.J. Starner and sons at New Oxford had "Meado-Lake Performer" with a record of 15,677 and 1110. Sinking Springs Farm had a string of six to exceed 1000 pounds of butterfat, the highest of which belonged to "Sinking Springs Stu Marie." She pumped out 27,192 and 1225 as a six-year old.

Stoltzcliff Farm had three home-bred individuals, "Fanny," "Star," and "jo" go over the 1000-pound hurdle. Cocalico Farm, Ephrata, also had three to acieve that goal.

The event was held at the Good'n Plenty Restaurant with several hundred in attendance.



Herman Stebbins, left, receives his dairy production award from Pennfield representative, Steve Leiser. Stebbins manages Sinking Springs Farm, York, which is consistently among the top in the U.S.

Poultry

[Continued from Page 1]

Ginny; singer Lori Wilson, and the Al Morrison Orchestra.

Kerstetter, in his remarks to the gathering, noted that the poultry industry in Pennsylvania ranks third in size among agricultural industries. He also pointed out that the Keystone State is the fourth largest producer of poultry products in the entire nation.

"The Pennsylvania Department of Agriculture has taken a position that eggs are innocent until proven guilty," the Secretary remarked at one point in reference to claims that cholesterol in eggs is harmful to health. He added that his Department is supporting egg producers in their anti-cholesterol campaign and is active in promoting eggs.

Regarding poultry health, Kerstetter said the state's program to maintain healthy flocks of birds is working well and is constantly improving. There is, for example, a statewide surveillance program for exotic New Castle disease. Other diseases are also closely monitored to protect every producer. New techniques for diagnostic services have been introduced in the state has moved ahead in the poultry inspection program.

William Carlin, president of the Federation, expressed his pleasure in seeing the large turnout and thanked everyone for their support. "It's wonderful to have this many people here," he said, "and I'm especially grateful to the Board of Directors for their support of the activities here this evening," The PPF executive noted that the Federation's success is largely due to a massive combined effort which was initiated three years ago. Each year since then has seen significant increases in participation and better than expected results. Last year, for example, PPF sold 540 tickets to the fund raising banquet — a record. This year the expected turnout was exceeded by 150.

"Producers, processors, and allied industry have to work together," Carlin told the group in his closing remarks. Co-chairmen for the event were Dale M. Weaver and Kenneth Longacre.

Fleetwood Grange meets

Fleetwood Grange No. 1839 in Berks County recently held its annual Open House with nearly 300 people in attendance.

The main feature of the program was a pageant "This is My Country" written by Esther Schaeffer. The speaker was Pete Wambach, who promoted the state with his topic "Know Your Pennsylvania."

Two members received Grange of the Year Awards they were Mrs. June Schuler and Esther Schaeffer.

"Spring Happenings" was the theme of the March 25th meeting with several skits being given by members of the grange.

Let us never forget that the cultivation of the earth is the most important labor of man.

TRY A CLASSIFIED

April 7 to be Pa. 'Food Day'

HARRISBURG - The Commonwealth's leadership in agriculture will be stressed at the Pennsylvania Food Day Panorama, a full day of workshops and speeches scheduled for April 7 at the Penn Harris Motor Inn, Camp Hill.

Gov. Milton J. Shapp, expected to address the session, has proclaimed the Food Day observance as a "day to act on the world food crisis."

National Food Day, to be observed the following day, in recent years has focused on the problems of matching food production and distribution with the geometrical growth rate of the world's population.

The observance in the Commonwealth, according to the Governor's proclamation, will stress Pennsylvania's status "as a keystone to our nation's agricultural heritage and leadership." An important point to realize, according to the proclamation, is "that no one segment of agriculture - food production, marketing and distribution, and consumer education and outreach - can live alone."

This triple theme will be reflected in three distinct exhibit and workshop areas that will be set up in the Penn Harris Motel's convention room. The observance will begin at 10 a.m., with speakers to be featured at the opening session, the luncheon session and at the banquet beginning at 6 p.m.

Agriculture Secretary Raymond J. Kerstetter and Dr. Thomas King, associate dean of Penn State's College of Agriculture, will welcome the gathering at the morning session. Mrs. Patricia Young, chairperson of the National Council of Churches Crusade Against Hunger, will deliver the charge to the conference.

The luncheon session will have as featured speaker Donald Kimmel, the North American representative of the UN's Food and Agriculture Organization. Dean Carey, president of Knouse Foods Cooperative, will be the sessioon coordinator.

A midafternoon session, beginning at 3 p.m., will be coordinated by Rodney Leonard, executive director of the Community Nutrition Institute, and will be addressed by Dr. Thomas Patrick Melady, executive vice president of St. Hoseph's College.

Kerstetter will coordinate the banquet session at which Sen. Dick Clark of Iowa will be the main speaker.

At the workshops interspresed throughout the day, the producer part of the program will be represented by the Pennsylvania Grange, the Pennsylvania Farmers Association, the Pennsylvania Farmers Union and Penn State's Extension Service. The dairy industry and a discussion on how to help farmers market their products will be highlighted at this session.

The food marketing and distribution part of the program will have James Toothman, Penn State extension specialist give an economic overview of food marketing. John McNelis, executive secretary of the Pennsylvania Grocers Association, will moderate a panel discussion.

At the consumer education and outreach section, four speakers are on the program: Mrs. Tamazine Kinneman, Penn State extension, "An Overview of Basic Nutritional Needs"; Dr. William Baumgardt, Penn State Dairy and Animal Science Department, "Animal Protein versus Vegetable Protein"; Edward Thum, National Livestock and Meat Board, "Meat Grading and Labelling"; and Ms. Jane Kinderlecher, Rodale Press, "How to Make Your Family Healthy When They Are Not Looking."

'Little International' at PSU next week

The third Invitational Livestock Judging Contest at Penn State will be Saturday, April 10, at the Beef and Sheep Center. Registration for 4-H and FFA teams, and Penn State students, will begin at 8:45 a.m. and judging will get underway at 9:30 a.m.

The judging is the first event in the 59th Little International Livestock Exposition to be climaxed with "Show Day" on April 24 at University Park. The Exposition is sponsored by the Penn State Block and Bridle Club.

The April 10 contest will feature junior, collegiate amateur, and collegiate professional divisions. Members of 4-H and FFA teams from throughout the state will compete in the junior division. The amateur and professional divisions are open to Penn State students. "Professionals" are students currently enrolled in a course directed toward judging and preparing a judging team for intercollegiate competition.

Awards will be given for the high scoring teams in the junior division and high individuals in all three divisions.

Terry Stockdale of Dayton, a senior in animal science, and Dan Baum of Elizabethtown, a sophomore in animal industries, are co-chairmen for the Invitational Livestock Judging Contest. Four group leaders will assist with the contest and see that it is run as closely to a regulation contest as possible. The leaders are Gary Dean of Strasburg, Warren Fick of West Chester, Margaret "Debbie" Moore of DuBois, and Mike Sekerak of Corry. The faculty advisor is Glenn R. Kean, professor of animal science.

April 24th will be the high point of this year's Little International. "Show Day" events will be held at the Ice Pavilion at University Park, starting at 8 a.m. Beef cattle, horses, sheep, and swine — that Penn State students worked weeks to groom and train — will be shown. Prizes will be given for outstanding performances in fitting and showmanship.

Honored during the April 24 Exposition will be Herbert M. Gans of Uniontown, retired Pennsylvania Master Farmer. Gans is the 1976 recipient of the Distinguished Alumnus Award of the Department of Dairy and Animal Science at Penn State.

During his 46 years of farming, Gans bred and developed the herd of Ebonite Holsteins which, under his management, qualified for the Progressive Breeder's Award 14 consecutive years. He was a member of the first bull improvement association in Fayette County, served as director of the South Western Artificial Breeding Association, and served on the Association's Holstein Sire Selection Committee.

One of his most significant honors was being named a Master Farmer of Pennsylvania in 1937. In 1964 he sold the herd of Holsteins that he had developed over the previous 37 years and assembled a herd of Polled Herefords. During the eight years before retiring, Mr. Gans established himself as a progressive breeder of Polled Herefords and did quite well in the show ring at various fairs.

Gans graduated from Penn State in 1926 with a bachelor of science degree in animal husbandry. He then entered Ohio State University and earned a master's degree in animal science in 1927. He returned to the home farm in the Fall of 1927 and entered into a partnership with his father. He retired in 1973.

USDA to determine 1977 national wheat allotment

The U.S. Department of Agriculture has called for public comment on the proposed size of the 1977 National wheat allotment.

Under current legislation, the allotment is used as a basis for making payments to wheat growers if the market price for wheat falls below the established (target) price or if growers qualify for disaster payments. The allotment in no way constrains, nor sets a limit, on the amount of wheat thay may be planted.

Legislation provides that the Secretary of Agriculture proclaim a 1977 national wheat acreage allotment not later than April 15, 1976. The national allotment shall be the number of acres which the Secretary determines on the basis of the estimated national average yield will produce the quanitity (less imports) that he estimates will be used domestically and for export during the marketing year for the crop.

If the Secretary determines that carryover stocks are excessive or an increase in stocks is needed to assure a desirable carryover, he may adjust the allotment by the amount he determines will accomplish the desired decrease or increase in carryover stocks.

Prior to determining the 1977 national allotment, consideration will be given to data, views and recommendations relative to estimates of the national yield, domestic utilization of wheat, exports, carryover and other data pertinent to the determination. The public may submit recommendations in writing to the Director, Grain, Oilseeds, and Cotton Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20250. Submissions must be received by the director not later than April 8. These comments will be available for public inspection in the Director's office.

One of two individual truck drivers to receive very special recognition during an Agway sprayer inspection was Vernon Frankhauser (left) Lancaster. Presenting the award was Don Hazard, program manager for the motor transportation service of Agway. Tom Malinowski of Ironton also won a similar award.

Agway drivers honored

By MELISSA PIPER

MANHEIM—Four Agway employees recently received special driver recognition awards during a sprayer seminar - inspection clinic held at the Agway feed plant here.

Vernon Frankhauser, Lancaster and Tom Malinowski, Ironton were honored with awards of excellance for their efforts in individual truck maintenance.

Steve Kurtz, New Holland and Gerald Martin, Lebanon, were also recognized for their maintenance efforts dealing with individual trucks and sprayer equipment.

The awards were presented following a driver training seminar and sprayer inspection conducted by the motor transportation service of the Agway Company.

Two specialists from the transportation service were on hand for the day-long program. Don Hazard, program manager, inspected the 18 trucks representing 12 southeastern Pa. counties, for chassis safety and condition as well as individual maintenance.

Art McLaughlin was on hand to inspect the sprayer equipment for efficient control and safety.

The rigid inspection was carried out not only for Agway's own benefit but for the customer who uses their sprayer services.

"Because of increased environmental protection laws, we are putting more emphasis on safety and efficiency," explained Harold Mengel, Agway's crops specialist. "The work we do here will aid the customer in many ways."

Jack Reed, manager of the Lebanon Agway Weigh-in Division, coordinated the inspection and training programs.

Milk prices, future pondered

[Continued from Page 1]

One thing sure - the price will slip from the present levels, just how far depends upon the two areas I mentioned earlier- sales and production.

Some think the sales will not be affected as much this time when compared to 1974 because of a generally better economy in the country. Production will depend upon how we, as farmers, react to the higher prices. From what I see in the country concerning cow and heifer prices, equipment purchases, and expansion plans, I think the production will come. The February utilization indicates that these factors are in motion now. As if these were not enough to cause the prices to drop, one of the large coops in the market has been actually encouraging each of their members to produce more milk during this year - an action which I think is irresponsible in view of the other circumstances.

When I first started thinking about my report, my first thought was this year it was going to be easy - good prices for milk; all divisions of the Cooperative operating in the black; membership up; Pennmarva going great with two new members; no real problems from Washington; we got our 80 percent parity; promise of countervailing duties. I had a good feeling about the dairy business. Kind of like the feeling you get on a Summer day after a nice shower, the corn is starting to tassel, alfalfa coming back out after the last cutting, and your favorite cow just had a heifer calf.

Then I had to pick up the last issue of HOARD'S DAIRYMAN and read the article entitled "Its a new ball game for dairymen". I'm sure that Dr. Knutson was not trying to be an alarmist when he wrote the article but he sure presents some things we should be thinking about. The article should be required reading for every dairyman in the country and I advise you to look it up and read it.

What Ron Knutson is saying is that, in spite of the present good times, we have our work cut out for us. He mentions the new politics of agriculture - all the people within and outside of the government who are now interested in and making their presence felt in agriculture today and will even more so in the future.

Various consumer groups are also getting into the act. He tells us the importance of working with the Congress and with other agriculture groups. I am particularly concerned about what he says about a "free" world market in farm products and "who will control U.S. agriculture".

The one item that really hit me was - "in my opinion, it is entirely possible that you may have to do without Federal Orders, even as early as the 1980's". "My advice", said Knutson, "prepare to operate without them." Now plug these factors into management decisions and see if it changes the answers.

Even more important for us today is where does Maryland Cooperative Milk Producers fit into the picture. Will we be able to meet the challenges of bargaining for prices rather than getting it through the federal order? Are we large enough to make our voice heard in congress and to others who would try to run our business?. What will happen to the cooperative without facilities to balance their class I and II supplies? What will happen to cooperatives and not enough members to be a significant factor in either a larger federal order-say middle Atlantic, New York, and New England - or a market with no Federal Order at all?

These and many other questions will be concerning your Board in the future as we deal with the task of guiding MCMP in both its short and long range future.

Since our meeting here last year, some exciting things have developed in the area of membership. There has been a slow but steady growth in membership from farmers who are not members of any cooperative. This is a healthy trend for them, for us, and for the market and one I hope and expect will continue. Even though the membership has increased, it seems to be distributing itself differently so that, according to the Bylaws, an adjustment may have to be made in the directors apportionment this Fall at the district meetings.

An adjustment in hauling rates is necessary if we are to keep our own divisions in the black and provide means by which other haulers in the market might continue to provide satisfactory service to us. After careful consideration by management and the hauling committee, the Board approved adjustments. The adjustments will affect different members in different areas and of different sizes in slightly different ways. Many factors went into the final action - such as location, size, fixed costs, fuel and labor costs and so forth.

All divisions of MCMP operated in the black.

A substantial year-end profit to return to members and a nice gain in member equity over last year which, incidentally, amounts to over $3,000 per average member and even more when you consider actual value rather than book value of the assets. The only real problem in finances this year came from having to write-off the bad debt of Country Belle which went banckrupt during the year.

I'm not making excuses for it when I say that it is a part of doing business. When you have over $56,000,000 in sales in a year, you can expect some bad debts. We do watch these accounts very carefully and if we see a problem developing, we take action to prevent this sort of thing from happening.

Most of you are familiar with the Federal Order 4 advertising program that has been in effect for several years now. You have seen the ads, we have talked about the program at our meetings and recently, you have been receiving the publication - "Agency Actions" - which explains the program further. We are also aware that in markets which have a good program - such as we have - the sales seem to be higher. The amount used for advertising is still a nickle - the same as when the program was put into effect in 1972. Most of the cooperatives in our area seem to think we should go to seven cents for advertising. Your board voted to ask the secretary of agriculture to change the order to permit the seven cents. The board would like to hear your comments.

MCMP members re-elect president Wessel; quality and membership awards presented

The Board of Directors of the Maryland Cooperative Milk Producers, Inc., re-elected Herbert W. Wessel Jr., Hampstead, Md. as its president during its annual reorganizational meeting held March 26 in Baltimore.

Re-elected to serve with Wessel were Fred G. Butler, Inwood, W. Va., vice president; Boyd M. Cook, Boonsboro, secretary, and LeRoy E. Norfolk Jr., Randallstown, treasurer. R. L. Strock is the business manager.

Elected members of the Executive Committee were Richard F. Price, Phoenix; Jesse I Burall, Monrovia, and Samuel B. Foard Jr., Street.

The Board's reorganization came less than a week following the Cooperative's 41st membership meeting held at the Hunt Valley Inn, Cockeysville. Close to 700 members and guests attended the meeting which included the ratification of six directors to the MCMP Board and special awards presented to long-time mebers of the Cooperative and to those who excelled in the Qaulity Awards program during the past year.

The six dairymen named to terms on the MCMP Board of Directors by their respective districts last fall and ratified by the membership are Charles T. Edwards, Forest Hill; Richard F. Price, Phoenix; Herbert W. Wessel Jr., Hampstead; F. Guy McGrady, Rising Sun; Emory M. Kilgore, Airville, Pa., and Fred G. Butler, Inwood, W. Va. The terms for these men will run through March 1979.

Twelve members of the MCMP were recognized for mainatining continuous family membership in the Cooperative and its predecessor the Maryland State Dairymen's Association for 50 years or more. Those honored were: Frances H. Barnes or Evelyn Barnes Wilhide, New Windsor: Maurice A. Bassler or Warren F. Bassler, Clarksville; Belmont Farms, Inc. - O. B. Long or C. M. Holtz, Reisterstown; Robert L. Harrison, Woodbine; Robert I. Korman, Reisterstown; Elmer J. Moser or Richard E. Moser, LeGore; Morgan M. Rickey Jr. or Linda R. Ricky, Whiteford; Milton E. Smith or Ruth Z. Smith, White Hall; Stansbury Brothers, Pylesville; Eugene Todd, Bel Air; Ralph W. Walter or Robert B. Walter, Reisterstown, and Alvie L. Weller or Maragret B. Weller, Union Bridge.

The 50 years' honors program initiated at the Cooperative's 1974 annual meeting has honored a total of 131 members for a half century or more membership in the MCMP.

One-hundred-thirty-six of the Cooperative's members were awarded special honors for Quality Milk Production. Eleven of these received the MCMP's highest award - the Bronze Plaque for Excellence. To qualify these members earned a place on the monthly Honor Roll all twelve months of the year, maintained on-farm inspection scores averaging at least 99 out of a possible 100 points, had no quality problems, off-odor rejections or other quality deficiencies during the year.

The eleven Bronze Plaque winners for 1975 were H. Howard or E. Geneva Barkdoll, Boonsboro; Paul L. Doody Sr., and Sons, Union Bridge; Earl B. Grove or Earl B. Grove Jr., Hagerstown; Robert L. Grove or Norma M. Grove, Greencastle, Pa.; Hans A. Klagsbrunn and V.L. Wortman, Purcelleville, Va.; Melvin E. Leppo or Regina D. Leppo, Skyesville; Leo Merryman or Mary Merryman; Upperco; Herman L. Muller, Westminister; Panora Acres, Inc. - Norman E. Sellers or Paul L. Sellers, Manchester; Glenville L. Shade or Curtis Shade, Inwood, W. Va., and Theodore Small or Marion Small. Chambersburg, Pa.

Mr. and Mrs. Robert Grove, Greencastle; and Mr. and Mrs. Theodore Small, Chambersburg, were among those presented with Excellence Awards during the annual meeting of the Maryland Cooperative Milk Producers, Inc.

The Maryland Cooperative Milk Producers, Inc. was founded in 1918 and known until 1935 as the Maryland State Dairymen's Association. The largest Maryland based milk marketing cooperative, the MCMP marketed more than 620,000,000 pounds of milk in 1975 valued at more than $56 million. Its membership of 1,000 dairymen comes from all parts of Maryland and adjacent areas of Pennsylvania, Virginia and West Virginia.

Support price now effective

WASHINGTON - Secretary of Agriculture Earl L. Butz has announced that the support price for manufacturing milk will be increased to 80 percent of parity, effective April 1. This support level will be subject to quarterly review and adjusted if necessary to assure an adequate supply of milk.

According to current data, a support level of 80 percent of parity would result in a support price of $8.13 per hundredweight for manufacturing milk as of April 1. The law requires that milk be supported at such level between 75 and 90 percent of parity as the Secretary determines necessary to assure an adequate supply of milk to meet current needs, reflect changes in the cost of production and assure a level of farm income adequate to maintain productive capacity to meet anticipated future needs. The Secretary said the increase in support is necessary to accomplish these objectives.

Consumption of nonfat dry milk has suffered serious declines in recent years and resulted in large Commodity Credit Corporation (CCC) purchases and inventories for which outlets have become increasingly limited. By assigning a larger proportion of the April 1 increase in the support price for milk to the purchase price for cheese, it was not necessary to increase the nonfat dry milk price, thereby preventing even further declines in its future use.

The purchase prices announced may be adjusted as a result of the quarterly reviews of the support level for milk, or at the beginning of each quarter as a result of changes in production, consumpetion, market prices, and CCC purchases of the various products.

FFA'ers honored at Pequea Valley banquet

By MELISSA PIPER

BIRD-IN-HAND - Members of the Pequea Valley FFA and their parents met at the resort restaurant here last Friday for the 20th Annual Blue and Gold Banquet.

During the awards ceremony four of the chapter members received special star awards for their work in FFA the past year. Don Bowman Ronks, Pa., was presented with the Star Greenhand Farmer award while Mike Martin, Honey Brook R1, was named the Star Chapter Farmer. Elvin Weaver, Kinzers R1, received the Star Red Rose Farming award and Dale Miller Gap R1, captured the Chapter Star Farmer honors.

Barry Kreider, Kinzers R1, was presented with the Lancaster County Banker's Award for being outstanding senior member of the local chapter. Robert Bucher, representing the banker bankers presented the award. Kreider also garnered two FFA Fountain Medal awards in the area of crop production and in ag production placement.

The Dekalb Achievement Award went to Fred Lehman and was presented by Gerald Phillips, ag instructor at Pequea Valley.

Seven FFA'ers captured the remaining foundation Awards and were presented with medals for their work. Kevin Kurtz won in the ag sales and service division with Brian Hybreider taking the ag processing award. David McGinnis captured the ag mechanics award with Mike Martin receiving honors for dairy production. Dale Miller won in both the poultry production and livestock production areas with Elvin Weaver taking honors in the swine production division.

Officers of the chapter presented William Clouser and Bob Seigel with honorary memberships in the Pequea Valley FFA. Clouser is an ag instructor at the school and Seigel is a Kinzers area farmer.

Two educators of the school offered remarks during the program and praised the FFA for their work and leadership. John King, principal of the high school and Reginald Remley, superintendent, represented the school board members.

Dale Miller, president of the FFA chapter, served as toastmaster for the evening.

Mt. Joy youth stitches her way through craft projects

By MELISSA PIPER

MOUNT JOY — If you've er tried your hand at acrame, crocheting, itting or crewel work you obably know that anyone ng takes a degree of skill d a lot of patience to do. e area 4-Her however has stered each of these fts and more!

LouAnn Long, daughter of Mr. and Mrs. Harold Long, began her 4-H career eight years ago and since that time has been a member of the community club here.

In her first 4-H years, LouAnn took the basic sewing projects and even cake decorating but when interested individuals introduced several needlework crafts into the 4-H program, LouAnn eagerly tried her hand at the crafts and soon was on her way to several successful projects.

"I really wanted to learn how to knit," LouAnn explained, "but when the other crafts came into 4-H I took them also just to see what they were like."

The young lady found that handwork skills came easily to her and breezed through the basics of knitting, crocheting and crewel embroidery and finally tied it all together in macrame!

For her 4-H projects, LouAnn has made a poncho cape and several afghans. A brightly colored afghan constructed of blue, orange, yellow and green colors was one of her largest projects undertaken and while most people would have given up after completing such a task - the youth made two matching pillow covers also.

LouAnn's afghan along with a long white cape was included in the club's exhibit at the 4-H Expo held recently in Park City.

Macrame - the art of knotting designs - has also become a favorite hobby of the Mount Joy youth and LouAnn has constructed several bottle covers for display.

LouAnn has been the president, vice-president and treasurer of the Knitting Club - an extension of the community 4-H, and will probably be serving the younger members of the organization as teen leader this summer.

A member of the VICA Club at the Mount Joy Votech School, LouAnn is enrolled in the food trades program and enjoys using her 4-H skills in decorating cakes.

"I enjoy the cake decorating portion of the food trades," LouAnn explained, "I learned a lot of the techniques when I took it in 4-H and find it fun."

The young lady's talents are well evidenced by her crocheted and knitted apparel and although she is not quite sure what she will be taking as a project for this year in 4-H it will probably be something special.

LouAnn Long holds an afghan which she crocheted as a 4-H project. The 4-H member also crocheted matching covers for two pillows.

Big government hit

QUARRYVILLE - Darvin yd last night called for an d to the proliferation of big vernment, saying, "The ople who know America's oblems best are the people o live closest to those oblems. That's why I lieve it is vitally important r local governments to ume major responsibility solving local problems." Boyd is a candidate for the publican nomination to e 16th U.S. Congressional strict seat now held by p. Edwin D. Eshleman.

He made his remarks at a Boyd for Congress dinner rally here at the Methodist Church. It was the second in a series of five such rallies. Boyd plans to address different issues at each one, and confined his remarks last night to the federal bureaucracy and general revenue sharing.

"In the last 15 years," Boys told his audience, "the federal government has created 236 new departments, agencies or bureaus, while disbanding only 21."

Ephrata 4-H'ers reorganize

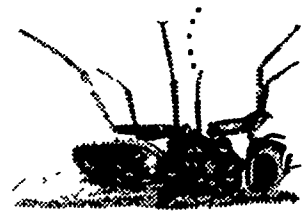
A reorganizational meeting of the Ephrata Area 4-H Clubs will be held April 12 from 7:30 p.m. at the Junior High School.

Interested youths ages 8-19 are urged to register at this meeting. Clubs forming include: dramatics, chess, livestock, crops, wildlife, bicycles and numerous others.

SAVE ON YOUR 1976 FLY PROGRAM

NOW PENNFIELD MAKES IT EASY WITH A CUSTOM FLY CONTROL PROGRAM FOR YOUR INDIVIDUAL DAIRY, BEEF OR POULTRY OPERATION WITH SHELL LIVESTOCK & POULTRY INSECTICIDES.

Fly control that works fast...



and lasts

RAVAP®
INSECTICIDE EMULSIFIABLE

- Controls Horn Flies, lice, and Lone Star Ticks on beef cattle
- Helps control Face Flies on beef cattle
- For direct application, use as a spray or in back or face rubbers
- RAVAP® gives you fast knockdown plus residual control of flies and maggots
- Mixes easily with water
- Use on barn walls and ceilings, manure piles and other fly breeding/resting areas

BUSTER THE DUSTER®
with RABON® Livestock Dust

- Controls Horn Flies and lice and aids in the control of Face Flies . . . on lactating dairy cattle and beef cattle
- Buster has a weatherproof cover

Electric rate increase feared

HARRISBURG — A sad April Fool's joke is being played on Pennsylvania consumers and it may cost many of them millions of dollars in increased electric bills, the President of the Pennsylvania Electric Association said here on April 1.

"Some people are trying to use Pennsylvania as a test tube for a social experiment called preferential rates," said Earl J. Miller, PEA President.

Miller was addressing the Harrisburg Chamber of Commerce.

Preferential rates provide a special low rate for the first several hundred kilowatt hours of power used and "are being talked about as a way to relieve the poor, the disadvantaged and those on welfare from the burden of higher electric bills," said Miller.

"As such they are a subsidy because someone must pay the cost not picked up," he said.

Claiming that the working middle class would have to pay more, Miller said, "we're against preferential rates."

"Let some other state dip its finger into the water and see if it comes out," said Miller.

"But let's not have Pennsylvania jump in with another political welfare scheme when we don't even know if it will be successful," he added.

"We're not against helping the poor," said Miller. "We're against the idea of using electric rates to accomplish a social purpose."

Miller emphasized the importance of planned growth to the businessmen. "The only way the poor will get a larger piece of the economic pie is to bake a bigger pie," he said.

More people and households, an expanding work force, growing industry and services such as mass transit, and better environmental clean-up all means a growing need for electric power in Pennsylvania, said Miller.

Most of that power will come from nuclear and coal fired power plants, he said.

"While nuclear costs more to build it is cheaper to operate than a coal plant," he said. "Last year nuclear plants in the U.S. generated power at 44 percent less total cost than fossil plants" for a net consumer savings of $670 million, Miller added.

Loyalty Day parade set

The First U.S. Army Band will be among the featured marching units in the Lancaster City-County Bicentennial Loyalty Day Parade, to be held in Lancaster on Saturday afternoon, May 1.

"This group is regarded as one of the finest military bands in the nation," said Dr. Noel P. Laird, parade chairman. "We are greatly pleased that their schedule could be arranged to correspond with our Bicentennial Loyalty Day observance. Lancaster Countians are in for a real treat."

Based at Fort Meade, Md., the 45-member First Army Band is led by CWO James G. Choate, commanding officer and bandmaster of the group, assisted by Sgt. Maj. Richard L. Jansen. The band traces its history back to 1861, when band members acted as stretcher bearers during the War Between the States. Today it is a versatile organization capable of performing as either a marching band or a concert band and offering a musical repertoire ranging from pre-Bach masters to contemporary composers.

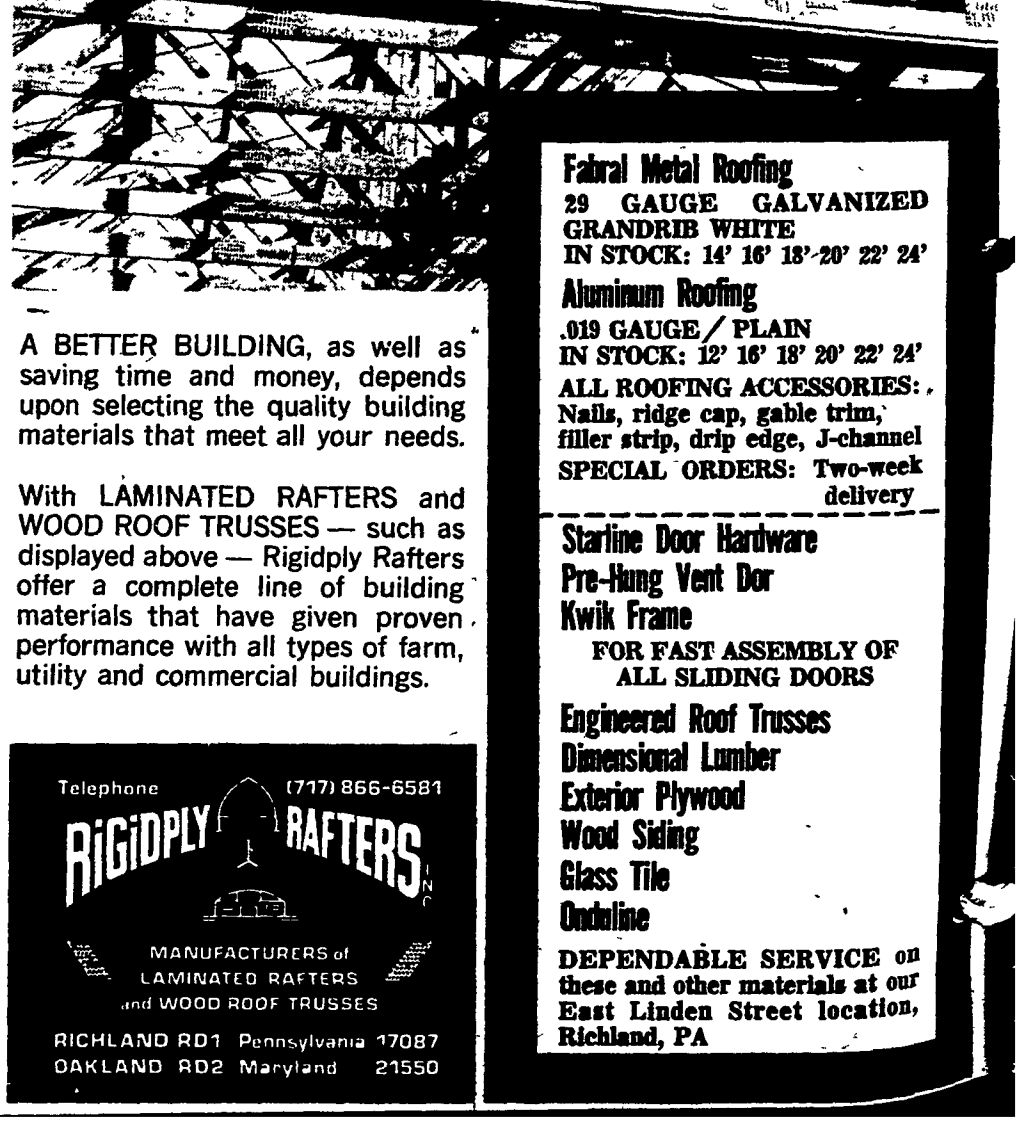
The eighth annual Loyalty Day Parade will commence at 1:30 p.m. on May 1. The line of march will originate at the corner of North Lime and East Orange Streets, move west on Orange to Marietta Avenue, then to College Avenue, turning west on Buchanan Avenue, then north on Race Street, ending some distance past the reviewing stand at Buchanan Park.

Herbert C. Mearig, general chairman of Loyalty Day, announced that entries are still being received for the parade. A number of marching bands, floats, baton-twirling groups, military and veterans' units, Scout and service organizations, antique automobiles and specialized vehicles have already been registered to take part, he said.

The Women's Committee of the Chester-Delaware County Farmers Association celebrated Agriculture Day on March 22 by setting up a booth at Exton Mall. Shoppers were offered tidbits of farm products such as mushrooms, cheese, bologna, peanuts, orange juice and grape drink. Smaller visitors were given balloons and coloring books. Sandra Evans, Dairy Princess helped in the evening by serving milk punch. A window display was put up at Avon Grove Elementary School to acquaint children with the story of Agriculture. Pictured are Mrs. Nathan King and Mrs. Carl Horst.

READ LANCASTER FARMING FOR FULL MARKET REPORTS

The tobacco from this tobacco shed had just been sold the week before. After this past Sunday it might have been too late as a strong wind swept through parts of Lancaster County taking roofs and trees with it. This shed belongs to Ralph Wanner, Narvon R2, and luckily didn't contain too much at the time of the storm. A tractor and wagon were trapped by the debris, however. Residents in the area said the wind came roaring through very suddenly at about 1:30 to 2:00 p.m. Sunday. One farmer had 12 trees taken down on his property, many lost roofs. According to some neighbors, the storm was "funnel-shapped," and came so suddenly that there was no time to seek shelter.



A BETTER BUILDING, as well as saving time and money, depends upon selecting the quality building materials that meet all your needs.

With LAMINATED RAFTERS and WOOD ROOF TRUSSES — such as displayed above — Rigidply Rafters offer a complete line of building materials that have given proven performance with all types of farm, utility and commercial buildings.

DEPENDABLE SERVICE on these and other materials at our East Linden Street location, Richland, PA

h the beginning of the new pasture season, coupled recent increases in milk prices and a decrease in feed most experts agree that the milk situation will be iful during coming months. In some areas there is talk omeless milk"--that is milk without a dependable et. One cooperative has encouraged dairy farmers to r additional production since they claim to have the et for it. Another preaches caution to avoid a collapse ices such as occurred a year ago. It is generally agreed the larger supplies of milk and a possibility for less umption will bring prices downard within the next few s. The newly adjusted floor level may be reached by May. Output per cow is up 25 pounds over last year otal U.S. production exceeds figures from last year by er cent. The chart at right shows some trends.

USED HARVESTORE 20' x 70'

LIKE NEW

This silo & unloader is only 1 year old. It will cost approximately $4,000 to take down, move & set back up on your farm. We want $20,000 for the silo & Goliath unloader. To buy one like it today would cost over $30,000. That leaves a savings of over $6,000, enough to buy the equipment necessary to fill the silo. We are also selling a Super 717 NH chopper with corn head & pick-up head $2850 and a Gehl chuck wagon with extra long body & double tandem running gear $2850. All like new. If you are putting up a Harvestore this year, don't pass up this opportunity.

CHECKLIST for buying a gutter cleaner

If you're now looking for a gutter cleaner, be sure it has all these important features:

☐ **One-piece chain link** with hook-and eye for heavy-duty 4 way flexibility
☐ **Angled flites** for added efficiency
☐ **Wear shoe** on each flite a full half inch thick for longer flite life
☐ **Flites welded to links** — fewer parts to corrode
☐ **Easy link removal** in 10 seconds — without tools
☐ **Removable corner wheel assemblies** to eliminate cement break-out
☐ **Flanged corner wheel** to guide chain and protect gutter floor
☐ **4 Tooth drive sprocket** reduces strain on reducer
☐ **Sprocket and roller chain reducer** for complete dependability
☐ **Flite cleaner** engineered to serve right and last long
☐ **Automatic chain tightener** works with full or part load.
☐ **Continuous duty motor** eliminates motor overheating.
☐ **Telescoping slide legs** for easy slide adjustment.
☐ **Chilled cast hold down shoe** for longer shoe life
☐ **Chain oiler** for lubrication and corrosion resistance

The only gutter cleaner which gives you ALL these vital features and more is the PATZ Gutter cleaner Designed by a farmer for farmers, this unit will provide years of labor-saving, trouble-free service

CALKINS
SEED CLEANER — GRADER — TREATER

This piece of equipment was built for permanent service by a well-known manufacturer. It has a large fan with an adjustable wind board. The sieves have many adjustments and the suction fan is larger than many. The precision powder feed apparatus (for seed-treating power) has 60 different settings and actually measures the powder onto the grain.

The receiving hopper is fed by an elevator with a floor-level loading hopper thus eliminating lifting and emptying heavy bags. There is a 2-way bagging spout. Capacity varies upwards from 50 bushels-hour.

We used this machine until a few years ago and believe that, with minor repairs and cleanup, it can be put back in service. Comes complete with original operating instructions and spare parts listings.

We ask for your BEST OFFER on an "as is" basis. A matched 220 Volt motor with proper sheave and belt is also available separately.

ELECTRONIC CROP STIMULATING SERVICE

Electrical storms improve crops. Seeds treated electronically quickens germination, great difference in cold weather. Improves stooling in alfalfa, small grains; grows much bigger roots, more good ears per stalk and up to 3 percent more protein; required less fertilizer, improves yields especially in adverse weather.

An Indianne treating machine will be at the Edgar M. Martin farm on April 6 and 7, maybe also longer, on Orlan Road, first farm direct west of Victor Weaver's Poultry Processing Plant which is just south of New Holland Sales Stables. You can bring seeds in ahead, pick up later. Make check to Dr. C. R. Corson when you bring seeds in. Distant customers who want to take seeds along home, get first privilege.

Rates are $10 per bu. corn, $15 for alfalfa, clover; $5 for oats, beans. We can mix in Agriserum, Lactobase and Basic H. at same time. Doc said it should be so much better.

Agriserum promotes bullions of fertilizer factories per acre - earthworms. They also make soil spongy for holding moisture. Lactobase helps you grow your own minerals cheaper, better, both soil minerals and feed minerals.

Basic H makes other liquids penetrate better like above products on seed. In sprays, it reduces need for chemical by 50 percent. Improves soil texture, makes nutrients available. All four for only about $5.00 an acre corn.

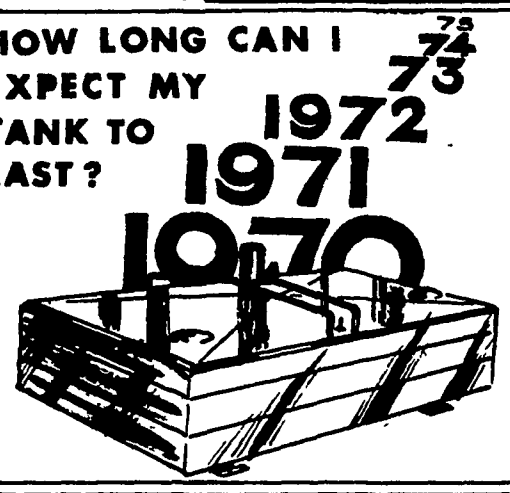
SO . . . YOU'RE GOING TO BUY A BULK MILK TANK ASK YOURSELF THESE VERY IMPORTANT QUESTIONS:

How much SPACE will I need

How LARGE a Farm Tank should I buy?

What kind of cooling system should I choose?

HOW LONG CAN I EXPECT MY TANK TO LAST?



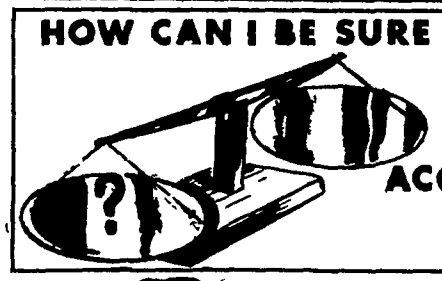
Is agitation important?

What shape TANK SHOULD I BUY?

Should I buy a..
VACUUM TANK OR...
ATMOSPHERIC TANK?

How FAST should my tank COOL?

HOW CAN I BE SURE MY TANK WILL MEASURE ACCURATELY?



Will I need Service?

ALL THESE QUESTIONS WILL BE ANSWERED AT C. B. HOOBER & SON

Very Good (86)

Production Qualified 5/74

The "Go" daughters are tall and strong. They are big framed cattle with strong front ends and good bone and substance. Udders are especially well attached in the rear with adequate support and proper teat size. His daughters have legs with correct set and proper depth of heel. Go already has many well proven paternal brothers in A. I. and a maternal brother with a high A. I. proof. There are many reasons to use Go today for a profitable tomorrow.

Meet your 'Agri-Answerman'

He's the Harvestore representative in your area . . .

Your local Harvestore representative is more than a salesman. He's a trained farm profit advisor who knows how to put the latest management practices to work on farms like yours.

He's been through an intensive training program to learn the latest in crop management . . . animal nutrition . . . farmstead planning . . . agricultural finance and other key farm management areas. Add to all that his special knowledge of crop and livestock conditions in your area and you can see why he's a good man to know.

Your Harvestore man is no theoretical dreamer . . . the information he'll give you is based on the experiences of thousands of successful Harvestore farmers around the world. And, backing him up is the world's largest manufacturer of feed processing and automation equipment . . . with more than a quarter century of helping farmers boost profits.

Why not call your Harvestore representative today to arrange a no-obligation farm profit conference? Show him where you stand in relation to your immediate and long-range goals. He'll use this information to prepare an analysis of your farm's potential . . . show you alternatives that can put more money in your pocket.

He'll be glad to answer your questions about the advantages of Harvestore farming. He can explain how other farmers have used Harvestores to boost profits. If you like, he'll take you on a personal tour of farms like your own where the Harvestore system is in use.

He's thoroughly trained in farmstead planning, too. He can show you how to put together the most efficient Harvestore system for your farm . . . help you design an automated feeding center . . . offer nutritional advice . . . and even help you with financial planning.

Call your Harvestore dealer today to arrange for a visit from your very own "Agri-Answerman." He'll be glad to stop by for a free, confidential conference about the profit potential of your farm.

Your Harvestore Representative—He's dedicated to serving you.

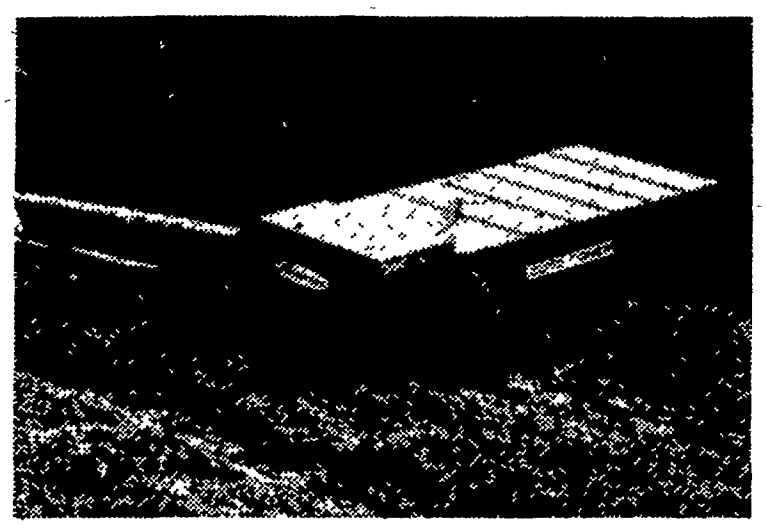
New Idea's NEW "Hay Things"



Makes hay that cattle like better

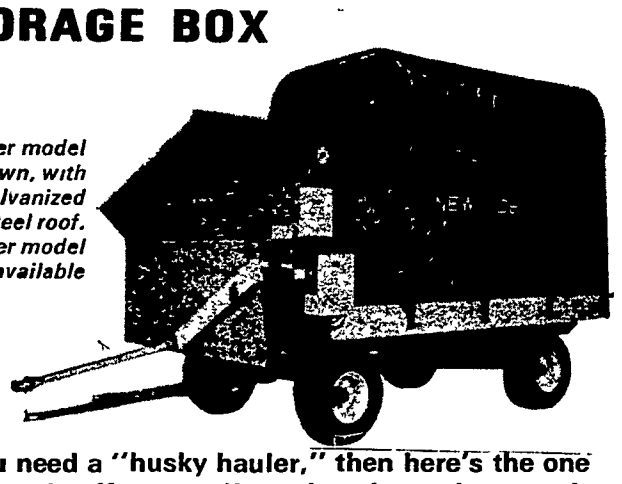
Introducing New Idea's advanced 7-foot Cut/ditioner—a field-proven machine that makes quality hay in rank, heavy first cutting, or thinner later cuttings. It cuts cleanly and conditions gently. Makes soft, palatable hay with rich, protein-filled leaves and tender tops that cattle prefer. Won't plug—even in long, rank and down hay.

This new "Hay Thing" can also be used as a tedder or to turn windrows. And it does a lot of other jobs, such as clipping, cutting and shredding.

All this, plus low first cost and trouble-free operation. New Idea's advanced Cut/ditioner — the new "Hay Thing."

Winning Team!

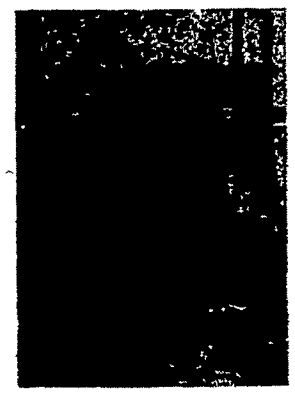
RUGGED, 14-FOOT FORAGE BOX



3-beater model shown, with galvanized steel roof. 2-beater model also available

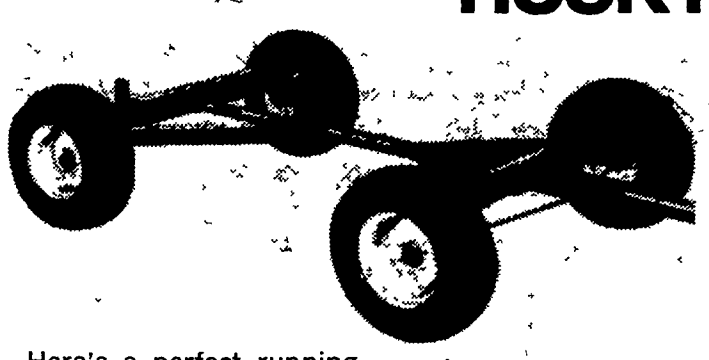
If you need a "husky hauler," then here's the one for you. It offers an all steel undercarriage, variable speed conveyor drive, steel detachable chain cross conveyor, 4-bar beaters with staggered teeth, plus a whole host of quality features—all economically priced so you can afford the best.

HIGH CAPACITY FORAGE BLOWER



Deal your forage handling problems a real blow with this high-capacity forage blower. Handles silage, haylage or grain to the top of the highest silos at rates of up to 100 tons an hour. Six big 54-inch fan blades smoothly discharge the material at a speed of more than 125 feet a second.

HUSKY HAULERS



Here's a perfect running mate for forage boxes with capacities of up to 20,000 lbs. maximum. You'll find these rugged Avco New Idea wagons will handle your toughest hauling jobs season after season.

There's a difference in wagons just as there is in other equipment like corn pickers, manure spreaders and haytools. Some are more dependable and last longer than others. That's where Avco New Idea wagons stand out. Choose from two wagons built to shrug off the stresses and strains of big loads—the extra heavy duty model has a gross load capacity of 20,000 lbs., while the heavy duty model handles a gross load of 14,000 lbs. Or if you're in the market for a wagon for general purpose hauling, the New Idea utility model is an ideal choice.

Homestead Notes

Gardening tools ease spring planting task

By Susan Kauffman
Feature Writer

Perhaps these recent sunny, warm days have lured you outside to start working in your garden - be it a small patch of ground in the corner of your suburban backyard or the huge odd-shaped section taken out of your husband's corn field.

After surveying the width and breadth of your future flourishing vegetable plot, you probably decided to round-up the tools and get to work preparing the soil. If you have a tractor and plow available the hard work of turning over the soil will be easy. However, if you have a small plot then you'll need to find a good dirt shovel or a garden tiller.

Whether you misplaced your tools at the end of last year's harvest season or are starting a garden for the first time, you will eventually need to go to a hardware store to buy some garden equipment. J. B. Zimmerman and Sons, Strasburg, has been in the business of supplying garden tools as well as other hardware merchandise for many years. A visit to their store one warm day this week resulted in gathering some information about the basic tools available for home gardeners.

Leroy Beiler, salesperson and buyer for the garden department at Zimmerman's listed the basic garden tools as the dirt shovel, the garden rake, a hoe or cultivator and a hand trowel for transplanting. A round-pointed shovel is best for soil preparation rather than a spade with square or sharp corners used more for scraping than digging.

There are a number of tools to choose from for cultivating or killing the weeds as they come through the ground. Whatever tool you select you should use it on the weeds as soon as they appear. If you wait until they are big then you will have to pull them by hand - a time consuming, back-breaking, dirty job - which will loosen the soil from the roots of the vegetable plants. Once the weeds have reached that height they will be taking nourishment and moisture from the soil around the vegetables and reduce their productivity if not choke them out completely.

One type of cultivator is the garden rake. The prongs will scratch the surface of the soil an inch or two deep - enough to dislodge the small roots on the weeds which have not grown very big yet.

Another variety of cultivating tool is the hoe. There are two basic types of hoes, the draw hoe which has a four or five inch deep blade and the square-top hoe or onion hoe which has a blade only three inches deep. Both types work well for weed control. Many people prefer one type over another as a personal preference.

A newer item on the market for hand cultivating is called the weeder-hoe by one manufacturer of garden tools. It looks like a small, light-weight pick-axe with a digging blade on one side and two widely spaced thick prongs on the other side. In theory, the two-pronged side will straddle the very small plants and cultivate both sides of the row at once. The wider blade would be used to cultivate the open space in between the rows.

A fourth type of hand cultivating tool is the cultivator or cultivator rake. This rake may consist of from three to five long bent prongs spaced so that they cover all the area within the width of the outside prongs when the gardener draws and pushes the cultivator back and forth in the soil.

An old-time implement being revived after going out of popular demand for a number of years is the wheel cultivator, also known locally as the wheel hoe or wheel harrow. The same three to five prong device on the hand cultivator is attached behind a large wheel several feet in diameter. Two long handles attached behind the cultivator prongs reach up to a comfortable height for the gardener to push the wheel and cultivators through the soil. These wheel cultivators come with a number of attachments which can be used to dig furroughs or bank plants with extra soil such as potatoes which need to have additional soil pulled up over the tubers as they break through the surface of the soil.

One reason for the new-found popularity of the wheel-cultivator is the great number of small plots being tilled in recent years, according to Mr. Beiler. "Plots as small as 10 feet by 10 feet or even 20 feet often do not warrant the expense of a motor-driven garden tiller", says Beiler. These tillers, often identified by a brand name such as Roto-tiller, are in great demand in larger garden plots. These motor-driven tillers come in a variety of sizes with the most popular being the three or five horse power models. They cost considerably more than hand tools but save a lot of energy for the gardener.

Another piece of garden equipment which may be handy in your garden is the potato fork which usually has a shorter handle and wider prongs than a barn fork. The extra strength and width is needed in the prongs to loosen packed soil and "strain" out the potatoes or carrots being harvested.

A rubber or vinyl reinforced hose and sprinkler-soaker hose or sprinkler would also be useful during severe drought conditions. A sprinkler-soaker hose has a white line on one side which shows the area of the irrigating holes. The hose can be placed so that the holes face straight up into the air for sprinkling or straight down into the ground for soaking. Careless watering techniques can result in shallow root systems, "burned" foliage scorched by the sun shining on wet leaves when the temperatures are high, decrease in pollination of flowering stages and many other problems. Except for severe drought conditions, during transplanting, or with proper care taken, the home gardener is probably better off not trying to irrigate.

What will replacing these lost of broken items or buying them for your first gardening venture cost? These are average prices quoted at retail value. A hand trowel will cost $1.50; a hoe - $5.00; a rake - $7.00; a two-pronged cultivator - $3.00; a fork - $5.00; a shovel - $7.00; a three-horse-power tiller - $200.00; a five-horse-power tiller - $240.00; a 60 foot vinyl garden hose - $9.00; a 60 foot rubber hose - $12.00; a 50 foot sprinkler-soaker hose - $4.95; and a wheel cultivator - $30.00.

Showing the basic garden implements are Leroy Beiler and Marianne Zimmerman.

Marianne Zimmerman displays an onion hoe (lower tool) popular for many gardeners. A new two prong hoe or weeder has also been a favorite choice.

The tools you select will depend on the size of your garden and your estimation of your own energy resources. Don't let the weeds get ahead of you and happy gardening!

Country Corner

Gardens move around the farm

By MELISSA PIPER

Walking along the gravel road, I shifted the garden hoe to a new position over my shoulder and trudged forward toward the farm house. It was nearly noon and I was hungry after working for several hours - tugging at weeds and pulling the hoe through the thick soil. Ever since Dad had moved our garden plot to the top of the hill, about one-half mile from the house, it had meant a little more walking and a lot more work.

Since I could remember, our garden had been in three separate areas around the farm and through building expansions and to avoid pest problems they were moved and rearranged.

Before new hog barns took up the area behind our old bank barn, the garden was annually planted on a flat strip of land bordered by a hillside, thick with raspberry bushes. On many a summer evening, my sister Debbie and I would take baskets along to the field and pick berries while our parents worked in the garden till dusk.

And then for convenience, the garden took its place near the house. But this area had its good and bad points as it was great for having the vegetables right at our hands but a glance from the living room window also reminded us that a little more hoeing was necessary and soon!

With more vegetables to grow and room for sweet corn needed, Dad selected the wide plot at the top of our hill. Although walking back and forth always seemed a little too inconvenient, the spot was almost perfect for supporting the garden bounty. Surrounded by fields of growing crops, the smell of clover and ripening grain was refreshing. And when we grew tired of working, a walk to the road loosened stiff muscles and aching hands.

Perhaps the most enjoyable advantage of the big garden area was the scenery which surrounded it. From the crest of the hill we could see a small white church tucked against the green and purple hills. Even four miles away, the steeple of the structure shown brightly against the horizon. The countryside often took on the dimensions of a patchwork quilt and it rolled down the hill and up over the next and on a quiet summer evening it was a pleasure to see its rich colors and undulating shapes.

The garden has been in that same spot for several years now and we have carried baskets of tomatoes, potatoes, beans, corn, peas, peppers and onions down the hill to the farm house. For all the hard work, the rewards never seem small and the pleasures of a country setting are remembered long after harvest.

Home on the Range

Want to try an older recipe that was a favorite about 70 years ago? Well this week one of our regular contributers, Mrs. Harriet Greenawalt, sent in a recipe for the Classic Sour Cream Raisin Pie. Although not quite a bicentennial dish, the pie was a favorite for many generations.

And to fill our request for spiced cantaloupe, Mary Hoover provided us with a recipe for the cold pack method.

We will be taking recipes for our Easter Special up until April 7 so please send in your favorite today.

Have a nice week!

Classic Sour Cream Raisin Pie

1 unbaked 8 inch pie shell
2 large eggs
1 cup dairy sour cream
¾ cups sugar
1 teaspoon vanilla
¼ teaspoon salt
¼ teaspoon nutmeg
1 cup raisins
½ cup sour cream for topping

Prepare pie shell. Beat eggs, 1 cup sour cream, sugar, vanilla, salt and nutmeg. Blend well. Stir in raisins and pour into pastry shell. Bake at 375 degrees for 40 minutes or until set. Cool and top with sour cream.

Mrs. Harriet Greenawalt
Lancaster, Pa.

xxx

Chocolate Roll

Sift together:
6 tablespoons flour
6 tablespoons cocoa
½ teaspoon baking powder
¼ teaspoon salt

Beat 4 egg whites until stiff and add: ¾ cups sifted sugar, 4 beaten egg yolks and 1 teaspoon vanilla.

Sift dry ingredients slowly into the egg-sugar mixture. Blend thoroughly.

Line a shallow 9 x 12 pan with waxed paper and pour batter into it for ¼ inch.

Bake at 400 degrees for 15 minutes. Remove from pan and turn out on a damp cloth sprinkled with powdered sugar. Trim hard edges and spread with the following filling:

Filling:
1 egg white
1 cup sugar
3 tablespoons cold water
1 teaspoon cream of tarter

Mix together and cook in double boiler over rapidly boiling water. Beat mixture with rotary beater until it stands in beak. Remove from heat and add one cup of shredded coconut. Roll as jelly roll.

Margaret Horst
Mt. Pleasant Mills

xxx

Calico Ham

Cook and drain:
4 packages frozen mixed vegetables
Saute or toast:
3 cups bread crumbs
Dice:
3-4 cups cooked ham

Make white sauce combining ¾ cup milk; 1 cup flour, 1 teaspoon salt 6 cups milk, 1 tablespoon mustard and ½ cup grated cheese. Mix together and place in baking dish. Store in refrigerator 12-24 hours and top with crushed potato chips. Bake 40-50 minutes 350 degrees.

Mrs. Leon Musser
Manheim, Pa.

xxx

Spiced Cantaloupes

Peel and slice cantaloupes for one quart. Sprinkle with a little salt and let set overnight.

Make a sauce of the following and boil till soft.
4 tablespoons vinegar
¾ cup sugar
½ cup water
few drops oil of cloves
few drops oil of cinnamon

Cold pack for 30 minutes in jars.

Mary Hoover
Stevens, Pa.

xxx

Plain Baked Omelet

3 tablespoons butter
3 tablespoons flour
1 cup milk
1 teaspoon salt
½ teaspoon pepper
4 eggs

Cook butter, flour and milk together to make a white sauce. Cool sauce then add beaten egg yolks and seasoning. Add stiffly beaten egg whites. Pour into a greased baking dish or casserole. Bake at 350 degrees for 35 minutes. Serves 4.

Mary Hoover
Stevens, Pa.

xxx

Choclate Chip Oatmeal Cookies

2 cups shortening
2 cups brown sugar
2 cups granulated sugar
4 eggs
4 tablespoons water
2 teaspoons vanilla
3 cups flour
2 teaspoons soda
2 teaspoons salt
4 cups semi-sweet chocolate bits
1 cup chopped nuts
6 cups oatmeal

Cream shortening, add sugar gradually. Cream well beaten eggs until fluffy stir in water and vanilla. Add flour, soda and salt into creamed mixture. Add oatmeal, chocolate chips and chopped nuts. Bake at 375 degrees for 12 minutes.

Linda Rutt
Mt. Joy, Pa.

xxx

Oatmeal Cereal

10 cups oatmeal
2 cups brown sugar
2 cups wheat germ
1 cup butter
½ cup molasses

Add raisins, nuts or coconut if desired. Bake at low heat until brown stirring frequently.

Sadie Mae Glick
Gap, Pa.

Farm wife's recipe published in cookbook

By MELISSA PIPER

ELM — For many farm women cooking hearty meals has become a way of life and such is true for Mrs. Kenneth (Faye) Stoner, Lexington Rd., here; but the young farm wife has also used her imagination and talent in the kitchen to make dinner just a little more interesting.

One vegetable dish - corn fritters - has become a "house speciality" and Faye's version of the popular Pa. Dutch tradition will soon gain nationwide recognition as the recipe was selected for publication in a forthcoming cookbook entitled "Vegetable Bounty." To be published by the magazine "Farm Wife News" the cookbook is a collection of vegetable recipes from nearly 100 farm women all across the United States.

Cooking for her husband, a dairy farmer near Lititz, and three small boys keeps Faye busy in the kitchen and the farm wife admits that she enjoys preparing meals and also collecting recipes.

"Collecting different recipes is a hobby with me," Faye explained. "I like to pass favorites on to other people and search for new ones also."

As is the schedule for many farm families, the Stoners have their main meal at noontime which means that Faye's mornings are often centered in the kitchen.

Although cooking is time consuming, Faye's three sons Kenneth Jr. - age six; Darvin - age five and Dean - age one and one-half; require a lot of attention also. And when a free moment is in sight for the farm wife, Faye likes to sew. Accomplished at the task, Faye makes most of her family's clothing, including outfits for her husband.

Another hobby which gets attention from Faye is crafts and her work is evident throughout the house in the form of centerpieces and arrangements.

Both Faye and her husband Kenneth, are active members of Erb's Mennonite Church and participate in many functions for the Manheim Christian Day School also.

The Stoners are not new to farming as both of them grew up on production acreages. Faye, the daughter of Mr. and Mrs. Elmer Hoover, Leola R1, was accustomed to the many chores on a general farm while Kenneth worked on a dairy operation. Kenneth is presently in partnership with his father, Roy B. Stoner and together they milk about 75 Holsteins.

Faye's recipe for corn fritters follows. The farm wife noted that her "special recipe" makes the fritters more fluffy and light than older variations of the same dish. "They are a real family treat," Faye explained and perhaps in weeks to come they will also be appearing in other kitchens across the country as a new family treat from the "Dutch Country."

Corn Fritters

1 - 16-ounce can of whole kernel corn, drained
salad oil
1 cup flour
1 teaspoon baking powder
¾ teaspoon salt
2 eggs
¼ cup milk
maple syrup or powdered sugar

About 30 minutes before serving, heat ½ inch salad oil in skillet. Stir one tablespoon salad oil into corn, flour, baking powder, salt, eggs and milk. Mix with fork until blended. Drop into hot oil and fry 3-5 minutes turning until brown. Drain on paper towels and sprinkle with powdered sugar or serve with surup.

Mrs. Kenneth Stoner enjoys cooking and sharing recipes with her neighbors and friends. The Elm farm wife will have a recipe for corn fritters printed in a cook book later this month.

BETTER 'N BEN'S — THE FIREPLACE STOVE

Better 'n Ben's is the most exciting and innovative breakthrough in woodburning stoves since the Franklin. Uniquely, but simply designed, Better 'n Ben's is placed directly in front of the fireplace opening. The combined stove and fireplace cover panel is securely and safely fastened in minutes so the stove utilizes the existing fireplace flue. It will burn seasoned wood throughout the night.

Homeowner reports on this new stove cite up to 60% savings in fuel oil costs and the kilowatt consumption in electrically heated homes cut more than half.

Better 'n Ben's is attractive in your home and is made of sturdy, long-life heavy black iron that radiates heat well. It has a broad top to provide a large cooking surface Fully guaranteed.

Textile making is bicentennial art

By SALLY BAIR
Feature Writer

Getting a new dress today usually involves little more than a trip to the store to purchase the dress itself or the fabric to be made into the garment. The hard part is either saving the money for the new dress or finding the time to sew the fabric.

Those hardships are minor, however, compared to the length of time involved in acquiring new clothes in the Pennsylvania German culture of this area during the 18th and 19th centuries.

The process could take over a year, since it literally began with raising your own flax or sheep. Alan Keyser and Ellen Gehret, both Montgomery county residents, presented a program on the homespun textile tradition of the Pennsylvania Germans as part of the annual antique lecture series at the Landis Valley Farm Museum. Their presentation coincided with the opening of a special textile exhibit at the museum which will continue through 1976.

Keyser and Mrs. Gehret spent several years researching early textiles and revealed some interesting facts about their use in farm families.

Homespun textiles included such prized belongings as needlework pictures, decorated hand towels and coverlets, but also included such mundane items as fishnets, pigeon nets and fly netting for horses.

Mrs. Gehret said that the Pennsylvania Dutch farmer wore a three-piece outfit, consisting of shirt, breeches and waistcoat, and his wife wore a 2-piece dress. The cut and style remained the same, only the fabric changed.

She said that the table in early German homes was covered by a linen tablecloth, usually white or unbleached, but never checked. Checked fabrics were reserved for bed linens, she said. The table adornments would have been hemmed or fringed, and would have represented the very finest in spinning and weaving.

Needlework pictures, usually square and decorative did not come into common use until the 19th century. Samplers, which are so often thought of as decorative, were

A bolt of woolen fabric remaining from the 18th century and a dish cloth which would have been used in the home.

really utilitarian Mrs. Gehret said. A sampler included motives, numerals and alphabets which were used as a guide for other work, and they were usually done in cross-stitch. They were stored in drawers, and never displayed.

A decorated hand towel often hung on the bedroom door and is the one textile which was not used except as a decoration. This idea was popular around the 1830's, she said.

A bed in those days required a substantial cash outlay and usually belonged to the woman. They were frequently dressed in blue and white or brown and white, and Mrs. Gehret said it was not uncommon for the Pennsylvania Germans to sleep under a 19 pound featherbed. The bed sheets were usually white.

Coverlets, which are so prized now, began showing up in inventories after 1770 with great regularity, Keyser said. There are several types of coverlets, the most common being the "plain weave" coverlet which was woven by "almost anyone."

There is also the "overshot" weave, and a "summer and winter" weave. Keyser said the latter is often thought of as being of Lancaster County - Mennonite origin, but in reality it came from New York or New England.

There was also the "twill" coverlet, and the "double cloth" coverlet, which Keyser described as being the "ultimate." He said it was "warm and heavy and would press you flat."

According to Keyser, the fabric of coverlets was usually wool for warmth, or linen for durability, or cotton. All three might have been used together, or they were used singly.

The grain bag was also a homespun textile of some importance. Those with markings were used at the mill, and the plain ones stayed at home.

Housewives who raised their own seed needed bags to store them in, and 3-5 inch square ones were provided for that. There was also the "wallet" which was the shape and size of a grain bag, but was open in the middle. This was hung over the shoulder, half the load in front and half in back, or was used as a saddle bag.

One textile which is now almost nonexistent is the wagon cover. These were three loom widths wide and were the largest piece of homespun made.

Getting the fabric to make all of these textiles involved many steps. Mrs. Gehret said it was "a cooperative effort of men, women and children," and stressed that equipment used in the manufacture of textiles must include the plow, the rake and the flail just as much as the spinning and wool wheels. She said, "Every tool was important and was treated with respect and repair."

The processing of flax, she said, was the longest process requiring the most tools, and could take from one year to one and one half years. Wool processing began in the spring with the shearing of the sheep.

About one fifth of the Pennsylvania Germans adopted the "cotton culture," Mrs. Gehret said. Cotton would be bought raw from the south and used in feather ticking, and curtains, and a hand powered cotton wheel would be used in the processing.

Hemp was another product used in producing textiles. It was not only twisted into rope, but could also be woven into yarns. The processing was much the same as for flax, Mrs. Gehret said, and "it was a good cash crop."

After the processing at home, the weaver and the farm wife decided how things were to be woven. Mrs. Gehret explained that there was a special system of measurement used in the weaving business, with a "cut" being the basic unit of measure. A "cut" was about 300 yards of yarn, and one skein was six cuts of yarn.

The local weaver might have knit linen and woolen stockings, but the farm wife would make the other textiles used in the home.

Keyser explained that weavers were professionals who wove the yarn supplied by the housewife. Most were commission weavers, who charged a set fee per yard of finished fabric. Coverlet weavers came later.

To become a weaver, a young man spent 1½ to 2 years' apprenticeship then became a journeyman weaver and than a master weaver. But, Keyser said emphatically, "Not everyone was a good weaver." In all his research he found just three women professionals in this area of Pennsylvania, and they were all daughters of weavers. It was customary for the father to teach his son the trade, and if there were no sons he may have found it necessary to teach a daughter.

Yarns which would be used in striped or plaid designs needed to be bleached, and this was the final process which could be done at home in most cases.

A bucking tub was used in this process, and the yarn was stacked in with a bucking cloth placed on top. This bucking cloth was a tightly woven stout fabric used as a filter, Keyser said. Wood ashes were added on top of the cloth and boiling water was poured over them to dissolve the potash and alkali from the ashes.

The water would be drawn off, and heated again and again. Keyser said, "It would take about a day."

Dyeing of the yarn was usually done by a "custom dyer." According to Keyser, there were more weavers than dyers, with about one dyer to three townships compared with 25-30 weavers.

Keyser said that most substances were not brilliant and were not durable. The primary dyestuff was black oak bark, which provided yellow. Indigo, imported, produced blue, and Keyser said that Spanish indigo was considered quality. Bengal indigo was the best, he said, but not often used. An inferior indigo could be obtained from Louisiana and North and South Carolina, but it would only be used for cheap cottons.

Alan Keyser and Ellen Gehret speak to members of the audience about their research into homespun textiles.

Linen stampers were among the most talented of the dyers, Keyser said. They printed "resist" patterns on linen. To make the pattern they used a wooden stamp which had a relief and cutaway area. This was dipped in gum arabic, white pipe clay and tallow which was then stamped on the fabric. The linen would be dipped in indigo and dried, and would have a blue background with an intricate pattern. This particular type of dyeing was not done after 1805, Keyser said, so it is strictly an eighteenth century work. He also said it is a continuation of a German tradition known as "Blaudruck."

The exhibit at the museum, compiled by Keyser and Mrs. Gehret, contains some examples of very early textiles. There is a fully dressed rope bed in the style of the Pennsylvania Germans and a "Schrank" filled from top to bottom with examples of family clothing, blankets, coverlets and other household textiles.

The textiles on display there offer insight into the fabrics and designs which would have been prominently used in Pennsylvania German homes in this area.

Society 6

Society of Farm Women 6 met recently at the home of Mrs. Fran Greiner. Mrs. Lucille Buckwalter was the co-hostess. Mrs. John Cassel led the group in devotions.

William M. Musser was the speaker for the program and spoke on jogging as exercise.

The group voted to support Goodwill Industries for the county project.

The next meeting will be held at Irma Esbenshade's - the group will go Easter Caroling at the Neffsville Home.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

Make Housecleaning Easier

Following the arrival of song birds and seed catalogs comes spring housecleaning. Despite all the helpful hints you can exchange with others on "how" to clean," ordinary housework still may be frustrating. Often, it may seem you can never make any progress. I would like to offer these suggestions.

One of the first things to realize is that you may be setting impossible goals as to how clean your living area should be. You may think family members expect a house to be immaculately clean, when in reality, they would be satisfied with much less. Find out just how much cleanliness is really important to you and your family.

To avoid some of the frustration, develop a cleaning cycle. Once a week, clean the house lightly and clean one room thoroughly on a rotating basis. This way, the house will stay clean without a great deal of work each week.

Consider your furnishings, too. Do they suit your family's activities or do they work against you? For instance, a velvet couch or white carpeting may be a poor choice because of the upkeep needed - in a household with active growing children. Try to simplify furnishings to match your family's lifestyle.

Then to help relieve overwork or feelings of tension, give other family members household tasks which need to be done. This participation is important, especially for children. It will help them develop a feeling of responsibility early in life.

The Metric Kitchen Of The Future

A few of the things you can expect in tomorrow's "metric" home are already here. For example, skiis are sold in centimeter sizes, width of photographic film is expressed in millimeters, pharmaceuticals are manufactured by metric measurements, metric scales are appearing in bleach dispensers of some washing machines, and metric figures are being used in microwave oven cookbooks, and in some home freezer use and care manuals.

But the kitchen of the future will have even more metric measurements, according to one industry spokesman. It's expected that the capacity of refrigerators and freezers will be measured in liters, as opposed to the cubic feet measurements now used. And because foods you store in the refrigerator or freezer, such as milk or ice cream, will also be measured in liters, it will be easier to determine the capacity of such units.

Square feet of shelf area will be changed to square meters, physical dimensions will be given in centimeters instead of inches, and weight in kilograms, not pounds.

Initially, the size of appliances probably won't change. However, to overcome difficulties with odd metric amounts designers may in time, shift to easier dimensions.

Society 3

The Society of Farm Women Group 3 held its monthly meeting at the home of Mrs. Harvey Moyer, Boyertown R4.

During the business meeting the following plans were made: April 6th - the 10th Anniversary Party by Group 6 at Fleetwood Grange; April 8th - Bingo Party for guests at Berks Heim; May 12th - Spring Rally of State Organization at Gettsbury.

The guest speaker, Mrs. Fred Brumbach, coordinator of School Nutrition for the Hamburg School District, gave a very enlightening talk on proper diet aand nutrients essential for good health.

The next meeting will be a youth program at the home of Mrs. Richard Loeb at 7:30 p.m.

Doctor in the Kitchen®

by Laurence M. Hursh, M.D.
Consultant, National Dairy Council

THE FAT-SOLUBLE VITAMINS

Vitamin A, the first of the fat-soluble vitamins, is best known for its prevention of night blindness But it's also important in maintaining your skin and mucous membranes Without enough vitamin A, the moistness and pliability of your eyelids would dry up Dry, rough, itching skin could also result

PROOF OF vitamin A's importance was dramatically demonstrated in Denmark during World War II Because of extreme shortages of this vitamin over a long period of time, Danish children developed an eye disease called xerophthalmia They had been getting only skim milk Many lost their eyesight

When whole milk was restored to the diets of Danish children, the disease was brought under control The factor needed was the vitamin A in milk fat and butter

And what does vitamin D do for us?

ALL OF our bone structures must have a proper balance of calcium and phosphorus if they are to grow and maintain themselves Vitamin D assists in getting calcium and phosphorus from the intestinal tract into the blood ant then it again sees to it that calcium and phosphorus are deposited in bone where they are needed If this process fails, for lack of vitamin D, bones do not calcify In the young, such disease is known as rickets In older persons, osteoporosis, a bone-softening process, results from lack of vitamin D and of foods such as milk, rich in calcium and phosphorus

Because milk is our major source of calcium, nutritionists long ago recommended that milk be fortified with vitamin D Today, most milk is Read the label

It's true that sunshine striking our skin triggers the production of vitamin D in our bodies but with variations in weather, especially in winter, this source is not evenly reliable

A WORD of warning Vitamin D can be toxic So don't go dosing yourself with vitamin D pill supplements Infants and adults need 400 I U 's (International Units) of vitamin D daily That's the amount in a quart of vitamin D milk

And what of vitamins E and K?

Vitamin E unites with oxygen to help prevent blood cell ruptures caused by oxidizing agents such as the peroxides in unsaturated fatty acids The daily need for vitamin E may be related to how much polyunsaturated fats you consume

Vitamin K is essential for normal blood coagulation, and recent research has shed light on how it assists in blood clotting We get vitamin K in our food and it is also synthesized by the bacteria in our intestinal tract

Society 4

The March meeting of Farm Women Society 4 was held recently at the United Methodist Church in Ironville.

A luncheon was served to 17 members of Society 22 and to the county offices who were present. Representing the county board were Mrs. Robert Gregory, Mrs. Harry Hershey, Jr., and Mrs. Charles Rohrer.

Mrs. Maud Mother read a Psalms and a poem about the pussy willows. Mrs. Henry Reist then conducted the business meeting.

Reservations are now being taken for the guest night to be held at Hostetter's Banquet Hall in Mt. Joy. The program committee must have the reservations by April 17.

The May meeting will be held on the 15th at the Landisville Church of God. Each person is to bring their favorite doll.

Speaker for the program was Mrs. Earl Kauffman a collector of music boxes. The Camp Hill resident presented a poem concerning her collection and described the 40 items she had brought.

Meal Planning Important

Regular meal planning provides an opportunity to serve meals that have flavor interest, variety in color, and texture contract. When planning menus, Extension foods and nutrition specialists at The Pennsylvania State University, suggest considering the dinner meat first, then build around the main dish for lunch. Fit in the dinner and luncheon vegetables and salads. Next, plan breakfasts and then decide on desserts.

Ida's Notebook

Ida Risser

Spring is such a busy season. During the children's school vacation, we kept them quite busy and other people helped too. I ask Cindy to wash windows for me and Philip plowed and disced for his father.

The problem was that other folks needed baby sitters and our youngsters are anxious for the work. However, sometimes no specific child is asked for and such a discussion follows until a decision is made as to whose turn it is next. Sometimes, they really earn their money as two families will put their children together. And then again it might be a breeze with only one small child to care for.

In my youth, baby sitting was a phenomena. And only a few times, as executives from large companies moved into Manheim Township, was I given the opportunity to sit up half the night in order to earn a little much desired money.

xxx

Last week I mentioned deteriorating window frames in our old house. Recently, I learned that an "Old-House Journal" is published each month. It is rather expensive but is crammed with ideas, techniques and sources to help you put an old house on it's feet.

It will help solve problems like inadequate wiring, crumbling masonry, leaky plumbing, cracking plaster and an out-of-date kitchen. Speaking of kitchens - when I came home from the dentist the other day, I was told that three Amish ladies had inspected my kitchen while I was away. I wasn't sure if I felt flattered or shocked.

We did build a new, large kitchen, which includes a restored walk-in fireplace and bake oven last year, but is it such a curiosity? We have gained some pleasure from being able to show it to visitors and friends.

Society 27

Society of Farm Women 27 met March 29 at the home of Mrs. Robert F. Shearer for a Hobby Day. Co-Hostesses were Mrs. Glenn R. Shenk and Mrs. Herbert B. Frey.

A macrame workshop was held with Mrs. Floyd Kreider instructor for hanging baskets, and Mrs. Sue Heineman table covers and wall hangings. Other ladies brought their own hobbies and worked on those.

Twenty-six members and seven guests enjoyed the day. Sixteen ladies were pleased to take home a completed basket hanging.

After lunch and business meeting a silent auction was held selling the baked goods, canned foods, plants, and other craft items that were given. Ways and Means chairlady Mrs. Galen Benner was in charge.

Our next meeting will be April 27, a Work Project meeting at the home of Mrs. Lester Good.

Berks Co. Society 8

Society of Farm Women 8 of Berks County recently met in Strausstown at the home of Darlene Yost. Twelve members were present.

Viola Yost, chairlady of the ways and means committee reported that a ham-on-roll sale is scheduled for May 1 and all orders must be in by April 24. The cost per sandwich will be $1.10.

Members were also reminded to collect objects and clothing for a rummage sale to be staged on May 26 at the Leesport Auction.

Shirley Stickler president reminded the members of several upcoming dates. April 6 will be the Society 6 entertainment night in Oley with April 8 being a bingo night at the Berks Heim. On May 12 the Scoring Rally will be staged with the Berks Heim Team slated for the same day.

Special events chairman, Laverne Balthauser reported that plans for a night of entertainment to be held on May 7 are progressing well.

The next meeting will be held on April 27 at the residence of Laverne Balthaser.

Society 28

Farm Women Society 28 met recently for a craft night at the home of Mrs. Roy Book in Ronks. Mrs. Geroge Eckman served as co-hostess.

Twenty-two members responded to roll call by showing a craft they made recently.

Members were reminded of the upcoming spring trip to the "Three Little Bakers" dinner theater near Kennett Square to be taken in May.

Mrs. Paul Hirst was the guest speaker for the evening and helped each member make a macrame hanging basket.

The next meeting will be held April 22 at the home of Mrs. James Bowman in Ronks. Each member is asked to bring a plant to sell. Jack Matthews will be speaking on plant care.

Empty Pockets Before Laundering

Before laundering family garments, take time to check and empty pockets. Extension specialists at The Pennsylvania State University point out that while some pocket treasures are harmless in the washing machine, others can cause damage. Items that can damage both machine and garments include paper, sharp-edge objects and crayons.

Society 14

Farm Women Society 14 met recently at the Farm and Home Center. Members from Society 1 were guests this month. Each member present responded to roll call by describing the exterior of her house and date built.

During the business meeting a sale at Paul Newswanger's netting about $300.00 was reported, - $20.00 was donated to Easter Seals. On April 9, our group will have a food sale in the Strasburg Bank. Members will be helping with the Heart Screening Day on April 10. The Spring Rally of Farm Women will be held on May 12 at Gettysburg.

Mrs. Charles Rohrer sang several meaningful spiritual songs as Mrs. Don Landis accompanyed her on the piano. Fay Stoner an International Foreign Youth Exchange delegate spoke about her stay in Germany and showed her colorful slides.

The hostess included Mrs. John Hershey, Mrs. Ira Herr, Mrs. Merle Clark, Mrs. Ira Kreider and Mrs. Paul Longenecker.

The next regular meeting will be held at the home of Mrs. Melvin Stoltzfus, 52 Glendale Dr. on April 14 at 1:30 p.m. The program will be Polly's Hobbies.

Society 11

Farm Women Society 11 met at 1:30 on March 25, at the home of Mrs. Margaret Swarr, with Mrs. Catharine Mathias and Mrs. Adaline Edwards as co-hostesses.

Mrs. Violet Eshleman, President, was in charge.

Devotions were in charge of Mrs. Mathias who read John, Chapter 14.

In the business session the Sunshine committee reported cards sent and visits. We noted with regret the death of fellow-member Mrs. Clara DeLong. Gift in her memory was given to the St. Paul's Reformed United Church of Christ Memorial Fund. Resolution of respect in her memory was approved.

Report of the Executive meeting was given by President. Of the three county projects suggested, our society voted to prefer the Good Will Industries.

Request was made for volunteers to act as hostesses at the Robert Fulton birthplace this summer.

It was agreed to participate in the Craft Fair being sponsored by the Quarryville Women's Club in the month of May.

The program committee presented Miss Faye Stoner who was a 4-H Exchange Student to Germany last year. Her report of her experiences, with many excellent slide pictures showing the homes and farms of the families with whom she stayed, was most fascinating.

After a small auction, the hostesses served delicious refreshments.

April meeting will be at the home of Mrs. Herman Shirk, on April 29.

Penn Willow 4-H to reorganize

The Penn Willow 4-H Club will hold its reorganizational meeting on April 9, 1976 at the Conestoga Elementary School from 7:30 to 9:00 p.m.

Election of officers and upcoming events will be discussed.

A total of fourteen projects will be offered. They are: Handyman, Capons, Pigs, Flowers, Rabbits, Vegetables, Strawberries, Tomatoes, Etymology, Knitting, Cooking, Sewing, Bike and Gun A Safety.

Youth ages 8 to 19 are welcome to join.

On April 10 from 10-1 the club will hold its annual Cancer Drive for the American Cancer Society in Conestoga Township. 4-Her's are to meet at the Conestoga Elementary School at 10:00 a.m.

For more information on the organizational meeting or the cancer drive contact Joan Huber (872-7680) or Ronald Walton (872-2711).

Farm women's hoe-down draws large crowd

By JUDY MITCHELL
Berks Co. Reporter

SHARTLESVILLE - The charity hoe down was a first for the Berks County Society of Farm Women, but judging by its success, it probably won't be the last. The ladies obviously put a great deal of effort into the planning of the event and an attractive array of door prizes lined the stage, cakes and other baked goods kept arriving, and the kitchen buzzed with activity as members prepared refreshments. Anne Yanos, president of the society, and the group she had organized for the demonstration of western style dancing were easy to pick out by the ladies gay swinging skirts and the gentlemens' lively western shirts. Advance sales of tickets had given little indication of the crowd to come, but by the time caller Roland Pother organized the first groups of dancers, the Shartlesville Fire Hall was jammed with close to 350 foot-tapping men, women and children of all ages. By popular demand, the Majestics were asked to play beyond the scheduled hour and the enthusiastic crowd danced on until midnight.

It is always a thrill for any organization to plan a social event that turns out to be a huge success. But members of the Society can take an even greater degree of satisfaction from the tremendous turn out for Saturday's event, because the proceeds of the dance will help further the organization's charitable efforts. Helen Shirey was Chairlady for the dance program and committee members were: Joan Schmehl, Shirley Stricker and Betty Wessner.

Western dancers go through their passes at the Berks County Farm Women's charity hoe-down held recently in Shartlesville.

Appliance material defined

Price, convenience features and styling are key buying points everyone considers when shopping for a major appliance. There's still another important consideration — finding out what finishing materials are used in the critical components of an appliance. This information offers one of the best clues to overall quality and durability of the appliance.

Ask the dealer what finishing material is used in the appliance. If this information is not available, then inquire about a toll free number manufacturer provides for obtaining this essential data. Most manufacturers provide this service. There are three principle "look-alikes" used in major household appliances. Be familiar with them both as a buying point and guide to use and care. They are:

Synthetic enamels — These may be described as "baked enamel," "acrylic," or "polyester." Or they may carry an unfamiliar proprietary name. However, all are basically industrial paints baked on to metal at temperatures around 300 degrees. Relatively simple and inexpensive to apply, synthetic enamels are widely used as a surface coating for appliances. The material has an attractive high gloss and retains its color quite well. However, it requires care in cleaning. It scratches easily and can be permanently damaged by use of such things as household ammonia, bleach and certain strong cleaning solvents.

Thermoplastics — Plastics are being used more and more by manufacturers because they are lighter, easier to form and, in most cases, less expensive than coated metal. You may find them identified as "ABS" (the abbreviation of a generic name), "polystyrene" or "polypropylene." Or, again, they may carry a proprietary coined name.

These plastics can be glossy, colorful and attractive and some have good acid resistance and are surprisingly strong. However, most have little resistance to staining, and can be severely damaged by cleansers or potent chemical cleaning agents. They, are also very susceptible to heat damage.

Porcelain enamel — Also known as "porcelain-on-steel" and occasionally identified as "ceramic coated," porcelain enamel is a durable glass coating fused to steel at very high temperatures (1300 to 1600 degrees). The material once was virtually the only finish used on critical appliance components subjected to heat, hard wear, chemical exposure and heavy food soils. However, because it tends to be more costly to apply, some manufacturers have turned to less expensive substitutes in recent years.

Porcelain enamel is easy-to-clean, scratch and stain resistant, burn-proof, doesn't retain odors and, like glass, is immune to most chemical attack. However, it can be chipped under sharp impact — and such chips are not always simple to repair.

Tips given to sharpen up weed control

Weed control remains one of the most critical battles growers wage despite the great variety of herbicides now available. With more selective weed control has come the emergence of "problem weeds" as well as the increasing importance of getting these tough weeds early - before they compete with and damage a crop during its critical early growth period.

This has been one of the major reasons for a widespread increase in the use of herbicides that are applied before planting and incorporated into the soil. Preplant applications gets the material on before a weed probelm develops - and incorporation puts the chemical down into the soil where it can function most efficiently.

Nevertheless, herbicides - even those applied preplant and incorporated-can sometimes fail and allow weeds to get a damaging jump on the crop. There are any number of possible reasons for herbicide failure, but most weed specialists agree there are just as many ways to avoid it and maintain good, effective control. The best way comes under the heading of "incorporation savvy" according to weed experts at Stauffer Chemical Company's Research and Development Center. Here is what the company suggests as a check list to avoid incorporation misdeeds and insure a fail-safe weed control performance with top yields at harvest time:

When incorporating a flat treatment with a disk, you should use a tractor large enough to pull the disk at a speed of 4-6 mph when set to cut 4-6 inches deep. Common mistake: Using a small tractor and a large disk. This results in a low speed of under four miles per hour and poor incorporation, especially on wet and heavy soils.

You should disk to a maximum depth of six inches unless furrowing-out is done immediately after application of the herbicide as occurs when planting potatoes. In this case, where furrowing follows application of the herbicide, disking should be done to a depth of 8-10 inches. Common mistake: Disking deeper than six inches, even though furrowing is not done right behind the herbicide application.

Both liquid and granular of forms of herbicides must be incorporated immediately. The best solution is to mount the herbicide applicator on the incorporation unit. Common mistake: Going over the field with the application and, when finished, coming back to incorporate. Or, when separate tractors are used, the application and incorporation tractors do not keep the same pace.

The lister or hiller shovels should always be set to run 1-2 inches shallower than the depth of incorporation. Common mistake: Lister shovels are allowed to run deeper than the depth of incorporation, bringing untreated soil up on the top of the bed, which can only result in poor weed control.

Be sure to incorporate to a depth sufficient to insure against your seeder bringing up untreated soil. Common mistake: Shallow incorporation f lowed by deep seeding, which results in poor or no control in the seed row at the shoulders of the seed furrow.

If you furrow, don't furrow out deeper than the depth to which your herbicide was incorporated, you will be bringing untreated soil to the surface. Common mistake: This usually happens when incorporation was too shallow in the first place.

There are special precautions to be considered when you are using a power rotary tiller for bed top or flat treatment. If your spray width is narrower than the power rotary tiller, poor control may result because the soil is picked up and mixed and not sprayed. On the other hand, if the spray width is wider than the tiller to any degree, no control will be obtained where no incorporation takes place. It may even be that you get poor control where you actually incorporated if the rate of application was based on calculations using the width of the tiller rather than the width of your spray. The ideal set-up is to have the

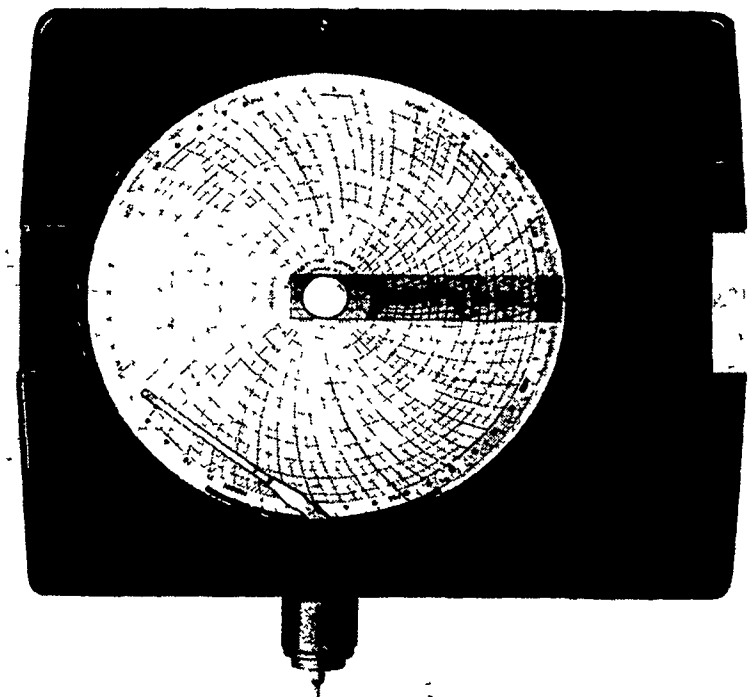
THE SENTINEL



Round-the-clock guardian of stored milk temperature

If you depend upon your milk check for a living, protect that income by insuring milk quality.

The least expensive, single-payment insurance obtainable is the Sentinel — the heavy-duty, 10-inch recorder which charts round-the-clock temperature of your milk-cooling or holding tank.

Assure yourself — and your processor — that proper milk temperature is always maintained.

Keep a permanent log of compressor operation and tank cooling or pre-cooling efficiency, from first filling to pickup.

Cleaning temperatures — increasingly questioned by sanitarians — are recorded on the same chart.

At little added cost, the Sentinel is available with provision for actuating an alarm or warning light if milk holding temperature rises above pre-set level.

Remember — if it prevents the loss of only one tank of milk, the Sentinel has paid its own way.

PARTLOW

See your dealer about the Sentinel — or drop us a line
P.O. Box 433
Elizabethtown, PA 17022

Set the stage with fertilizer now.

More yield, more money ..when you apply pre-plant fertilizer. Fertilizing before you plant promotes healthy, hardy seedlings, and you avoid costly planting-time delays.

Get the jump and get higher yield at harvest

Stop in and see us soon, or phone right away. We'll be glad to arrange a complete pre-plant "package"— including soil testing, fertilizer recommendations and custom application.

We want to help.

The First National Bank of Strasburg opened its Millersville office on Wednesday with more than 100 persons watching the ribbon cutting ceremonies. On hand for the occasion were, left to right, Ben Franklin, portrayed by Wilbur Stark; William Musser, president of the Friendly First; Donald Hoffecker, senior executive vice president of the Bank; State Representative Sherman Hill; Wilbur Garman, vice president and manager of the Millersville office; and William Helm, assistant manager.

Soil tests pushed

A soil conservation plan can assist farmers of the County obtain accurate soil test results, says Clair Gerberich, executive assistant, Lebanon County Conservation District. The questionnaire that accompanies lime and fertilizer soil test requirements performed by Penn State asks the farmer to supply the soil name.

Writing in a recent issue of a popular farm magazine, Dr. James H. Eakin, Penn State agronomist, asked farmers to include information on the soil series for the fields sampled.

This soil series information is needed to evaluate the yield potential of the soil, he said.

This soil series information can be found in the farmer's soil and water conservation plan. This plan, obtained from the Lebanon County Conservation District, is in a blue folder, said Gerberich.

It contains the colored soil maps and the written description of the soil mapping unit found on the farm.

The executive assistant further stated that anyone not having this soil and water conservation plan should call and request this conservation assistance.

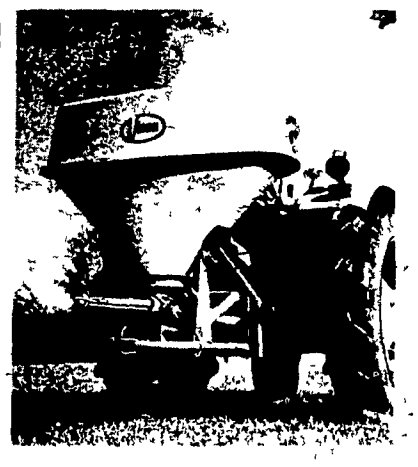
Vicon fertilizer spreader

The most accurate fertilizer spreader you can buy



The Vicon Spreader uses an exclusive fast-action spout moving back and forth at 540 times per minute to give even, rectangular coverage instead of the usual circular pattern.
That means increased profit because you get uniform fertilizer coverage, resulting in better stands and higher yields.

Give the Vicon fertilizer spreader a try. It costs no more than others. But it's better.

Vicon new sprintmaster

Increase your hay raking capacity with faster, more complete raking plus gentler hay handling.

The new Vicon Sprintmaster finger-wheel rake, in addition to superior hay handling capabilities, is exceptionally adaptable to rough terrain. And, the New Sprintmaster is more useful in short crops and rakes wider swaths at higher speeds.

'Poultry - a scrambled industry'

Editor's Note: The following article is the printed version of an address by Secretary of Agriculture Earl Butz before the Pacific Egg and Poultry Association Annual Meeting. He presented his talk there a week ago.

ANAHEIM, Calif. — It's an irrefutable fact that when people start earning more money, they start consuming more livestock products. They switch from cereals to meat, from direct consumption of grains to eating meat, dairy products, poultry and eggs.

We have seen this pattern develop all over the world. Today's Japanese housewife now has enough household money to be able to sliver a few strips of chicken onto her husband's bowl of rice. The rural Latin American goes out to the chicken-coop to get a rooster when he wants to serve honored guests, whenever he wants to share his luxury with others.

We have seen this same emergence of livestock products in our own diets. Invite guests for Sunday dinner and chances are that you will grill a steak. Forty years ago you would have gone out to the chicken-coop for a rooster, just as many people in the developing world do today.

This is not to say that beef replaces poultry as people gain more affluence. No country in the world has developed more than the United States in the past 25 years — and in that time our annual consumption of chicken has leaped from 8.7 pounds per person to 37 pounds per person. We've also doubled the amount of turkey we eat, from just over four pounds per person in 1950 to about 8.5 pounds per person in 1975.

All of this hasn't just happened. The consumption of poultry has increased because the poultry industry has worked to improve their products and their marketing. Who, 20 years ago, would have ever envisioned a time when you could go to almost any major city in the world and rarely be more than a few minutes away from a quick-service, fried chicken outlet?

But those popular eating places would not be possible without all the research that has gone into vitalizing the broiler industry. The technological advances of your industry during the last 20 years is unsurpassed in all of agriculture. Genetic developments, technological advances in housing, and improved poultry rations all combined to bring about more efficient feed conversion and faster growth rates. These, in turn, have made the broiler industry competitive.

In 1950 it took around 3.3 pounds of feed to produce one pound liveweight broiler. By 1960 that amount of feed had dropped to 2.4 pounds. Today the feed conversion ratio for broilers has improved even further, to down around 2.1 pounds of feed for each pound of liveweight bird.

Right in step with this improvement, it used to take 10 to 12 weeks to grow a 4 pound broiler; now it only 7 to 9 weeks. This is another major gain in efficiency which has worked to improve the economics of raising broilers.

Together, these gains have been phenominal. The broiler industry today takes the incomplete protein of grains and efficiently turns it into the sort of high quality meat protein that people need most. The only other industry I know of that can do it more efficiently is fish-farming — and as of yet people don't seem to want to eat that much fish.

The other part of the poultry industry that has shown real gains in the last two decades has been turkey production. Turkey has moved from being only a holiday feast, to one of our cheapest sources of animal protein. Today it is served year-around, and people recognize it for the excellent meat value that it is.

Turkey production, which had been at about 44 million birds in 1950, rose to a 1973 record of 132 million birds. Then, at least partially because of higher feed costs in the last two years, production dropped to 124 million birds in 1975. We will probably see moderate gains in turkey production in 1976, perhaps with the record being approached or surpassed.

So far I've been talking about your successes; now let's get down to the hard part — the weaknesses. Egg consumption per person in this country has declined steadily ever since 1945. In that year, the last of the War years, egg consumption in the U.S. hit 403 eggs per person. Since then; improving economic conditions, availability of substitute foods, and more recently the cholesterol scare, have worked to drastically cut egg consumption. From 1970 to 1975 alone, the number of eggs consumed per person in this country dropped from 311 to 278.

That's a significant shift in dietary habits. It's something to look into closely. Why has it happened, and will it continue? These are questions the egg industry must answer.

Probably the over-riding factor has been the change in lifestyle that is taking us from being a nation involved in physical labor to a nation of sedentary workers sitting behind desks most of the day. With less strenuous work, people have tended to spread out around the middle and bottom — and one of the first dietary changes many make to rectify this settling process is to skip breakfast. Or if they eat breakfast at all; they grab a doughnut, or stick a Pop-Tart in the toaster, slosh down a cup of coffee, then run through the door to catch the commuter train. Eggs and bacon have often been pushed to the back burner.

One ray of hope, however, would seem to be in awakening people to the fact that traditional breakfast meals are also pretty good when served at other times of the day. The working housewife who no longer takes the time to whip up an omelet for breakfast may now find, if she thinks about it, that that same omelet would now be a quick, easy, inexpensive main dish for dinner, one that her family would enjoy as an occasional change of pace.

I think this is a real opportunity for egg producers.

But what about the health aspects of eating eggs, a real propaganda campaign based on half-facts and innuendos is being waged against them — often by people who should know better.

You can't fight that sort of thing with a fire hose, putting out hot spots whenever they develop. The only way to fight scare tactics is with the honest facts; disseminating the truth, throwing the valid questions open to research and objective consideration.

There is no question that egg yolks are relatively high in cholesterol. But there is also no question that eggs can also provide one of the most complete and perfect proteins humans can find.

To date the whole issue of eating foods high in fats and cholesterol has been much like the question of selling grain to the Russians — by that I mean the smoke from the fires of emotion has clouded the issue, distorting the facts and often leading people in wrong directions.

Cholesterol is a normal constituent of our blood and tissues. It is synthesized by the body whether we consume it in our foods or not. There is, however, a positive correlation for most people in the amount of cholesterol consumed and the amount of it in our blood. But the real question remains whether or not restriction of dietary cholesterol actually reduces the frequency of atherosclerosis and heart disease. The answer to this remains obscure.

In the more than 15 years since the controversy over the role of fats and cardiovascular disease began here's what we have learned:

The utilization of fats in man is affected by:

- the food we eat all our lives, and by our state of general nutrition;
- The action and interaction of our endocrine system — the thyroid, adrenal, pituitary, ovarian, pancreatic, and other glands;
- how active we are. Exercise increases the oxygen supply to the tissues, improves circulation, and relieves tension; all major considerations in heart and vascular diseases;
- our emotional characteristics and mental well-being;
- how each of us goes through the aging process: how our enzyme mechanisms keep up with our pattern of eating and exercise.

Every one of these things is a factor in our health and how our body uses dietary fats. Much more work and research

'Poultry -

[Continued from Page 53]

must be done before valid conclusions about what fats should or shouldn't be in our diets.

Meanwhile, egg consumption continues to decline, even while improved flock management, breeding and feeding efficiency have made it possible to produce more eggs from fewer chickens. Eggs per layer in the last 25 years have jumped from 174 eggs per bird to 233 eggs per bird. Surely, in a world increasingly worried about rapid population growth and future food supplies, we shouldn't dismiss eggs as an excellent source of human nutrition.

Accordingly, USDA has recently appointed 18 members and alternates to serve on a new Egg Board which will administer an improved Egg Research and Promotion Order. This board is designed to help develop markets for eggs by working in promotion, research, and consumer education on the use of eggs and egg products. I think that this is definitely a step in the right direction.

The poultry industry has not yet reached its pinnicle. Our nation and the rest of the world is going to continue to eat more animal protein as people gain affluence — as they inevitably will. It's apparent from our own history that the poultry industry has an important role to play in this change in diets; as people switch from direct consumption of cereals to the eating of more livestock and poultry products in general.

The gains of the poultry industry haven't come at the expense of other livestock products; they have come as a part of a general trend toward eating more meat. Even while poultry made its dramatic gains during the last quarter-century in the U.S., the annual per capita consumption of beef and veal went up from 71.4 pounds in 1950 to a record 124.3 pounds in 1975. At the same time, pork consumption per person has remained steady.

Total animal protein consumption will continue to rise in this country, in spite of the clamor of some people who claim we should all eat "one less drumstick per week" in order to make more grain availabe to the world as a whole.

This latter plan is just plain rhetoric, based on fuzzy thinking and incomplete logic. Unfortunately, there are some who unthinkingly parrot such rhetoric without realizing the fallacies of it. They actually believe, through a process of wishful thinking, that such a simple slogan can indeed supplant the complex interactions of world economics to help the world's poor. This naivete must be counteracted with clear thinking. People deluded by such rhetoric must be communicated with; they must be exposed to the rule of reason, not rhetoric.

The challenge for your industry will be to continue the excellent job of innovative research and marketing you have done up to now. You have a great story to tell. Don't relax for a moment.

Science and economics are on your side. Use them and use them well.

Berks beekeepers meet

By JUDY MITCHELL
Berks Co. Reporter

LEESPORT - Attendance at the Spring meeting of the Berks County Beekeepers Association included the interested observer as well as the seasoned keeper with more than fifty years experience with bees. President Richard Hershey of Temple conducted the March 25 meeting held at the Agricultural Center, assisted by secretary-treasurer Mary P. Snyder, Wernersville R3.

The program got under way with the showing of two fascinating films entitled "The Life Cycle of the Wasp" and "Secrets of the Bee World." During the brief business meeting which followed, Hershey spoke to the group about the importance of the Federal Indemnity Program which compensates for beekeepers losses in the event of bee spray. The open discussion, obviously a favorite portion of the program, saw a lively exchange of ideas between the bee enthusiasts. The discussion period also provided the novice beekeeper with an opportunity to get valuable advice on beekeeping methods from the more experienced members.

Heller elected pres. of Eastern local

Elwood Heller was elected president of the Lebanon local unit of Eastern Milk Producers Cooperative Association, Inc., by a large group of farmer members assembled here in annual session on March 25.

Other officers elected were Franklin Wagner, vice president; John Bomgardner, secretary; and Elwood Weidman, treasurer. Named as regular delegate was Bernard Brandt, while Elvin Ebersole is to be his alternate.

Director of public relations and editor of Eastern Milk Producers' magazine, Lisle Dutton, spoke briefly at the meeting. The co-op executive from Syracuse, N.Y. discussed current milk marketing and distribution problems.

A family style dinner was served to 247 people by the ladies auxiliary of the Ono Fire Hall. Brenda Maulfair, Lebanon County dairy princess, spoke briefly.

Marketing over 3-billion pounds of milk annually, Eastern Milk Producers has a membership of over 8,000 in all parts of the Northeast. Approximately 200 local units are scattered across New York, New Jersey, Pennsylvania, Vermont, Delaware, Maryland, Massachusetts, Connecticut, and New Hampshire.

Pete Howard (left) store manager and Mac McGuigan, speciality feed salesman and territory manager were present at the new Red Rose store opening in Quarryville recently.

Red Rose Store holds open house

QUARRYVILLE - Red Rose Feed Company, 27 North Church Street, recently held an open house at its new warehouse completed November, 1975. John W. Eshleman Co. opened the store in 1969. In 1974 Carnation-Albers Co., Los Angeles, purchased the company.

Since 1969 the business has increased three times its volume in retail sales of dairy feeds and agricultural chemicals and fertilizers. The store also carries lawn and garden needs, facilities for the application of liquid nitrogen, pesticides and fertilizers.

According to Pete Howard, store manager since 1970, the store is "headquartered for complete farm needs offering a total package program to the farmer."

A total of fourteen employees operate the store which handles Northrope King Seed Corn, Lebanon Chemical Co. chemicals and fertilizers and National Molasses Liquid Protein Mol-Mix.

Jesus Feeds the Five Thousand

And the disciples say unto him, Whence should we have so much bread in the wilderness, as to fill so great a multitude?

And Jesus saith unto them, How many loaves have ye? And they said, Seven, and a few little fishes.

And he commanded the multitude to sit down on the ground.

And he took the seven loaves and the fishes, and gave thanks, and brake them, and gave to his disciples, and the disciples to the multitude.

And they did all eat, and were filled; and they took up of the broken meat that was left seven baskets full.

LIFE on the farm

By DIETER KRIEG

It happens every year about this time when melting snow and accompanying rains saturate the ground and fill streams to capacity.

The normally pastoral creek at the eastern side of our pasture stampeded, stumbled and raced towards the Susquehanna River, carrying with it an assortment of debris and valuable topsoil.

The degree of damage caused by water run-off and raging streams varies from farm to farm. For us it meant broken fences, among other things. Floating and swirling branches, leaves, grass, tin cans, and bottles caught on the strands of wire crossing the stream and eventually the weight, combined with the constant force of raging water, would snap it.

Carrying an old railroad tie on his shoulder, Dad led the "expedition" over the still soggy meadow to where the damage was. My brother, Ingo, and I accompanied him, carrying a hammer, pliers, fence staples, a roll of wire and a spade.

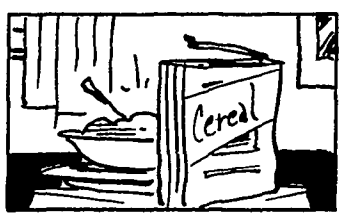
Dressed in warm clothing and knee-high boots, Ingo and I began the task of retrieving the wire and freeing it of hundreds of pounds of debris. Standing with feet either firmly planted in mud, or slipping on slimy rocks on the creek bed, the most difficult part of the ordeal was maintaining one's balance and avoiding getting wet. It's no secret that water around this time of year is mighty cold — although my father, in his younger years, used to take a swim every Easter Sunday, regardless of the temperature. My adventurous brother tried it once himself. Anyway, on this occasion we were all trying to stay dry, if possible.

Dad had the old railroad tie in place by the time Ingo and I had the old wires ready. The heavy planks, used for braces, were put back into place and Ingo and I began to unroll some more wire to replace that which had broken and floated downstream.

Setting fences and nailing wires to a post was as demanding of precision as any job on the farm. The fence which led to the creek was built by us, with Dad in charge, a year earlier, and every post was set in a perfectly straight line at exactly the right height, and pointing straight up. And every strand of wire had to be equidistant from the ground and the next wire. At first Ingo and I had to measure such distances, while Dad's sharp eye told him immediately where the next wire had to go.

Seen from up close or a half mile away, the dark-brown railroad ties and six strands of gleaming barbed wire were as straight and pretty as any fence in the county. And whenever it was repaired — no matter where, in a creekbed or on a high and dry knoll — the element of precision was of utmost importance, and a source of pride.

© Dieter Krieg 1976



When you are eating your morning cereal, you are paying a small tribute to an ancient goddess, Ceres, who was protector of Roman crops.

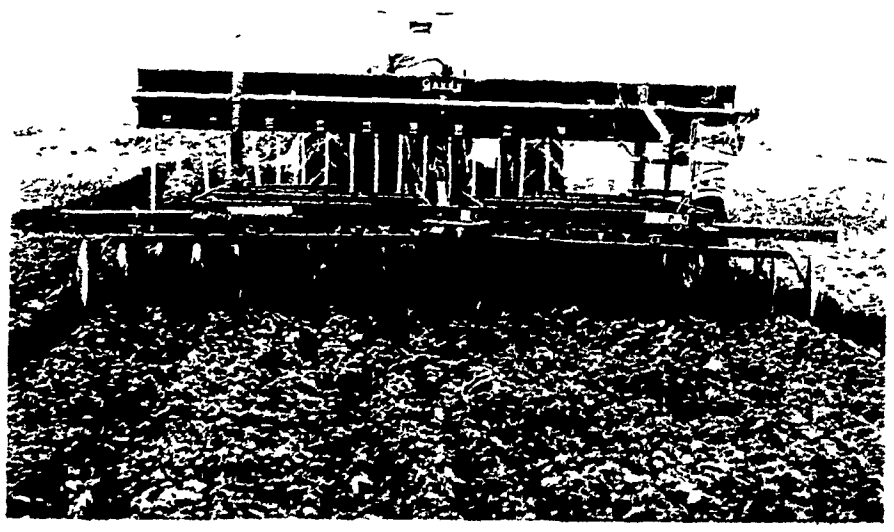
Why use a Free-flowing granular herbicide ?

One package granular weed control for corn.
Reliable grass and broadleaf weed control.
Stops nutsedge, foxtails, seedling johnsongrass.
Also cocklebur, ragweed, smartweed, pigweed.
Saves hauling water for spray in busy season.



Ideal for dry and snap beans, potatoes, alfalfa.
Stops nutsedge, quackgrass, Bermudagrass and over 25 other weeds and grasses.

Schuylkill Co. dairymen honored at DHIA banquet

The Schuylkill County Dairy Herd Improvement Association held its forty-ninth annual meeting and banquet at the United Church of Christ, Friedensburg with 81 DHIA members and guests in attendance. Mr. Carl Brown, Vice-President introduced the guests including David Kantner, Schuylkill County Agricultural Agent, Mr. Earl Baum, DHIA Supervisor for the Southeast region, and Dr. Bill Baumgardt, Head, Dairy and Animal Sciences Department at Penn State University.

The awards for the evening included a plaque to the high producing dairy herd in the county owned by Norman and Dale Rothermel, R1, Pitman. The Rothermel herd consisting of 45 registered Holstein cows, produced an average of 16,903 pounds of milk and 672 pounds of fat. The Rothermel farm also received a plaque for the county's highest milk producing individual cow on DHIA, which gave 22,825 pounds of milk and 817 pounds of fat. A cow owned by Bruce Leatherman of R1, Tamaqua, was awarded a plaque for being the highest cow on DHIA for fat. Leatherman's cow produced 19,832 pounds of milk and 838 pounds of fat.

There were 1,728 cows on the DHIA testing program in Schuylkill County in 1975, with an average milk production of 12,566 pounds and average butterfat of 492 pounds. The average cow herd size was 54 with an average product value per cow of $1,107.00.

Those dairy farmers who had cows in their herd during 1975, that produced a minimum of 100,000 pounds of milk or 4,000 pounds of fat during their lifetime, received Meritorious Lifetime Production Records. These farms were: Carl W. Brown R2, Pine Grove; William R. Daubert, R2, Pine Grove; Heisler Brothers R21 Tamaque; Paul Heisler R1, Tamaqua; Jersey Acres Farm R2, Pine Grove; Kunkel Farms, Inc. R1, Orwigsburg; Bruce Leatherman R1, Tamaqua; Miller and Rex R1, Andreas; Lester D. Moyer R1, Schuylkill Haven; Wilbert Moyer R.D.E. 1, Schuylkill Haven; Emmet W. Rhein R2, Pine Grove; Norman and Dale Rothermel R1, Pitman; Snyder Brothers R1, Pitman; Carl J. Snyder R1, Pitman; Franklin Troxell R1, Andreas; and Paul and Ken Wagner R1, Tamaqua.

The newly elected officers for 1976 of the Schuylkill County DHIA are Mr. Carl W. Brown, President; Mr. Bruce Leatherman, Vice-President; and Mr. Wilbert Moyer, Secretary-Treasurer.

HIGHEST HERD IN SCHUYLKILL COUNTY

Dale and Norman Rothermel, center holding plaque, are seen with Dr. Bill Baumgardt, (left) Penn State Dairy Scientist and Carl Brown (right), President of DHIA Association at the Annual Schuylkill County DHIA meeting where the Rothermels received the award for having the highest producing herd of cows in Schuylkill County.

What's New

Weil Invents Short Ten Foot Pole

If you have ever tried to ship a ten foot pole (or any other size long tank gauging stick), you've doubtless discovered that truck lines won't accept small shipments of them; this is due to the space requirement and the fact that they break easily. Fortunately, the express company will deliver one for you for only about $8 and they only break one now and then.

Weil Service Products Corporation, 2434 West Fletcher Street, Chicago, Illinois, has come up with guage pole kits that quickly and permanently convert to full size poles, both in cross section and length, at the destination. According to the manufacturer, the kits are inexpensive to ship, convenient to warehouse and are not susceptible to damage in shipment. Kits are offered in 8, 10, 12 and 14 foot models.

Further details may be obtained by requesting Bulletin DN-16.

If you ventilate, and operate 54 fans . . . Our new fan can save you $5,000.00 a year . . .

INCREASED EFFICIENCY GIVES YOU MORE AIR PER WATT

Vent-O-Matic Watt Watcher fans operate at higher efficiency levels than competitive models. You therefore get Vent-O-Matic's rated air delivery (CFM) with less energy input, with lower electrical costs for you.

Take one 36" Vent-O-Matic Watt Watcher ventilating fan. Run it 7000 hours per year (80% duty cycle) at .05" static pressure and 3¢ per kilowatt hour. You will save nearly $5.00 per month. Multiply that by 54 fans and project it at 8% interest compounded monthly for 10 years and it comes to over $50,000. OR $5,000. per year. Vent-O-Matic's cost a little more, but you'll pay back the initial price premium in not much over a year.

And because electricity costs are projected to increase 12 to 15% each year for the next five years, your savings will be even greater and your payback shorter.

Send for the report shown above before you buy any more fans, and ask us to figure your system for you.

Produce 45-lb. pigs in 8 weeks with WAYNE

The sow alone cannot provide adequate nutrition for big, thrifty litters. And Wayne knows that each pig of every litter you raise is important. So, to take advantage of that certain period in pigs' lives during which they make their most efficient gains, use Wayne Tail Curler Rockets and Tail Curler Senior.

At 5 weeks, Wayne Tail Curler Rockets and Tail Curler Senior provide two-thirds of the pig's nutrition . . . by the eighth week, practically all of it. One reason is because pigs like these feeds . . . preferred them an average of 2-to-1 over four other major brands in our tests.

- **Tail Curler Rockets**

A 20% protein prestarter designed to provide the critical nutrients needed by early weaned pigs. The foundation of this feed is its superior amino acid balance, which closely resembles that found in sow's milk. The ultimate in taste appeal that encourages early eating.

- **Tail Curler Senior**

A feed for pigs 6-9 weeks old, after they have been prestarted on Wayne Tail Curler Rockets. This 16% protein starter has added lysine and methionine for a new amino acid balance giving the performance of an 18%. Medicated with scour-fighting Carbadox.

- **Wayne Gro-Pork 280**

A 16% complete feed, nutritionally balanced to furnish the level of protein, energy, vitamins and minerals for efficient feed utilization from 50 to 125 lbs.

Hog producers know the importance of getting baby pigs started right, and of converting feed to pork efficiently. That's why so many of them have come to depend and rely upon Wayne Feeds. They do the job.

Simple feeding is all in the bag. Every bagful of Wayne Ruff 'N Redi delivers a full, balanced ration. You don't need to buy and handle tons of hay and sacks of grain. All you provide is plenty of fresh water and loving care.

Ruff 'N Redi pellets are grain and roughage, protein, minerals and vitamins — all blended together with tasty cane molasses.

Tips given to sharpen up weed control

[Continued from Page 51]

spray width one or two inches wider than the tiller to insure treatment of all soil being picked up and mixed by the rotary tiller. Common mistake: Having the spray width much narrower than the tiller width or the spray width far wider than the tiller width.

Spraying of any kind should never be done when a wind is blowing, but it is extremely important not to spray when the wind blows your spray band off the center of the tiller. This can be avoided by shielding the spray.

The power rotary tiller head must be narrower than the bed to prevent treated soil from being thrown off into the furrow. Common mistake: Use of a tiller head that is wider than the row which will cause poor control because the rate of application is based on the width of the bed top.

If you are using a sled planter following a bed top treatment, you must be careful so that untreated soil from the furrows and edges of the bed is not pushed on top of the treated soil. You must also be careful with the sled planter not to push treated soil off the bed top into the furrows. An "L" bed shaper balde is best, according to Stauffer field technicians.

If you treat the bed with a power rotary tiller, it is best that your bed be completely former prior to application. Reason: Once your application is finished, no more soil is taken off or put on top of the bed. Common mistake: Trying to incorporate on a rough bed which can only result in the herbicide being pushed into the furrows. Finally, the remaining material is pushed into the furrows when the sled planter makes the bed into its final shape.

If you have a machine which is set to incorporate two bands on a double row bed, you cannot use it for a single row bed, even though it appears as though the narrow band between the units is being moved around so as to give complete incorporation.

If you decide to treat a bed top solid, make sure that your rows are planted inside the treated band. Common mistake: Failure to match up planter with treatment width.

Run your unit sufficiently deep so that your side shields are also running in the ground. If your shields are above the soil, treated soil can be thrown out of the desired treated band.

Your first two cultivations following a band incorporation treatment are critical. Cultivate so that your soil is moved away from the treated band and none is pushed or thrown on the treated band.

If your power tiller has a covered hood, you should check frequently and when necessary clean out packed wet soil. Common mistake: Failure to watch such compaction on wet clay soils. The same principle applies to the rest of your equipment. You should regulary check pressure, nozzle plugging, and your speed frequently. Try to mount your pressure guage, speedometer and nozzles so that they are readily visible from the tractor seat.

Use low pressure (20-50 psi) and a large nozzle orifice to apply the recommended gallonage of a spray solution. Common mistake: Use of high pressure on a small orifice, which results in too much drift and loss of material on the ground.

Maintain the speed at which your incorporation calibrations are made. Always use a speedometer and never change gears or throttle settings because the tractor seems to be going too slow or too fast.

Rohrer, Rutt recognized

STARKVILLE, Miss. - Pennsylvania's Outstanding Young Farmer, Charles Rohrer, won the Farmer Olympics part of a nationwide OYF contest here last month. Aside from the recognition, the 35-year old dairyman from Paradise, Lancaster County, also received a $300 check.

Ken Rutt of Quarryville, who chairs the state contest in the Keystone State, was recognized to be one of the 10 best in the country. The 30-year old dairyman received a plaque for that achievement.

Both Rutt and Rohrer and their wives were here in Starksville for the competition and programs which lasted for three days in mid-March.

The top four contestants were representatives from the states of Wyoming, Indiana, South Dakota and Utah in that order. Rutt described the competition as having been "keen." He says that the winning farmers from those states represented diversified operations of 3,000 or more acres. The winner from Wyoming was sole owner of 59,800 acres 950 beef cows, and 500 dairy cows.

All state winners of OYF contests become members of the Outstanding Young Farmer fraternity, a group which helps to organize the national program and meets once a year. Chevrolet truck division of General Motors and Ken McGee Chemicals, along with the U.S. Jaycees, sponsor the program.

The Rohrers received an expense paid trip to the national program as well as gifts from all other states participating.

WHO'LL PAY THE MORTGAGE IF YOU'RE NOT HERE . . .

Will your family lose your home if you're not here to pay the mortgage?

Berks conservation dinner held

KUTZTOWN — The Berks County Conservation District and the Agricultural Stabilization Conservation Committee joined in celebrating their annual conservation banquet at the Kutztown State College Dining Hall on March 26.

Donald B. Duncan, master of ceremonies for the evening, welcomed the crowd of more than 150 members and guests and led the group in a pledge to the flag, and Paul H. Keeney gave the invocation before dinner. The program which followed included the announcement of District and ASCS awards, the winners of the District's first poster contest, and a slide presentation by guest speaker Dr. Richard L. James, executive director Schuylkill Valley Nature Center, Philadelphia.

Duncan introduced those seated at the head table and honored guests before the award program got under way, and Keeney, Chairman of the Agricultural Stabilization Conservation Committee, spoke briefly on the ASCC and called for continued efforts towards more and better conservation programs. Mary Ann Rimby, Chairman of the Berks County Conservation District, followed with an outline of the District's function and commented on the great success of this year's tree sale which concluded with a total of over 60,000 seedlings sold.

Handing out the Agricultural Stabilization Conservation Committee Service Awards was Charles D. Hogan, Jr., ASCS District Director for S. E. Pennsylvania. Awarded for years of service on a Community or County Committee were: Samuel Schorich, 30 years community service; Dave Shirey, 25 years community service; Guy Long, 20 years community service; Donald Lutz, 20 years which included both community and county service; Herber D. McGowan, Wilson Rohrbach and Ralph Spencer, each fifteen years community service; and Roy Stoltzfus, 10 years community service.

Cindy Buchanon (left) first place poster winner in the Berks Conservation contest shows winning art to Dr. Richard James, speaker; Mary Ann Rimby, chairlady for the Berks Co. Conservation district and Paul Keeney, chairman of the ASCS committee.

Before introducing the winners of the poster contest, Duncan, a Director for the County Conservation District, pointed out that although it had been decided to try out the idea for a conservation-theme contest this year in only two area school districts, the response was so great that the contest will be open to all county school districts next year. From the 150 entries submitted for this year's competition, two posters were selected from each of four grade divisions. Jennifer Dietrich took first place in the kindergarten through three division with Matthew Orr as first runner-up; both students are from Conrad

Usefulness of starter fertilizers shown

The time has come to look at starter fertilizers in a new light, according to university and commercial agricultural authorities. They cite advantages of starters in cold, wet soils, and some see starters as a means of maximizing fertilizer efficiency during a time of high costs.

"While there has been a trend away from starter fertilizer use in certain parts of the country, it is not a trend every farmer should rush to join," asserts Dr. Emmett Schulte, University of Wisconsin soil scientist. "This is especially true in the northern cornbelt," he adds.

Dr. Schulte explains that in some northern growing areas there is not a lot of phosphorus or nitrogen available early in the season, due to the normal mineralization process as the soil warms up. "We almost always get an appreciable response to starter phosphorus and potassium, and somewhat less to nitrogen. We definitely recommend starter fertilizers on all heavy soils that are subject to a wet spring," he reports.

According to Dr. Richard Wiese, Soil Fertility Specialist, University of Nebraska, "It has always been true that fertilizer well placed in the vicinity of the seed in the ground is usually more efficient and more effective than an equal amount of broadcast material.

"More of the fertilizer placed in this way is taken up by the plant," he explains. "Fertilizer applied broadcast requires amounts that are two or three times more than would be needed for band application in the row."

Bob Christensen, Manager, DeKalb Research Farm, DeLong, Iowa, says this about starters:

"Any thinking agronomist would have to say that if you are looking at fertilization of low fertility ground, starter applications are still the most profitable way of spending $5 to $10 an acre for a given amount of fertilizer. You get more response on low fertility soils using plant food as a starter than any other way.

"What's more, there is no question our planting studies prove that starter fertilizer applied on early-planted corn — even on ground that is very fertile — shows economic results.

"In our field trials, we have been using a 1-3-1 starter — a 6-18-6 — strictly as a pop-up in our data planting studies. We have had really good response on very early planted crops — April 3 to 10, for example. But the response tends to disappear as we get into what are the more normal later planting dates for this area, or about April 24 to May 1. Overall, we think that the additional phosphorus that is available in the 1-3-1 solution is a real asset, because quite often you will encounter phosphorus deficiencies in early planted corn," he explained.

"We believe, however, that a good starter program in the long run will maximize efficiency of fertilizer use, no matter what kind of plant food you are putting down, and you can decrease the over-all cost of your fertilizer program," says Don Johnson of Allied Chemicals. If and when fertilizer application rates are lowered, he points out, it is logical to assume that starters certainly would reassume an important role. We know that starter fertilizers containing micro-nutrients can cut the cost of the micronutrients in half. For example, if soil tests show that a farmer needs a trace element like zinc at four pounds per acre, you can meet his requirements by supplying only two pounds of zinc per acre in his starter fertilizer. In this case, the micronutrient band treatment is easier and more economical than a broadcast application.

"The advantages of applying micronutrients with starter fertilizer follow those of the primary nutrients," explains Wiese. "Greater proximity to the area where you have dropped the seed makes a micronutrient more available to the plant. Starters are a very effective and precise way of meeting a crop's micronutrient requirements.

"Moreover, the complex differences in the various kinds or sources of micronutrients — whether the carriers are oxides, sulfates, chlorides, biochemical or chelated products — are virtually eliminated when they are applied with nitrogen and phosphorus starter banded in the row. They are almost equal in their capacity to get the job done, according to our Nebraska research. This means growers can use a much lower-cost micronutrient with much the same results," Wiese reports.

"When micronutrients are applied with polyphosphates," Johnson adds, "you have a definite advantage in banding with the starter, instead of going the broadcast route, because of the sequestering effect of polyphosphates, which makes micronutrients more available to the young plant."

Minnesota studies have shown where nitrogen and phosphorus are applied together in a starter, the amount of phosphorus uptake by the plant is significantly increased.

"This interaction between different plant nutrients applies to N and P as well as to many other nutrients," explains Dr. A. C. Caldwell, Minnesota soil scientist. He notes that in one such test an N and P treated plot outyielded a phosphorus-only plot by 50 bushels per acre.

"N nearly always enhances phosphorus uptake and should be considered as part of a starter program," adds Hoeft. He says it seems that nitrogen permits phosphorus to move from the root of the corn plant to the top of the plant more rapidly. This apparently assures the best use of a starter fertilizer, with nearly double the phosphorus being absorbed by the plant.

Because of the widespread use of herbicides, most growers already have saddle tanks for their tractors, making it easy for them to gear up for a liquid starter application. This simple practice also provides the grower with an easy way to meet trace element requirements which may show up in a soil test.

There is evidence that a starter application of zinc may be beneficial in soils already high in phosphate — another reason for growers to consider a liquid starter with trace elements added. For example, Minnesota researchers observed that growers having a soil already low in zinc or iron can compound micronutrient deficiency problems by high-level fall applications of phosphates. If these plants are already existing at a marginal level of zinc nutrition, this further reduction can be responsible for lower yields, warn the Minnesota researchers. Application of a micronutrient like zinc is more certain in liquid 10-34-0, and is easier and more economical than a broadcast application.

ANCA recommends income tax law changes

WASHINGTON - The American National Cattlemen's Assn. has recommended changes in income tax laws which would eliminate undesirable livestock tax shelters without shutting off needed capital. ANCA and associated livestock industry organizations also recommended against certain proposals which would impose "burdensome and discriminatory" new requirements on livestock producers without eliminating any alleged abuses of the tax laws.

The comments on tax proposals were made jointly by the National Livestock Tax Committee, ANCA, National Livestock Feeders Assn. and National Wool Growers Assn. in testimony presented to the Senate Finance Committee.

NLTC and ANCA first noted that legislation adopted in 1969 helped eliminate "tax profiteers" in agriculture without harming the legitimate livestock industry.

Citing the capital-intensive and high-risk nature of agriculture, the four organizations cautioned against tax law changes which would unwisely discourage investment, on a sound and economic basis, from within or outside the industry.

Mattiessen explained that, in recent years, cattle feeding has been used by some taxpayers as a tax shelter, with the real abuse coming in cattle feeding programs which advertised write-offs in excess of cash invested - in some cases up to 40 percent - as a result of leveraging achieved through use of nonrecourse loans.

Many of these feeding programs have gone out of business, the Senators were told, but, to eliminate any possibility that the abuses might reoccur, the livestock groups recommended adoption of a two-point program: (1) Limit farm losses to "capital at risk;" and (2) tax all limited partnerships registered with the Securities Exchange Commission as corporations. These changes, it was pointed out, would curb alleged abuses without substantially damaging the legitimate livestock industry.

The industry's "capital at risk" proposal would limit the amount of deductions in the case of a livestock feeding or other contract which had a guaranteed stop-loss provision. Farm losses could be deducted only to the extent of cash invested, plus recourse loans. This would mean that farm losses would be limited to a taxpayer's potential personal financial libality in the farm or ranch activity. Since legitimate livestock operations are financed by recourse loans, this proposal should not adversely affect such operations, Maer said.

"Any abuses not eliminated by the capital-at-risk proposal can be terminated by taxing all limited partnerships which are registered with SEC as corporations," the livestock industry statement said. "This proposal is supported by NLTC, ANCA, NLFA and NWGA only if it applies to limited partnerships in all industries, and provided there is a clause exempting existing limited partnerships from such coverage.

"Additionally, since limited partnerships are legitimately used by farm and ranch operations to bring in minors and other persons as limited partners, and for estate planning purposes, the proposal is limited to all limited partnerships registered with SEC, since these are the ones which have been generally used for tax shelter purposes.'"

Among other recommendations to the Senate Finance Committee:

-The proposed Limitation on Artificial Losses (LAL) should be rejected. This proposal was described as "immensely complex, highly discriminatory and very costly," - because of extremely burdensome cost accounting requirements - to cattle producers. LAL is not necessary to curb abuses, and it would be another unworkable "excess deducations allowance" provision for the Internal Revenue Service and the livestock industry to contend with. The LAL proposal would not protect legitimate farmers and ranchers; rather, its enactment would adversely affect substantial numbers of producers.

-The livestock groups oppose proposed mandatory accrual accounting for certain corporations and partnerships. Most farm corporations are small family-owned businesses. The proposed family corporation exemption would not protect many businesses where more than one family is involved. To deny use of the corporation as a vehicle to conduct farming and ranching operations is unfair and discriminatory. In addition, this proposal would impose undue complexities on agriculture.

-IRS should be instructed to cease its use of the "material distortion of income" test concerning deductions taken by cash basis farmers and ranchers. The test is meaningless, and it causes expensive and time-consuming administrative controversies.

-The "excess deductions account" should be terminated. This is a hopelessly complex and unworkable tax law provision.

Broilers increasing

HARRISBURG - Poultry production in Pennsylvania during the week ending March 20 continued to increase over last year's production, according to the Pennsylvania Crop Reporting Service.

Placements of broiler chicks were 1,404,000, three percent above the same week in 1975. This figure is six percent below the previous week.

Average placements during the past ten weeks were ten percent above a year earlier.

In the 21 key poultry producing states, placements of broilers were 66,940,000. This is two percent above the previous week and 12 percent above the same week a year earlier.

Average placements in the key poultry states during the past ten weeks were ten percent above the 1975 average.

Senate candidate airs his views on agriculture

"Farmers are being forced to sell their land. In each of the past five years, 100,000 acres of farmland in Pennsylvania have been taken out of agricultural use and turned over to housing developments, factories and roads. The U.S. Department of Agriculture has estimated that by the turn of the century, there will be fewer than 1 million farms in this country," says George Packard, U.S. Senate candidate.

To stop this irrecoverable loss Packard stressed the need for comprehensive land use planning.

"Federal funds should be made available to states and municipalities to be used to formulate effective land use patterns based on the needs and desires of local citizens. But zoning decisions must remain at the township level."

Packard also expressed concern for those who want to enter farming but who are unable to because of high costs.

To help new farmers, Packard called for the creation within the Department of Agriculture of a Federal Farm Assistance Corporation.

"The corporation would lease family-sized farms to qualified new farmers who lack the necessary capital to enter farming. At the end of the lease period, the established farmer would buy the farm from the corporation."

To aid farmers who wish to pass their land to their children, Packard called for a substantial increase in the current exemptions under the Federal Estate and Gift Tax Law.

"The personal exemption would be raised to $200,000 and the marital deduction to $100,000, plus 50 percent of the estate."

Packard called for reform of a host of unfair rules and regulations that hinder rather than help farmers.

"There should be no restrictions on exports of U.S. farm products," the candidate said. "Export controls are unnecessary government interference in the free market economy. They deal with the symptoms of inflation rather than the cause which is excessive government spending."

Packard called for greater fairness with regard to imports of foreign agricultural products.

"All imported meat, meat products and dairy products should be federally inspected at ports of entry and be subject to the same inspection and quality standards as U.S. products.

"All imported meat, meat products and dairy products should be federally inspected at ports of entry and be subject to the same inspection and quality standards as U.S. products. To maintain the competitive position of U.S. farmers, countervailing duties should be imposed on imports from countries that subsidize their agricultural production."

Blood pressure clinics slated

The April schedule of free blood pressure clinics sponsored by the American Heart Association, Lancaster Pennsylvania Chapter was announced recently. These free blood pressure testings are provided by your HEART FUND dollars and will be provided at the following locations and times:

Lung Association, 630 Janet Avenue, Lancaster - 10 a.m. to noon and 1 p.m. to 5 p.m. - The first Tuesday of the month.

Quarryville Drug Company, 15 E. State St. - every Friday from 5 to 7 p.m.

Willow Pharmacy, Willow Street - 1 p.m. to 3 p.m. the first Tuesday of the month; 6 p.m. to 9 p.m. the third Tuesday of the month.

Sloan's Pharmacy, 61 E. Main Street, Mt. Joy - Tuesday and Wednesday of each week from 2 to 4 p.m.

American Heart Association, Lancaster Pennsylvania Chapter, 246 W. Orange Street - Every Friday from 2 to 4 p.m.

Pharmacy Labs, 355 W. King Street, Lancaster - Every Monday through Friday from 8:30 to 4:30 p.m.

McElroy's Pharmacy, 100 E. Main Street, Lititz Every Wednesday from 1 to 4 p.m. and every Friday evening from 7 to 8:30 p.m.

Lancaster Community Health Center, 545 Pershing Avenue, Lancaster Every Monday from 1 to 4 p.m. and every third Saturday from 1 to 4 p.m.

Strasburg Pharmacy, 1 W. Main Street, Strasburg - Monday, Tuesday, Thursday and Friday from 9 a.m. to 9 p.m.; Wednesday and Saturday from 9 a.m. to 6 p.m.

All testing at these centers are FREE of charge and are supported by your HEART FUND dollars.

Coffee Cures

Coffee has a long history When a smallpox epidemic decimated London in the 18th century, persons living near the coffee-roasting plants escaped the disease and medical authorities attributed this to the coffee's protective fumes Later, cowboys in the American west took to coffee, too They liked it black, strong and hot The grounds and water often simmered for days over the campfire. To preserve the accumulated aroma, the large coffee pots never were washed

Roadside market advertising described

An effective advertising campaign is essential to any roadside marketing endeavor, says Carl German, extension crops marketing specialist at the University of Delaware.

The marketing specialist recommends that advertising start at least two weeks in advance of any seasonal produce carried. Research has shown that an advertising campaign works best when it peaks one week before the produce is available.

There are two major types of advertising open to the operator of a roadside market. One of these reaches the public through what German calls the "time" media of radio and television. The other includes such "space" media as newspapers, regional magazines, in-the-market display signs, bag inserts, printed flyers, direct mailers, and roadside signs. Each of these reaches a potentially different audience.

How much is spent on advertising will depend on the seasonality of the market. Seasonal products require a greater expenditure for advertising (as a percent of sales) than a market which is open all year. It is considered good business in retail marketing to spend two-three per cent of gross sales for advertising. But the amount needed to spend will depend in part on the length of time the operator has been in business. Some operators have had to spend as much as ten per cent, but have felt it paid off well for them.

A carefully planned campaign will help get the most from advertising dollars. Slogans, trademarks and other techniques which personalize the operation in the mind of the consumer all help make ads have greater impact. The use of your name, a historical event or a natural surrounding in your campaign will help people remember you. A catchy slogan such as, "If it's any fresher it's still growing," is one way to get their attention.

Newspaper advertising has proven a good way to reach the public in small to medium sized cities, says German. Use of the classified ad section permits the operator to make frequent updates on crop maturity and availability. Spot announcements on the radio are a good way to draw beach crowds that pass your way in the summer. Due to costs, these spots must be short and to the point.

Direct mailings can be used by small roadside or pick-your-own operations to tell people when produce will be available. A postcard to repeat customers lets them know you care about their patronage and helps to keep them satisfied. In addition, you may gain new customers through them.

Point-of-purchase advertising, including market signs, is the least expensive and most successful method for most roadside operations. All such advertising should be neat, attractive and well maintained. Height and width of letters are very important, especially if signs are to be read by passing morotists.

New company formed

The Ag Best Corporation has been founded in Nappanee, Indiana and will soon be producing a complete line of portable and modular confinement buildings for livestock.

Howard Sellers, president of Ag Best is founder and owner of Sellers Manufacturing with home offices in Wakarusa, Indiana.

Stan A. Evavold will serve as marketing manager of the recently founded company. Evavold was formerly director of marketing at Tasco and most recently was the marketing manager - Buildings at Star Agri Products in Goshen, Indiana.

Carl Van Gilst will be engineering manager of Ag Best. Formerly he was Livestock Systems Engineer at Star Agri Products.

The principals of the new company will draw from their long experience in farm confinement buildings and equipment to design and build small units to large complexes for distribution throughout the U.S. in addition a full line of livestock confinement equipment will be produced by the company.

KERR McGEE CHEMICAL CORP.

KERR McGEE

(PREVIOUSLY THE BAUGH COMPANY)

Manufacturers of dry homogeneous fertilizers, as well as one of the major producers of superphosphate on the east coast of U.S.A. Basic in phosphate and potash. We own and operate three manufacturing plants located in two states - located in Philadelphia, PA and Baltimore and Cambridge, MD.

With companies such as Advanced Ag and Brookside Lab., you know the importance of gypsum in conditioning the soil. Superphosphate is about half gypsum. Since we produce superphosphate, we then use it as extensively as possible in all our fertilizer analyses. Because of formulation, 10-20-20, for instance has very little (if any) superphosphate; but, 5-10-10 contains nearly one-half ton. Superphosphate is 12 percent sulfur as well as rendering available such other nutrients as calcium, magnesium, sodium, aluminum, barium, iron, boron, copper, zinc, and manganese. These trace elements are not found in any other phosphate source. Consequently, buying a blended product cheaply priced may not be so cheap after all.

Your Kerr McGee representatives are well trained; having contacts with state universities as well as chemical companies to research your problems and aid in your farm management.

It's Know How That Counts!

TRY A CLASSIFIED AD!

Second annual peach festival readied by York Co. grower

GATCHELLVILLE, Pa. — "For lo, the winter is past," rejoiced King Solomon. And in that same strain of celebration, Maple Lawn Farms, personnel are making plans for their second annual Peach Blossom Festival April 24 and 25, beginning at 10 a.m. and 1 p.m., respectively. Moving to a much larger building than last year's site in anticipation of more craftsmen, more homemade food concessions and more guests, this year's event promises to be a real "celebration of life on the land," according to Mr. and Mrs. Paul McPherson who initiated the festival last April at their Gatchellville farm.

Already they have amassed over 30 craftsmen from Maryland and Pennsylvania to show and sell their handiwork; everything from art to ceramics, needlework to refrigerator magnets, hand-painted jewelry to sand art, dolls, wood carving, leaded glass, macrame, scrimshaw, caning, leather craft, rugs, flowers, calico and candles, acryllic blocks, Christmas ornaments, cone craft and Bicentennial memoralia. Bedding plants will also be available.

The Stewartstown 4-H Club will man its petting zoo for children and all animal lovers. In addition to the penned animals, they will offer pony and buggy rides, weather permitting.

True to the spirit of the occasion, there will be peach puree to top vanilla ice cream dipped by the Milk and Money 4-Hers from Airville, while the area Trail Riders 4-H group whirrs up gallons of milk shakes.

Eager to pay for their new fire truck, the Delta Firemen and their Auxiliary under the leadership of Joann Briton will provide fresh pizza from their Pizza Wagon, beef barbecue, baked goods and fudge as well as a bazaar table with crafts and old books for sale.

York County lamb producers will be promoting lamb with lamb-ka-bobs and stew in a unique setting next to the Disabled American Veterans, Baltimore Chapter No. 1, selling the great American hot dog with toppings and coffee.

For dessert in addition to the bake sale tables, there will be the Pennsylvania Dutch funnel cake and ready make to order donuts by the dozen.

"If we can contract some expert apple butter makers, we'd also like to host an apple butter boil Saturday for all to watch and stir. The canned apple butter would then go on sale Sunday by order or on a first-come, first-served basis," announced McPherson.

"Last year's festival brought in a crowd of 2,000 on a weekend unusually cold about a week before the blossoms actually showed. This season's excessively warm weather is pushing the blossoms a little ahead of schedule, but different varieties hold the blossom season over about three weeks," stated the innovative fruit grower.

According to children and grown-ups, one of the most fascinating and fun amusements at the Maple Lawn Farms festival is the peach bin wagon train ride through the orchards where they can see the pruners cutting back branches to keep the trees in shape. The trees offer a veritable sea of pink overhead from which they can take home branches for flower arranging.

Planted in contours, the orchards present a first hand picture of conservation farming. School and group tours can be arranged to view the many conservation measures on the farm as well as other crop operations: apples, corn, blueberries.

"This is a time for venting the pent up exhilerations of spring fever," asserts Mrs. McPherson. "We feel fortunate in having so much beautiful and productive nature around us, we just want others who aren't so close to the land to be able to share in our experiences and joy."

"With our new storage building near the packing house and grain elevators that holds over 50,000 bushels of corn in season, we have planned an event that will be free from the temperament of the weather and fun enough with diverse activity to interest young and old alike. The week after Easter, and two weeks before Mother's Day, we hope the time is right for people to get away from it all and see a little of God's country where their food is produced," she concluded.

Berks Co. farmers hold spring meeting

BERKS COUNTY - On March 22, the Berks County Farmers Association held their Spring dinner meeting at the VFW in Bethel. President William Myers conducted the meeting and called on Mrs. William Moore for the report of the Political Energy Committee and Warren Lamb, the report of the Legislative Committee. William Moore spoke on the "when" and "why" of Association services, including insurance, direct marketing, accounting, and the Safemark tire plan.

James F. Haldeman, Bersk County Agent, was on hand with a salute to agriculture in the spirit of the bicentennial season. Aided by a slide presentation "Heritage Horizens," Haldeman gave the group a look at agriculture at the time of our Nation's birth and traced its progress over ten-year intervals up to the present.

Harry Schaffer, Community Resource Development Agent for S.E. Pennsylvania, addressed the group on the subject of COWAMP, pointing out why the farmer should be concerned about the study for a Comprehensive Water Qaulity Plan for Berks County.

Myers summed up Monday evening's program by highlighting the Association's activities during the past year. Jack Kooker was Chairman of the Program Committee and table centerpieces were fashioned by Association ladies.

Chisel plowing gaining interest

Chisel plowing, a method of tilling the soil that keeps much of the crop residue on top, thus conserving soil and moisture, is gaining in use today. Quoting a recent Illinois survey, Clair Gerberich, Executive Assistant, Lebanon County Conservation District, said that 45 percent of this corn belt states farmers are using chisel plowing. The farmers surveyed grow more than half of their corn and soybeans using a chisel flow tillage system.

The reasons given for this shift to chisel plowing by the farmers interviewed was the saving of time, fuel and reduced cost of seed bed preparation. Also high on the list of reasons for the shift was the availability of better herbicides, former crop yields were maintained, or improved, and a substantial reduction in soil loss from erosion was cited by the farmers.

Of the farmers owning both chisel plows and the conventional moldboard plow 86 percent said they intend to do more chisel plowing.

Karl Hellerick, District Conservationist, Soil Conservation Service in Lebanon, tells me that at least 30 percent of the farmers of Lebanon County are using chisel plowing today. He also stated that soil losses may be reduced by 50 percent by chisel plowing compared to conventional mold board plowing. This is a considerable savings of production inputs, fertilizer, lime in addition to the top soil he added.

But he cautioned chisel plowing must be done with caution to be effective. Gerberich added that farmers wanting to start using this soil conservation practice should call the Conservation District at 272-4618 for assistance in starting this practice.

Berks

[Continued from Page 61]

Weiser. In the four to six division, first place went to Leon Ohlinger, Conrad Weiser, and first runner-up was Lisa Gerhart from the same school. Lori Swavely came in to take first place in the seven to nine division for Daniel Boone and Mark Owens from Conrad Weiser was first runner-up in that division. Cindy Buchanon of Daniel Boone captured first place in the 10-12 division and Sharon Freeman from Conrad Weiser was first runner-up. The winning posters were on display Friday evening, and as students' names were called to accept the awards, each had the opportunity to show his or her poster to the audience.

John P. Schueller, Bernville RD, received a plaque for Outstanding Cooperator of the Year from Mark Wolfskill, a Director of the County Conservation District. A similar plaque was presented to Laverne A. Barrett, Womelsdorf, an agriculture instructor at Conrad Weiser, who was named Outstanding Conservation Educator of the Year. Conservation Cooperator Sign Winners were: John P. Schueller; Joseph D. Gartner, Strausstown; Rev. Ralph E. Starr, Wernersville RD; J. O. Younker & Sons, Bethel RD; and Richard C. Faust, Sinking Springs RD. Floral arrangements were presented on behalf of the District to Mrs. Helen Ann Kratzke, District Secretary, and Mrs. Joseph Linedecker.

The entertainment portion of the program, James's illustrated talk on the 500 acre nature center he helped build in the N. W. corner of Philadelphia, was mainly light and often witty. But he ended his presentation on a more serious note, pointing out that it will not be the farmer or the conservationist who will decide how much land will remain open in Pennsylvania, but by their very numbers it will be the urban dwellers who will have the final say. He considers the education of the urban people to be vital to the preservation of the remaining open space, and the Schuylkill Valley Nature Center is right there, four miles from city hall, to show the city dweller what open space is like.

NPPC initiates job placement service

The National Pork Producers Council, Des Moines, has begun a "summer job placement service" for students in selected agricutlture schools from across the country who are interested in finding summer jobs on a swine operation. The program will also help producers find good summer help.

The NPPC has requested a list from several universities of four students who would be capable and interested in working with a pork producer for the summer. Each applicant has been recommended by his school.

A list of prospective student employees is available from the NPPC. All negotiations from that point on will be at the initiative of the prosepctive employer.

All interested pork producers should contact the NPPC. Their address is: NPPC, 4715 Grand Avenue, Des Moines, Iowa.

HELLO, OLD BEAN!

Don't cook two different packages of dry beans together. Older beans take longer to cook than fresher ones, and a mixed batch will cook unevenly.

Hydraulic Aerial Equipment

Neighbors plow for farmer

MOUNT JOY — In a gesture befitting the closest farm - neighbor ties, several friends of Paul N. Brubaker near here plowed the farmer's field readying for the corn planting season. Brubaker has been a patient in an area hospital since being involved in a tractor accident four weeks ago.

Under the direction of Brubaker's son-in-law Elvin Brenneman, five farmers shared in the plowing task on March 26. Present with equipment were Harold and Hub Frey, James and Luke Brubaker and Daniel Stoltzfus.

TRY A CLASSIFIED AD!

Donald Holzer, in the pit, listens attentively while Dr. Raymond Shipp explains some important points about soil typing. Holzer, a soil scientist for the U.S. Soil Conservation Service, and Shipp, assistant professor of agronomy at Penn State, were just two of more than a dozen experts and dignitaries on hand for the "First Acre Ceremony" late last week. The event marked the beginning of a new soil survey for Lancaster County and was held on the Aaron Stauffer farm, north of Ephrata. Speakers on the program pointed out that land use planning is essential to find the best soils. Lancaster County's first soil survey is more than 30 years old and authorities feel it needs to be redone. "We need to know more about soils," said Benny Martin, state conservationist. Studies have shown that a survey is usually only useful for 20 years, and it is no more expensive to start over new than it would be to revamp an old program. New technology is much improved, Martin noted, and some techniques used in Lancaster County will be a "first" state-wide. To be helpful in all kinds of land-use planning, the study is expected to be completed by 1982 and published within a year after that.

Tobacco market dates changed

ANNAPOLIS - In consultation with the Tobacco Authority, Maryland Secretary of Agriculture Young D. Hance announced a change in the 1976 tobacco marketing dates.

The new dates will have the Southern Maryland auction markets opening on April 13th and closing for the season on June 3rd.

"Unforeseen circumstances make it wise to alter the dates," Hance said, "so after consulting with the Tobacco Authority the new dates were set."

Bicentennial Feature

Heritage dear to Maule family

'Brookdale Farm' - the Maule's home since 1863

By DIETER KRIEG

Editor's Note: This is the 8th in a continuing series of feature articles describing farms in southeastern and south-central Pa. which have been in the same family for 100 or more years. It is LANCASTER FARMING's way of recognizing and saluting agriculture — the foundation of civilization everywhere.

This week we feature Richard and Elma Maule of Quarryville R2 who became owners of "Brookdale Farm" in 1945 — 82 years after it was deeded to the Maule family.

QUARRYVILLE — The thunder of Civil War cannons occasionally cracked the serenity of southern Lancaster County when John C. Maule purchased his own farm 2½ miles south of here in 1863.

Eighty-two years later, when soldiers were returning home from World War II, the 130-acre farm was deeded to John Maule's grandson and present owner — Richard P. Maule.

Now in his early 70's, Richard reflects on his heritage and life's work with genuine appreciation and a bit of concern for the future. He loves the career he chose and is dearly attached to the land — not just his land, but all good farm land, because he realizes it has been good and is essential. "I'm very disturbed about how land is going out of production. They tell us we can move farther west, but out there they need irrigation, they've had dust bowls and tornadoes. Southeastern Pennsylvania is just about perfect, and we're close to good markets," the septuagenarian said.

Richard and his wife, the former Elma Kirk, are not sure when the first Maules came to America. But they do know the first Maules came from France. More recent history of the Maule family is well documented and the couple has a substantial collection of old deeds, books, photographs, newspaper clippings and other paraphernalia which describe previous and present generations.

John Maule at one time lived in Chester County and later moved to Little Britain Township in neighboring Lancaster County. In 1863, at the age of 32, he moved to what has become known as "Brookdale Farm." The property, purchased at a price of $36.70 per acre, has remained in the family ever since. According to verbal family records, cannon fire from the battle at Gettysburg could be heard here when the wind and other conditions were just right. The year was 1863.

John Maule farmed most of the same 80 acres of cropland which Richard works with today. Instead of tractors, the

Bicentennial farm

[Continued from Page 70]

elder Maule relied on oxen for "horsepower." He kept a few cows, made butter, and took it by wagon to Christiana once a week from where it went to Philadelphia by rail. The "iron horses" hadn't been around for very long either. An old newspaper indicated that rail service to Oxford was initiated in the early 1860's.

Compared to today's standards, labor was cheap, and figures from an old record book do anything but disprove that theory. One of John Maule's entries in the 1896 ledger reads: "hired William Rinehart to begin work at $140 for the year, and to be on duty every day of the year unless by special arrangement to be absent." In 1903 Effie McClune was hired to help Richard's mother at $1.50 per week plus room and board.

In 1897 two hogs which weighed a total of 1008 pounds were sold for 4⅝ cents per pound. Noting that swine in those days were markedly different in those days, Richard said he can remember the time when farmers used to brag about how much lard a pig yielded, or how much the hams weighed. Asked if he remembered the past pretty well, the bespectacled, dark-haired farmer responded with a gleam in his eye: "O, yes, I have vivid pictures of the past . . . I can remember how the house, barn and farm used to be."

An annual chore which he has no trouble in remembering is snow shoveling. During his boyhood and even for years after that, snow was removed from driveways, streets and country roads by hand. A notation in John's ledger reveals snow shovelers were paid 12½ cents an hour in 1902. The age of the engine-powered snowplow had not yet arrived. People shoveled miles of roadways just to get back and forth and to be able to market their produce.

One such episode occurred even after trucks took over the road-clearing duties. Richard and a hired man were informed that the plow could not make it to the farm but that the road needed to be cleared anyway. So the two young men grabbed shovels and pitched the snow to the side. Completing the chore after clearing nearly a mile of snow-covered roads, the pair fell into a snowdrift completely exhausted. A moment later the snow plow came by. Known for his streak of humor and wit, Maule laughs about the incident today but admits it wasn't too funny then.

Written records and descriptions of activities on the Maule farm note that there was always something to do. That's still true on today's farms, but the work has obviously changed. A century ago, for example, a man with a team of two horses and a one-bottom plow would labor all day to turn an acre of ground. That was considered a "fair day's work." Hay was stored in the barn loose and hauled into lofts by means of hooks and ropes which were often maneuvered by a child on horseback. When a "coffeebreak" was called for the men and boys refreshed themselves with cool spring water, blackstrap molasses and cookies.

The threshing machine was a sight to behold — if not experience. Richard points out that the thresher got two happy looks — the first when he came and the second when he left. In between it was mostly dust and chaff flying through the air which made things a bit uncomfortable.

It was 1917 when the Maule family acquired its first automobile. Richard's father, Norman C., was the proud owner. Good roads were something to be desired, and Richard and Elma can well remember days when both self-propelled and horse-drawn vehicles were sunk into mud up to their axles. Their farm is located east of Route 472 on Solanco Road which wasn't paved until 1952.

Thus was Richard Maule in 1915. A newspaper account of the unusual sight said: "Visitors often stopped in wonderment as they saw the yoke of oxen standing alongside some high-powered motor car. The Maule youngsters know how to handle and ox goad to perfection and that's something that not one out of 1000 kiddies in this age can do." Maule recollected that the pair of Holstein bull calves were just as gentle and cooperative as one could wish for.

According to newspaper articles of more than 50 years ago, Norman Maule was quite a progressive individual. He was one of the organizers and first president of the Lancaster County Extension Association, which in those days was known as the Lancaster County Farm Bureau. He also assisted in the formation of the Inter-State Milk Producers Cooperative and was a loyal and active member throughout his farming years.

The oldest silo in Lancaster County was erected on the Maule farm in 1896 and is still in use. Built of native stone, the "square" structure has walls 18 inches thick. Interior dimensions are 14 feet by 15 feet by 22 feet high. Norman once told a newspaper reporter "the old silo answered purposes well and silage kept perfectly in it." In 1916 he built a second stone silo — this time in the more conventional circular fashion. That storage facility has since been added on to.

Bicentennial farm

[Continued from Page 71]

The Dec. 16, 1920 "Lancaster News Journal" wrote the following about the Maules' farm as it was 56 years ago: "Mr. Maule thinks a lot of his animals in the barn but he thinks a lot more of his family in the house and has done everything possible to make them comfortable and happy." The writer went on to say that the Maule home was equipped with so many electrical gadgets that many housewives in the city would be envious. A portrait of Norman portrays the family man with all four of his children stacked on either his arms or shoulders. Norman stressed the importance of raising his children well since they would someday take over where he left off.

Electricity came to "Brookdale Farm" about 63 years ago. Along with it came an electric washing machine, an electric sausage cutter, clippers, a grindstone, and most anything else which was available at the time. The writer of the article in the "Lancaster News Journal" concluded his story with: ". . . it is a cobwebless farm, which is so unusual that it is in a class by itself."

The Maules' present home was built in 1882. Lime mortar and stone were used to erect the 20-inch thick walls. The original home had stood in the pasture and was built of logs. Although electricity has been a part of the farm energy scene ever since it first became available in the area (first by storage batteries, and in 1920 by power lines), one segment which has never been electrified is the water supply system. An old ram still pumps water. "They claim they never wear out," Richard commented, adding that it works well enough to supply two houses and a barn with water.

Maule is presently working with 60 milking Guernseys and 10 head of youngstock. In his younger years he worked with three farms which encompassed 385 acres. Today he works mostly with Guernsey cattle, corn, alfalfa, and a little wheat. At one time the Maules also raised potatoes, hogs, and sheep.

Members of the Oxford Friends Meeting, the Octorara Farmers Club, and the Colerain Grange, both Richard and Elma Maule have been civic-minded and altruistic for all of their lives. Both appreciate their way of life and the neighborhood they're in. Richard remarks: "We're fortunate to be located among congenial, cooperative neighbors."

The scope of their appreciation for their past and concern for the future was summed up by Mrs. Maule, who is a retired school teacher. "My concern — especially now during the Bicentennial — is that we elect good men for office, and that we strengthen our nation's morals and eliminate problems with drugs and drinking," she said.

Mr. and Mrs. Richard P. Maule, Quarryville R2, look over just a few of the items they've collected which tell of their heritage. Mrs. Maule, a Temple University graduate and former school teacher, holds an apple pealing device which was used in the days when most everything was home-made, including apple butter and soap.

CHESTER CO. DHIA MONTHLY REPORT

The two champs for Chester County's DHIA report for February are Jefferson Yoder's No. 13 and Earl Weir's "Cantell." Jefferson's seven-year-old Holstein produced the most butterfat in 305 days with 944 pounds to her credit. She had 20,850 pounds of milk to go along with it. Weir's eight-year-old Holstein came up on top in the milk department with 24,786 pounds. Her 3.3 test left her with 826 pounds of butterfat.

Following are the herd averages for February, with John S. Stoltzfus leading George P. Lamborn by two-hundredth of a pound of butterfat.

Agriculture and metric system is subject of U of D conference

A metric conference is planned for May 3 and 4 at John Clayton Hall on the University of Delaware campus. A special feature of the conference will be a section on agriculture and conversion to the metric system.

A general session in the morning of the May 3 meeting will include chief economist of the American Farm Bureau Federation, Eugene Hamilton, speaking about "An Agriculture Viewpoint."

Planned for the afternoon of the May 4 session, a special section on agriculture will feature William David, a member of the Board of Directors of the Delaware Farm Bureau Federation, as moderator. Speakers for agriculture will include Ralph Jackson, executive vice-president of the American Soybean Institute, speaking on "SI Metric - Its Effect on International Soybean Trade." R. R. Sjoberg, chief engineer of the International Harvester Company, will discuss "Agricultural Equipment and Metrication."

Other speakers for the conference include Virignia Knauer, Special Assistant to the President for Consumer Affairs, luncheon speaker for the Monday, May 3, meetings. She will talk about "Metrics and the Consumer." Representatives from the National Bureau of Standards, U.S. Office of Education, Delaware Better Business Bureau, Consumer Affairs, Council, and the Good Housekeeping Institute will also be on hand to discuss metrication.

The conference is being sponsored in part by the Delaware Cooperative Extension Service. All interested persons are invited.

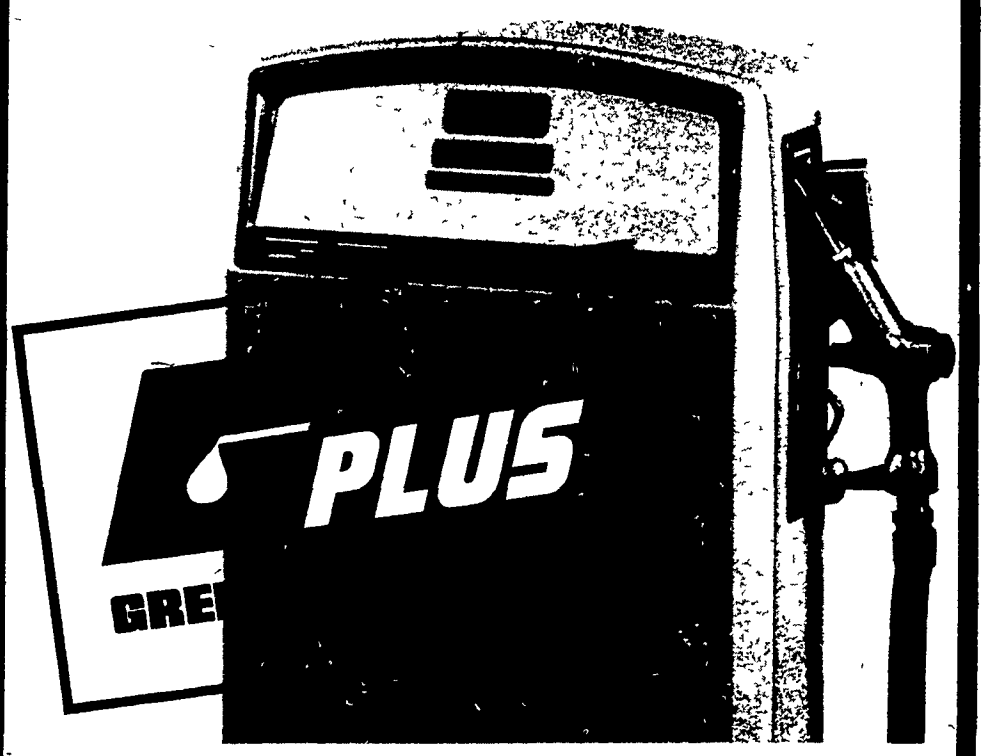
THE BLENDERS CHOICE



Combines the best features of Agway's #1 and #2 Green Diesel to give you a superior, year-round, premium-grade fuel.

You get these features:

- quicker engine starts than from a #2 fuel
- dependable fuel flow in cold weather
- more power than from #1 fuel
- practically smokeless operation.

And Agway's complete additive package lowers injection maintenance costs and prolongs engine life.

New Agway Green Diesel Plus is the very best fuel for your diesel tractor, all year long.

For complete details, call your Agway Petroleum man, today.

AGWAY

Vealers...
Agway-Provimi Style

Go for the premium prices. Go for the extra profits that only an established program like Agway-Provimi can provide.

Quality makes it all happen.

Agway-Provimi veal has a high degree of finish, a firm texture with even marbling, and a creamy-white color—much in demand by fine restaurants across the country. And they're willing to pay top dollar for top quality.

You'll have the assistance you need. Agway will help with housing and facilities. The Provimi man in your area will help with calf procurement, information on feeds and feeding, medication, and marketing.

Take advantage of these services, and lock into this market now.

It's a seller's market

Lancaster COUNTY DHIA MONTHLY REPORT

FEBRUARY 1976

A registered Holstein cow owned by Titus B. Stoner, Landisville, completed the highest 305 day lactation. Dawn produced 20,257 pounds of milk, 875 pounds of butterfat with a 4.3 percent test. Second high lactation was completed by a registered Holstein cow owned by Rhelda & Lynn Royer; Lancaster. Dove produced 21,979 pounds of milk, 870 pounds of butterfat with a 4.0 percent test in 305 days.

The herd of Ben K. Stoltzfus, Gordonville R1, had the highest daily butterfat average. This herd of 34.0 registered & grade Holstein cows averaged 59.5 pounds of milk, 2.20 pounds of butterfat with a 3.7 percent test. The herd of Jacob S. Dienner, Gordonville R1, placed second. This herd of 35.8 registered Holstein cows averaged 59.2 pounds of milk, 2.19 pounds of butterfat with a 3.7 percent test.

FIRST 305 DAYS OF LACTATION WITH 625 OR MORE POUNDS OF BUTTERFAT.

Facts for dairymen

By Alan Bair

Assoc. County Agent
Lancaster, Pa.

Barn Charts Provide Clues to Breeding Problems

"Let me see your Stable Breeding Chart" is generally my greeting to a dairyman asking for help with a breeding problem. Harvey Shaffer, our PSU Extension Specialist working with breeding probelms, has found the barn chart to be an invaluable aid over the years in solving breeding problems.

Important clues to a herd breeding problem can often be found on the barn chart or other record form where services are noted. By checking the service intervals over a period of several months, it is possible to get a good idea of the management practices and other conditions related to breeding efficiency.

Most cows come in heat and ovulate at intervals of about 21 days - 18 to 23 days is considered a normal range. Some heat periods are quite short and the signs of heat may be rather weak, but true silent heats are rare. When we see a number of service intervals of about 42 or 63 days, it's a safe bet that somebody is failing to observe all of the heat periods. It is also probable that detection of some observed heats is not accurate enough to insure proper timing of service.

On the other hand, when service intervals are consistently 18-23 days, we should not assume that the cows are being bred at the proper time. When a cow is bred several times at regular intervals, it is possible that the services have been too early or (less likely) too late in relation to ovulation. This can easily happen if mucus discharge is relied upon as the sign of heat.

Service intervals of less than 18 days should suggest that cows are being bred when they mount other cows, rather than when they stand to be mounted. We still find a number of herds where this is the problem. Usually short intervals can also occur when cows have cystic ovaries. However, this condition affects relatively few cows and is seldom a factor in herd breeding problems.

We sometimes see herds where service intervals of 25-39 days are common. This is often the result of a persistent uterine infection. A small pocket of pus in the uterus can affect the hormone balance in much the same way as an early pregnancy. The C. L. or yellow body is retained for a time, preventing the cow from returning in heat. Unfortunately, cows can have these infections and go unnoticed unless the A. I. technician calls it to the dairyman's attention.

Erratic service intervals of more than 50 days often suggests early embryonic death, although infections can occasionally delay the return to heat for this length of time. Intervals of this length may also involve missed heats.

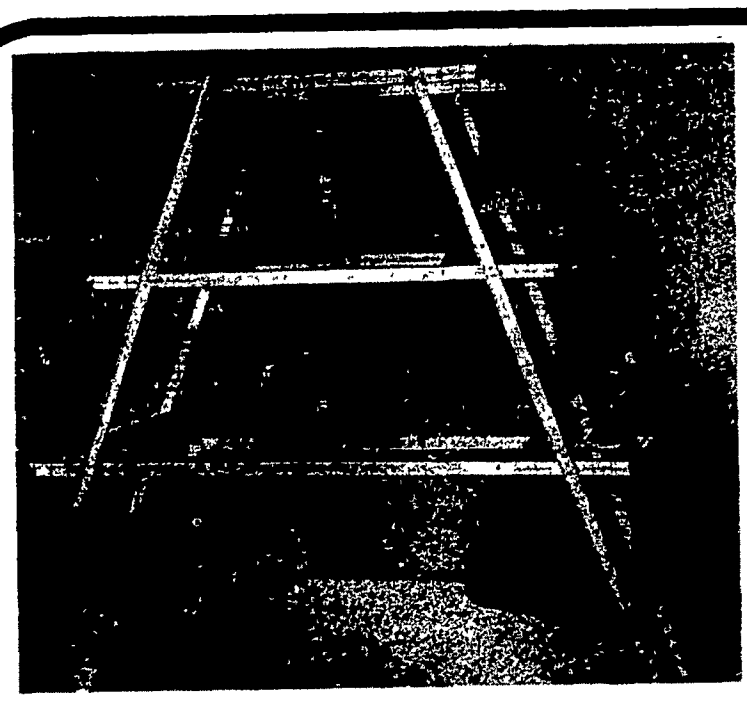
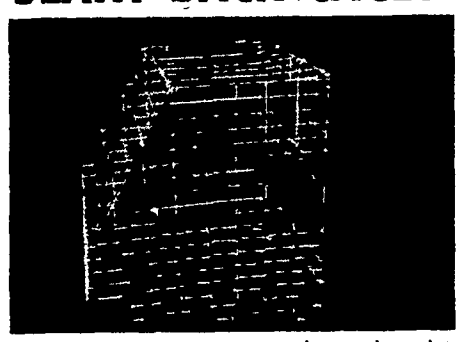
NORTHCO
SLANT BACK CAGES



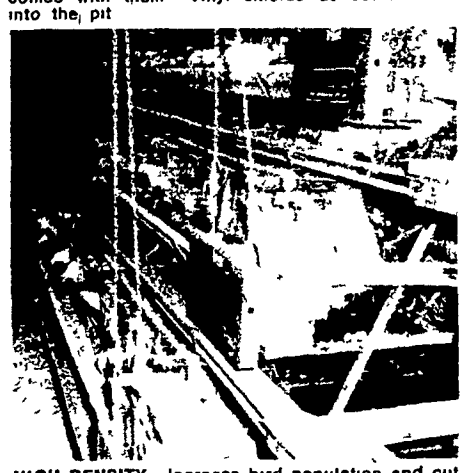
Northco High Density/Slant Back Systems are the functional way to make more from your investment. More profit. From more eggs. Produced by more birds. Only one thing comes up less . . . your labor.

Northco roof exhaust ventilation helps your system produce more. Fresh, clean air moves continuously through the house.

Find out more about Northco High Density Systems. Available with exclusive core-type auger feeding and patented automatic egg gathering.



SLANT BACK. This unique cage design eliminates dropping board scrapers and the work that comes with them Vinyl shields deflect manure into the pit



HIGH DENSITY. Increase bird population and cut building costs with Northco High Density/Slant Back Systems A 36 ft wide house can easily handle four rows of triple deck 16 inch deep cages

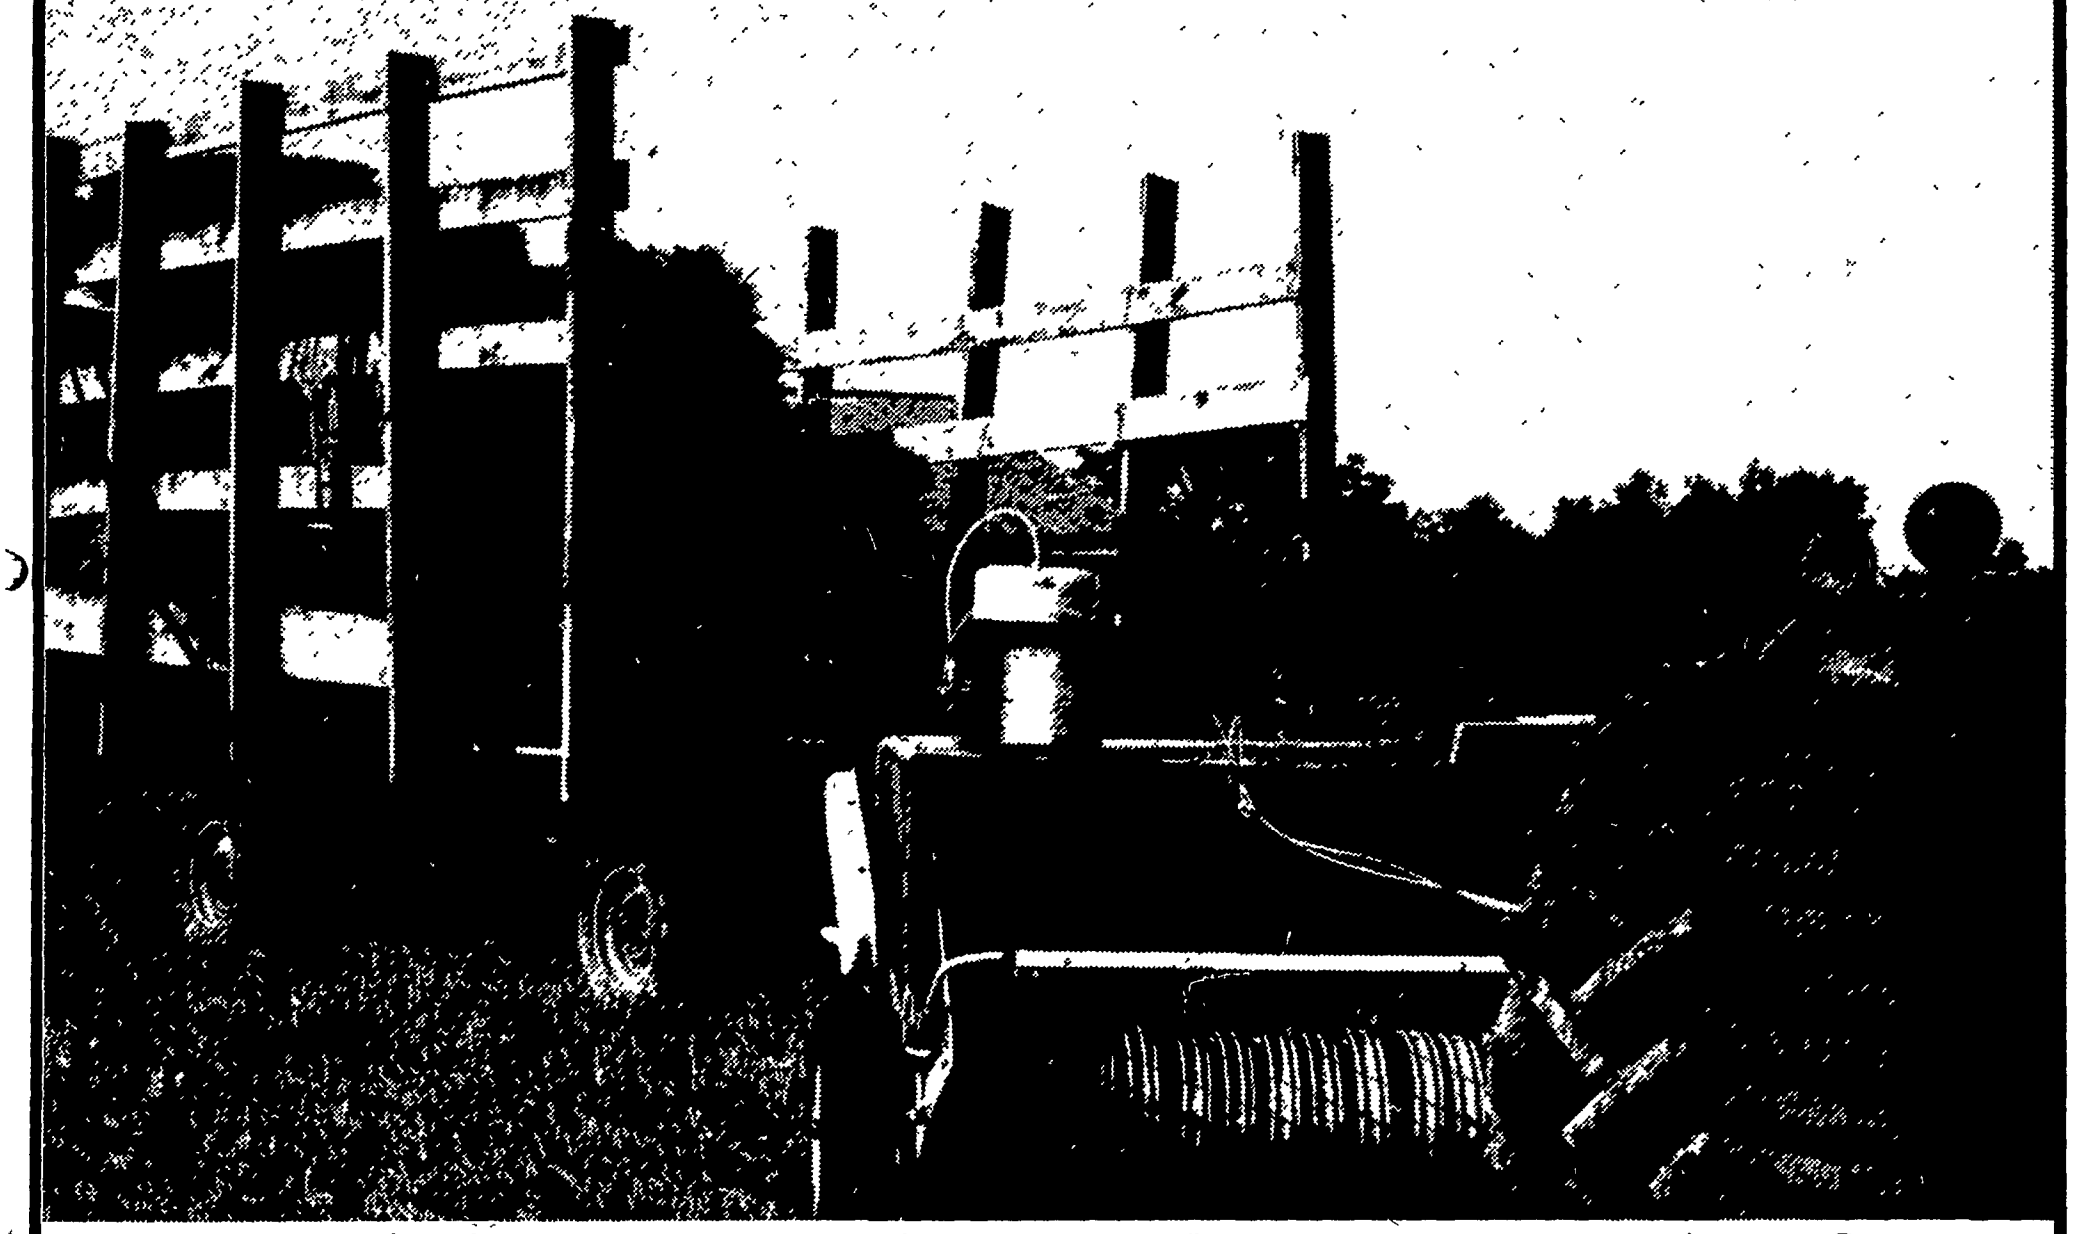
NORTHCO FARM AUTOMATION SYSTEMS ®

Beat the weather



Get the most feed value out of your hay with Beacon Hay Pre-Serv*

You get more milk per ton of hay when you treat your hay with Beacon Hay Pre-Serv. Hay Pre-Serv lets you cut hay as much as 26 hours earlier, at moisture levels up to 25%.

This means a larger hay crop, with less leaf loss and shattering, and less risk of weather damage. Hay Pre-Serv is easily applied to baled, chopped or stacked hay and prevents mold, spoilage, oxidation and excessive heating.

You get better color, improved palatability and more digestible nutrients in every ton of hay you cut.

If you grow succulent forage crops, make the most of them with Beacon Silage Pre-Serv.* With Silage Pre-Serv you can harvest at moisture levels from 40 to 70%, and get as much as 30% more feeding value per ton of roughage.

Recovery of cattle business expected in second quarter

COLUMBIA, Mo. - Cattle feeders will probably have losses during the present three months but some recovery in the business is expected in the 2nd quarter.

This is the news Missouri cattle feeders heard last month at the annual Cattle Feeding Seminar at the University of Missouri-Columbia.

The cattle industry depends heavily on the supply and price of feed grains, and these are unpredictable for the next several years. Cattle feeders will have to deal with the uncertainty of grain production and with consumer demand.

Over the next few years profit levels may be average or better for cattle feeders, said Glenn Crimes, UMC extension livestock marketing specialist.

Consumer demand for beef has been increasing as incomes have risen. But with the main increase in income attributed to inflation, the beef industry may not get its usual share, Grimes said. In 1974 and 1975, most of the increase in income was reflected in beef prices.

"I am optimistic that at least part of the increase in income will be reflected in beef prices," he said.

The number of cattle on feed in the 23 major cattle feeding states on Jan. 1 was 28 percent larger than a year ago, but below 1973 and 1974. This means that more fed cattle will be marketed in the next six months, compared to last year.

Grimes expects the slaughter of non-fed steers, heifers and cows to be less this year than in 1975.

How much less is a guess, he said, but if non-fed cattle are slaughtered at the same rate as the past three months, the price cattle feeders will be getting for their larger marketings will be "severely depressed by March," Grimes said.

"We believe there is a good possibility for substantial strength in cattle prices in the second quarter of this year," he said.

Cattle numbers will surely be reduced materially over the next two or three years if corn prices stay high relative to the price of fed slaughter cattle, Grimes said. If cattle numbers are reduced as expected, he said, the number of cattle slaughtered will be quite large for at least two more years.

Grimes believes that the nation's cattle numbers have been overestimated, that the buildup in the last eight years had not been as great as USDA has reported.

He said that steer slaughter has been smaller than would be expected from reported cattle numbers. USDA reports are compiled by sampling procedures.

With no severe drought and corn prices ranging from $2.25 to $2.75 with cattle numbers a little smaller than reported, and with about half of the expected increase in income reflected in beef prices, Grimes predicted Choice steers to average $45 at Omaha this year and Kansas City feeder cattle, both calves and yearlings, to bring in the low $40's.

He expects slaughter steers to increase to $48 in 1977 and feeder cattle to remain about the same as this year. Grimes said Choice steers should bring $55 in 1978 with feeder calves in the low 60's and yearlings in the upper $50's at these locations.

"The weather, feed supplies and prices, slaughter cattle numbers and consumer demand could change all this," Grimes said.

"With the conditions I have assumed, cow-calf producers have at least two more years of relatively undesirable prices," he said. "Drought could deal the biggest blow."

Grimes said the best course of action would be to continue a large cow slaughter this year.

Chester Co. youth builds nature trail

In the village of Coventryville, Chester County, there is a unique project being carried out. Tom Graydus, a sophmore in the agriculture program, at Owen J. Roberts High School has been developing a well planned Nature Trail for the past two and a half years on a section of 5 acres of woodland near his home.

Tom has a strong interest in nature and ecology, and his trail highlights ways in which wildlife can be protected. On the trail route there are various signs and stations constructed which point out different wildlife habitats. Tom conducts tours consisting of children or adults through the trail on weekends and on 4 days every week in the summer. As one passes through the quiet and colorful woodland, he notices artificial dens constructed by Tom which house rabbits, weasels, ground hog and quail; also a dam built on the stream which is stocked with trout and bass. Tom's activities also include raising quail to be released in the wild.

Tom's work in preserving our enviroment is important during times of rapid urban growth, which is eleminating much of the beauty of nature. If interested in a personally guided group tour call Tom Graydus at 215-469-9132.

Fulton Grange confers degrees plans supper

Fulton Grange 66, presented first and second degrees to new members during the March 22 meeting.

All members were reminded of the turkey supper on April 3 from 4 to 8 p.m. Mrs. Laura McSparran, lecturer, urged members to enter the State Grange art and photo contests.

The next meeting, April 12, will be third and fourth degrees. The April 26 meeting will be Youth Night with youths filling the officer chairs.

Krank explains debt moratorium

At an open house at his congressional campaign headquarters, congressional candidate Donald F. Krank stated his position with respect to Martin Ross, the Labor Party candidate, in answer to a question from a guest: "Although it was not reported in the press, I answered Mr. Ross' question (which was not a difficult one) at the conservative caucus meeting. I believe the danger in America lies in not recognizing the first amendment right to freedom of speech and in leaving questions such as those of Mr. Ross unanswered. Mr. Ross asked whether the candidates favored debt moratorium, which he and his labor party do. Debt moratorium would be an amnesty on payment for a period of time of any debt obligations of corporation, municipalities and individuals. The answer to this question is obvious to any American who thinks. World wide debt moratorium would lead to total financial collapse. It is this atmosphere of financial collapse that the communists are working for in order to accomplish their goal of world wide domination."

There are practically no taste buds in the center of the tongue.

What's New

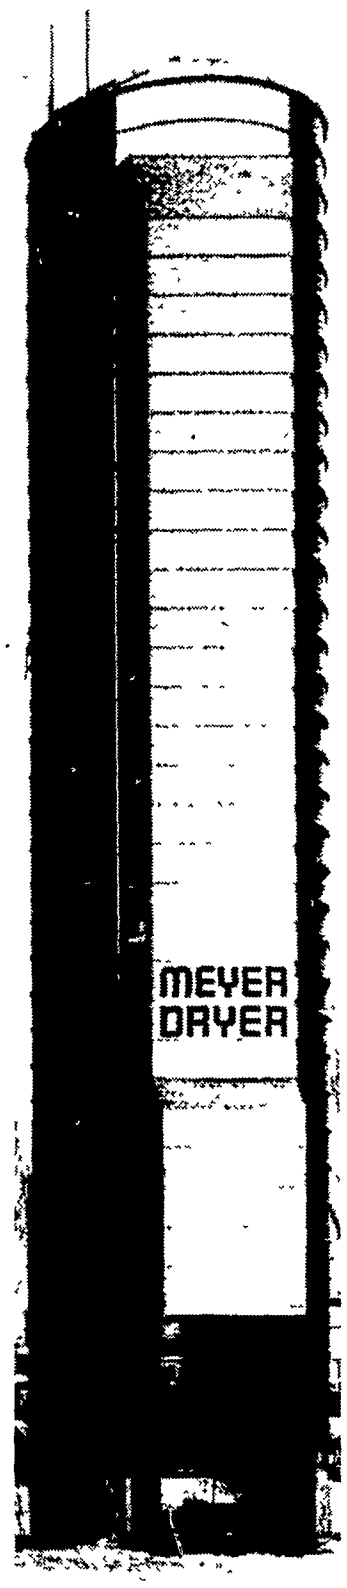
Grain Dryer

Meyer-Morton Company, Morton, Ill., has introduced for 1976 a new Meyer-Dryer Model 1100 continuous flow, high capacity grain dryer. This new unit can dry up to 1,700 bushels per hour of shelled corn when removing 5 pts. of moisture - 20 percent to 15 percent and is available with baked on silicone finish for extended life.

The manufacturer states that, "With erection costs of other type grain dryers sometimes running as high as 50 percent of the total cost of an installation of comparable size, a Meyer-Dryer has an exceptionally economical advantage, because it is delivered completely factory assembled and pre-tested to the job-site on its own gantry transport, and then hydraulically lifted into vertical position on its own base. All that remains is to connect the fuel and electrical lines, plus loading and unloading discharge tubing.

Other cost saving features include: A positive metering system composed of fewer moving parts than other makes, which provides longer operating life and less maintenance; High efficiency fans that require low H.P. motors which use less electrical power; Lower fuel costs with baffle-plate gas burners that operate on low pressure gas; Super large plenum air chamber that exposes more grain to heat and air; and can dry high moisture grain with one cycle.

The manufacturer also states that: The new Model 1100 Meyer-Dryer has all safety control features which qualify the dryer for lowest insurance premiums; Uses less space than other make dryers of comparable capacity; Quiet operation; Walk-in access to interior for easy cleaning and maintenance; and all units are backed by a national Meyer-Morton dealer organization for parts and service. For further information contact: Meyer-Morton Company, P.O. 419, Morton, Ill. 61550.



WALKER GORDON FARMS

PUBLIC AUCTION

SAT. APRIL 10, 1976

At 9:30 A.M.

Place Walker Gordon Farms Plainsboro Road, Plainsboro, NJ. 1 mi. east of Rt. 1, 3 mi. east of Princeton, NJ.

Farm & Feedlot Equipment 9:30 A. M.

NFU recommendations sent to Washington, national convention proceedings outlined

WASHINGTON - Several recommendations from the 74th annual convention of the National Farmers Union, which concluded March 18th at New Orleans, have already been transmitted to the White House or the U.S. Congress.

More than 2,000 delegates and participating members of Farmers Union attended the five-day convention, which among other official business, unanimously re-elected Tony T. Dechant for another two-year term as president, and elected a new vice president, George W. Stone of Oklahoma, to succeed retiring vice president E. W. Smith of North Dakota. Dechant, who also serves as the president of a global federation of farm organizations, the International Federation of Agricultural Producers, has headed the Farmers Union since 1966.

Among the policy positions already directed to policy-makers in Washington are:

A message asking President Ford to put a halt to efforts by USDA to scale down the Federal Crop Insurance program has been sent to the White House over the signatures of state and national Farmers Union officers. The statement declares that it is "discriminatory and of highly questionably legality" for USDA to seek to discourage farmer participation in the 1976 crop insurance program after the counties and crop coverages had been designated and published for this crop season. Farmers Union charged that the crop insurance program is being cut back in as many as half of the counties in some major agricultural states. It rejected the contention that the cut-back was necessary because of high risk - "it is because of the high risk that the program is needed," said the statement.

A special order of business adopted by the convention on March 16th, pointing out some immediate measures which could be taken to hold palm oil imports to reasonable levels, was presented to the oilseeds and rice subcommittee of the U.S. House Agriculture Committee on March 18th. The statement declared that import quotas and duties could be imposed under Section 22 of the Agricultural Act of 1933, on the grounds that the level of imports, which has doubled in the past year and is projected to triple to 1.1 million tons a year by 1985, will interfere with the operation of the soybean crop loan program for 1976 and reduce volume of vegetable oils processed by domestic processors.

Another special order of business, relating to revisions and improvements in federal estate and gift tax statutes, was presented to the House Ways and Means Committee on March 19. The recommendations include lifting the federal estate tax exemption from its present $60,000 level to $270,000; lifting the life-time gift tax exemption from $30,000 to $60,000 and the annual gift tax exemption from $3 to $6 thousand per person. Farmers Union also urged that the first $240,000 of business or farm property be allowed to be transferred to the surviving spouse, tax-free, at the time of death. The statement also recommended that the productivity or use-value of the land be used in determining the value of a farm estate.

A convention recommendation that no export controls be applied to any farm commodity selling at less than 110 percent of parity was transmitted on March 23 to the International Finance Subcommittee of the U.S. Senate Committee on Banking, Housing and Urban Affairs. The Subcommittee is hearing testimony on a three-year extension of the Export Administration Act of 1969, which expires Sept. 30th of this year. This is the statute under which embargoes or other limitations may be imposed upon exports of food or other scarce commodities.

In their policy statement for 1976-77, Farmers Union delegates asked that a comprehensive, integrated farm and food policy be built upon the foundations of the farm stabilization statutes of the past 40 years. Coordinated programs of farm price and income supports were urged to assure 100 percent of parity to producers.

Delegates also urged U.S. cooperation in International commodity agreements including pricing provisions comparable to the 90-110 percent of parity range advocated for domestic programs: Creation of world grain reserves designed and administered to protect farm income: and cooperation in world food aid efforts.

Farmers Union urged adoption of a strong federal statute on strip mining, safeguarding the rights of owners of farm land below which deposits of coal exist.

In the only instance in which a floor fight took place, the convention adopted a minority report urging Congress to enact a moratorium on the "licensing and operation of nuclear power plants until their safety is assured."

At the opening of a session on commodity price and supply outlook, President Dechant announced that he would appoint Farmers Union commodity councils to coordinate state and national efforts to evaluate the commodity situations and reflect Farmers Union policy positions.

Don Paarlberg, USDA Director of Agricultural Economics, said he was guardedly optimistic that "U.S. farmers, who have survived a series of economic storms in the past several years, can look forward to more stable conditions in the immediate future."

U.S. Senator Hubert H. Humphrey told the convention that farmers will have no one but themselves to blame if they elect an administration unfavorable to farmers.

Humphrey said that three of the last six years have been the worst for farmers since the 1930's, noting that the parity ratio for 1970 was 72 percent, for 1971 it was 70 percent or parity, and for 1975 it was 73 percent of parity.

Pulitzer prize-winning investigative reporter Jack Anderson flatly asserted that more indictments of high grain officials will result from the export grain inspection scandal. Anderson, author of the widely-published column, "Washington Merry-Go-Round," said Justice Department officials are determined to prosecute major offenders and warned that new revelations would be at export ports other than those on the Gulf Coast.

Dr. M. P. Cracknell, Secretary-General of the International Federation of Agricultural Producers, told the convention that "food power can be converted into farmer power only if farmers discard narrow regional and commodity views and recognize the relationships uniting the whole farming community."

Cracknell said that if farmers continue to hold narrow regional and commodity views they will "play into the hands of those who seek to dominate agriculture by keeping farmers divided."

Two regional cooperative leaders stressed the importance of cooperation between farm organizations and farm cooperatives.

Jerry G. Tvedt, president of Farmers Union Central Exchange (CENEX) and chairman of the board of major regional fertilizer cooperative, CF Industries, said farm organizations and cooperatives must work together vigorously to reduce the information gap about agriculture and cooperatives.

Jewell Haaland, chairman of the board of Farmers Union Grain Terminal Association, said "the number one challenge facing farmers is to gain a much larger share of the grain export business by building a strong co-op grain exporting organization."

Feminist and womens rights activist Roxanne Conlin came down hard against the system that perpetuates discrimination against females.

The Iowa Assistant Attorney General said many state and federal laws discriminate against women on property ownership and inheritance "often not acknowledging the wife's right to property. The unfairness is overwhelming," she said.

Mayor Moon Landrieu of New Orleans, president of the U.S. Conference of Mayors, urged rural and urban America "to build together."

"It is going to take a concerted effort, local, state, and national to save our great cities and our family farming system," he said.

Dr. J. Robert Busche, Assistant Executive Director of Lutheran World Relief, told the convention banquet session that a strong

(Continued on Page 90)

FREY FREE STALL

LIFETIME FREE STALL HOUSING

Cut bedding costs 75 per cent, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6". Size 'em by breed.

Our free stall partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10" concrete curbs to hold and retain bedding. Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing.

- 8 Models all steel welded farm and feedlot gates
- 2 Models all steel welded head catch gate

Pollution ruling sent out

The Environmental Protection Agency has announced regulations for the long-debated pollution permit program for farm feedlots.

EPA ruling specifies that concentrated agricultural livestock operations aren't required to get permits, if pollutants aren't discharged into navigable water. However, operations with discharges through man-made conduits may still have to apply for permits.

The regulations provide that feedlots with fewer than 300 animal units won't need permits, unless a complaint and on-site determination demands it.

For feedlots with 300 to 1,000 animal units, permits will be required only if livestock come into contact with a stream. Or, if pollutants are discharged through a man-made conveyance.

Feedlots with more than 1,000 animal units must get a permit if they have any type of pollutant discharge.

EPA officials predict that of 718,000 beef, dairy and swine feeding operations in the U.S., about 3,240 will need permits. Farmers who qualify for permits should contact their state or regional EPA offices as soon as possible.

Funding, exports, and conservation discussed

"It is possible for us to wake up someday and discover too late that we have been robbing research, extension, conservation and other agricultural programs, while excessively expanding welfare programs," Virginia Congressman William C. Wampler told officials of the Agricultural Stabilization and Conservation Service on March 19.

The ranking minority member of the House Agriculture Committee explained details of the Budget Control Act to ASC State Committeemen and State Executive Directors from a 17-State area at a gathering in Williamsburg, Virginia.

Claude Hetherington of Zion Grove, Chairman of the Pennsylvania State Agricultural Stabilization and Conservation Committee, and members William Ringler of Berlin and Harry R. Ulrich of Hummelstown attended the two-day conference. Kenneth H. Boyer who heads the Pennsylvania State ASCS office in Harrisburg also participated.

"The significance of farm exports to the economic well-being of our country has never been greater than it is today," Dale Sherwin, Agriculture Deputy Assistant Secretary for International Affairs and Commodity Programs, told the group. He cited last year's $12.6 billion agricultural trade surplus as a "significant factor" in beginning economic recovery. Sherwin predicted a similar surplus for fiscal 1976.

Elvin J. Person, ASCS Deputy Administrator for Programs, encouraged the assembled farm program administrators to make whatever efforts they could to reduce the national deficit by reducing expenditures when possible.

Challenging the conference participants both to follow and lead in farm policy, Edward D. Hews, ASCS eastern region director, reminded the group that they were hand selected as leaders in their states. "You are the key to the future success of agriculture," Hews told the assembly.

Ray Hunter, head of the Washington office handling ASCS conservation programs, reviewed program changes in light of changing public attitudes toward conservation. The U. S. "can no longer be a throwaway society," Hunter said. Renewable resources such as soil, timber, and land must be managed in such a way as to maintain their productive capability. Fuel, food, metals, and non-renewable resources must be conserved until alternate or new replacement products are developed. World needs for food and energy will continue to grow very rapidly, so let us not waste it, continued Hunter.

Acres of farm equipment were visible to the tourists which swamped the small village of Kempton during the annual spring sale.

Ralph W. Zettlemoyer, auctioneer during the Kempton Sale, urges bidders as people mill around under the block.

Berks Co. village swamped with tourists for sale

By JUDY MITCHELL
Berks Co. Reporter

KEMPTON - A stranger entering Kempton and following the signs to the Community Center at any time of year is struck by the size of the Center which is located high on a hill on the edge of the tiny rural village, but the spectacle of the Kempton Community Center Spring Sale which covers approximately 10 acres of the Center grounds is really a sight to see. The people of Kempton seem to have become accustomed to the crowds which come for the event and this year thousands flocked to the 13th annual sale held on March 25, 26 and 27.

The sale began on Thursday evening at six with the auctioning off of household goods and antiques with the bidding going on until past midnight. At 11 a.m. on Friday, the sale resumed with the cattle auction and by 1 p.m. a total of 33 head had been sold. Dairy cows, which included thoroughbreds, averaged $840 per cow with four cows purchased at $1,000 and a good number bringing prices in the nine-hundreds. Bred heifers, some also thoroughbreds, averaged $350 and bulls $300. The sale continued throughout the day and night, again until past midnight, with more household goods, antiques, and the estate of Stella I. Eck of Kutztown, but the biggest day of the sale was still to come.

Cars jammed the parking areas as people arrived for Saturday's sale of farm equipment which began at 9 a.m. Ten rotating auctioneers were in the field with six calling bids at any given moment as the auctioneer trucks moved through an amazing assortment of farm equipment. In spite of the rain which began in the afternoon, the bidding went on until dark. Although it will be weeks before the results of the sale are available, a sample of equipment sold was: two road corn pickers bringing $990 each; a baler $600; harrow $390; plow $350; wagon $360; small tractor $430; and harvestor $475. The highest bid of the day was probably the $18,000 bid for a combine but the owner refused the sale.

The three-day sale which technically ended with the material, mill end and yard goods auction which went on until past eleven Saturday night is actually extended to one more day. Due to the volume of farm equipment handled, tractors, trucks and cars are auctioned off on the following Wednesday. Some of the auctioneers for the sale were: Jim Bevins, John Fry and Son George Fry, Harry Gruber, Douglas Houser, Jim Moore, Nelson Weidenbaugh, Ralph Zettlemoyer and son Sherwood Zettlemoyer.

The Kempton Community Center sale is organized and operated each year by the voluntary efforts of its members, chaired by Russell Henry of Kempton R1, a local farmer who has been involved in community activities for more than thirty years, and the percentage of profits earned by the organization go to help support the Center. The Kempton Community Center began with an organization of local citizens back in the mid fifties. The organization, which originally had no building for community functions, joined membership with the Kempton Community Park Association sometime in the early sixties and shortly after the combined citizen groups purchased the property on which the present Center stands. The center now draws its membership from as far as Lehigh County and its facilities are open to the public.

Strawberry planting tips

Now is the time to plant strawberries, if you want a crop ready for harvest next spring. The sooner you get them in, the better, since the best berries come from well-established plants.

For your strawberry bed pick an open, sunny location with fertile, well-drained soil. Any site where vegetables grow well should be ideal for strawberries, too. It takes about 50 to 75 plants to meet the needs of the average family. Spacing varies with the system you use,

For best yields, gardeners recommend replacing strawberry plants every four years. After that period of time they start to decline and disease problems set in. It is possible to begin a new bed using daughter plants from your original planting. The trouble with this approach is that if a virus has developed in your original berries, it will infect their offspring, too. For this reason it's wise to reorder virus-free strawberry plants from a reputable dealer. Prices are based on lots of 25 plants. They average around $4.25 to $4.50 a lot now. Considering the returns, they're usually a worthwhile investment. By the end of the season each of your original plants will have multiplied itself fourfold.

Food bills ready for Washington hearing

The House Agriculture Committee has announced it will hold public hearings April 6-7 on two bills designed to establish a temporary federal food marketing commission. They are the Vigorito bill (H.R. 11998), and the Richmond bill (H.R. 12104).

Both bills would establish a national commission to conduct a study of domestic food marketing, pricing, competition and market structure. Both would authorize a commission made up of members of Congress and private citizens.

The Vigorito bill provides that the commission complete its appraisal of the food marketing system and make its final report with recommendations to the President and Congress within 18 months of initial funding.

The Richmond bill goes one step further and provides that the FTC, Justice Department and USDA report annually to Congress on their antitrust enforcement in the food industry. In this respect, the Richmond bill is similar to a measure (H.R. 9182) introduced last year by Congressman Edward Mezvincky (D-Ia).

Kenneth D. Naden, president of the National Council of Farmer Cooperatives, said the NCFC will strongly support the Vigorito bill during hearings. "We believe," he added, "that only an independent commission can provide the balanced approach needed to answer questions which have been raised about food prices and competition."

Naden stated that the Council couldn't support the Richmond or Mezvinsky bills, as now written. "They would give the FTC undue power to investigate the food industry," he said. "Cooperatives know from experience that the FTC doesn't have the understanding of agricultural economics necessary to undertake a balanced study of the food industry."

Meanwhile, the Mezvinsky bill has come in for some criticism from both the Justice Department and USDA. Thomas Kauper, head of Justice's antitrust division, stated his agency should be concerned with law enforcement, and not get involved in information gathering.

Neither Justice nor USDA favors a provision in the bill that would require each to make confidential data, obtained by subpoena, available for others to study. USDA also indicated that it, rather than the FTC, should conduct any long-term study of the food industry.

Speculation on the Hill is that Congress will approve a measure this year for conducting an overall appraisal of food marketing. It's an election year, and few members of Congress are willing to be on record as having voted against an investigation of food prices.

Food marketing alert

As of mid-March, the supply situation in April is expected to look like this . . .

RED MEATS —

Beef . . . plentiful. Production 10-12 percent above April '75 and about 15 percent greater than 1973-75 average. Continued increases in fed beef output will account for bulk of gains.

Pork . . . adequate. April production to move upward seasonally, but will average 8-10 percent under 3-year average.

POULTRY & EGGS —

Broiler-fryers . . . plentiful. Record April marketings — about 8 percent more than in April 1975 and 14 percent above the April 1973-75 average.

Turkey . . . adequate. New crop marketings likely near record large for the month, some 18 percent above a year earlier and one-fifth more than 1973-75 average. April 1 cold storage holdings down about 40 percent from a year earlier and one-third less than the 3-year average. Supplies, heavily influenced by shrunken inventories, are estimated about ¼ less than in April 1975.

Eggs . . . adequate. Production should be near year-earlier, but under 3-year average.

MILK & DAIRY PRODUCTS —

Milk & dairy products . . . adequate. Milk production has been above a year earlier and the 3-year average for the past 5 months including Feb. should provide additional supplies for manufacturing. Jan. butter output dipped 3.1 percent from a year earlier. **American cheese** output in Jan. topped both the yearly and 3-year average levels for the third consecutive month. **Nonfat dry milk** production continued to run below both yearly and 3-year average levels for Jan. At the close of Jan., commercial butter stocks had dropped to a record low — 83 percent under the 3-year average. Commercial inventories of **American cheese** were 7.4 percent under the 3-year average. Manufacturers' stocks of **nonfat dry milk** at end of Jan. were far below '75, but in line with 1973-74.

FRUITS, VEGETABLES, NUTS

Fresh apples . . . plentiful. Jan. 31 cold storage holdings 25 percent larger than a year earlier and 37 percent more than the latest 3-season average.

Fresh pears . . . plentiful. Cold storage stocks (mainly D'Anjous) Jan. 31 9 percent greater than year earlier and 35 percent larger than the most recent 3-season average.

Fresh citrus and juices . . . plentiful. U.S. **Orange** production 3 percent below last season, but 2 percent ahead of the past 3-season average. A record large **grapefruit** crop is forecast — up 14 percent from last season and 9 percent bigger than the most recent 3-season average. Florida **frozen concentrated orange juice** stocks Feb. 28 were 15 percent above year earlier; 28 percent more than past 3-season average.

Canned non-citrus fruits . . . plentiful. Jan. 1 inventories of most canned fruits up considerably. Compared with a year earlier, Jan. 1 holdings showed the following increases: **canned peaches**, up 25 percent; **canned pears**, 6 percent; **canned fruit cocktail**, 11 percent; **canned purple plums**, 83 percent; **canned apricots**, up 263 percent from 1974-75's very short supply.

Raisins . . . plentiful, with 1975 crop about 18 percent larger than the heavy 1974 output. **Dried prunes** . . . plentiful, as 1975 production was about 6 percent higher than in 1974.

Processed vegetables . . . plentiful. Feb. 1 canners' inventories of 3 principal **canned vegetables** — **snap beans, sweet corn,** and **green peas** — were 29 percent higher than year-earlier aggregate and 37 percent above the 1973-75 average.

Frozen vegetable holdings Jan. 31 about equal to those of a year earlier, but 14 percent above the most recent 3-year average. Stocks of **frozen snap beans, sweet corn,** and **green peas** topped 1973-75 averages by 13 percent, 31 percent, and 41 percent, respectively. **Frozen potatoes** . . . plentiful — down 5 percent from Jan. 31, but 2 percent above the 1973-75 average.

Fresh potatoes . . . adequate. Mar. 1 stocks 5 percent less than the year-earlier record and 11 percent above 1973-75 average. **Dry onions** . . . plentiful. Texas' new spring crop is forecast at 49 percent ahead of last spring's moderate output.

GRAINS & LEGUMES —

Peanuts . . . plentiful. Commercial stocks Jan. 31 were 11 percent higher than a year earlier and the '75 crop was record high by 5 percent. **Almonds** . . . plentiful. Output in 1975 was 16 percent under 1974's, but remains the second highest crop of record. **Walnuts** . . . plentiful, with 1975's record crop topping 1974's by about 25 percent. **Pecans** . . . plentiful. Production in 1975 68 percent larger than 1974's small crop.

Rice . . . plentiful. Record high '75 crop was 14 percent above the 1974 output and 32 percent greater than 1972-74 average. **Dry beans** . . . plentiful, because of heavier production of some varieties despite overall crop reduction of 15 percent from 1974 output and 6 percent under 1972-74 average. **Dry peas** . . . plentiful, due to heavy 1974 crop carryover and decreased exports.

Wheat . . . plentiful. Carryover stocks for this marketing year are projected about 4 percent above last year and 42 percent larger than the most recent 3-year average.

Corn . . . plentiful for food use. Expect larger exports but lower domestic use.

Terminology used: PLENTIFUL — More than enough for requirements. ADEQUATE — Enough to meet needs. LIGHT — Less than adequate; not enough for normal needs.

The Chow, a dog which comes from China, is the only canine with a black tongue!

(Continued from Page 86)

U.S. commitment is needed for a follow-through on the goals of the United Nations World Food Conference.

"This will be critical in determining the kind of a world in which our children will live," Dr. Busche said. "At stake is not only the future survival of the poorest one-quarter of the world's population, but a serious test of our own humanity."

On Thursday's speaking program, Royce Bodiford of Amarillo, Texas, president of the National Association of Farm Broadcasters, declared that "when the American farmer profits, the national economy profits.

"If farmers fail to profit, then we invite either less food at higher prices or no food at all in time," he declared.

Robert S. Strauss, chairman of the Democratic National Committee, said that "what is wrong is not our system of laws and institutions, but the management of them.

"People don't want social programs dismantled, they want them improved so that they accomplish what was intended. People don't want less government, they want better government," he declared.

Grain bill approved

Legislative attempts to prevent future grain inspection scandals are moving forward with House Agriculture Committee passage of H.R. 12572.

The bill, introduced and squired through committee by Agriculture Chairman Tom Foley (D-Wash), proposes to drastically increase penalties and strengthen federal supervision of grain inspection.

It would, however, achieve this goal without completely dismantling a system of federal, state and private inspection which has served well outside of the scandal-ridden port of New Orleans.

The Senate Agriculture Committee is currently considering a bill (S. 3055) which provides for full federal inspection of grain.

Pa. breeders top Yorkshire sale in N.Y.

Two Pennsylvania Yorkshire breeders recently returned from Caledonia, New York, where they captures a number of awards at the New York State Yorkshire Show and Sale.

Real Farms, owned by Fred Debroso, Tipton, exhibited the grand champion bred gilt and the grand champion boar. The gilt sold for $469 with the boar going for $590.

Leon Arnold, Lebanon, exhibited the reserve champion bred gilt and the reserve champion open gilt. The bred gilt sold for $500 and was the top selling animal of the group with the open gilt selling for $240. Arnold's fourth place boar was also the high selling animal in the division selling for $710.

Vern Hazlett, Penn State, served as judge for the show.

Kerstetter wants changes in livestock payment bill

HARRISBURG — Agriculture Secretary Raymond J. Kerstetter has sent letters to Pennsylvania's congressional delegation to amend certain sections of a livestock payment bill recently introduced into the U. S. Senate.

Kerstetter observed that the intent of the bill to amend the Packers and Stockyards Act of 1921, S. 1532, was good. "The livestock producer for years has been victimized by delayed payments or bankruptcies of packers," said Kerstetter. "We certainly have needed a bill that guarantees a livestock producer gets paid for what he sells. But this bill needs strengthening to do the job."

In his letter to Pennsylvania's U. S. representatives and senators, Kerstetter wrote:

"I urge you support deletion of Section 603, S. 1532, amending the Packers and Stockyards Act of 1921. I also urge strengthening of Section 601 to guarantee prompt payment to livestock producers.

"Pennsylvania's livestock producers need all the protection they can get nowadays and S. 1532 with the aforementioned changes, along with clarification of Section 408 on bonding would serve that end."

Section 603 of the bill removes the right of any state to impose bonding or prompt payment requirements on a dealer or packer. Kerstetter felt this section was designed for the convenience of big interstate packers. He insisted that states must retain the power to protect livestock producers selling at intrastate markets.

Section 601 requires payments to be made within 24 hours of a sale. It also gives both parties the right to waive this requirement if agreed to beforehand.

Kerstetter said this provision would permit the continuation of some of the abuses that have leveled livestock producers. Specifically, buyers can play producers against each other, extracting delayed payment agreements which then pose the threat of huge losses to producers.

"In effect the prompt payment provision is negated by section 601," Kerstetter explained. "We want the law to be clear that title to any livestock or carcass cannot pass hands until payment is received by the producer."

Kerstetter said that Section 408 of the bill, which covers bonding, is too nonspecific and, therefore, inadequate.

Youth attends conference

Hosea Latshaw of 510 S. Wall Street, Spring City was among four Pennsylvania young adults with outstanding 4-H records that attended the annual meeting of the Junior Farmers' Association of Ontario, Canada, in March. Other 4-H members from the state included Donna Lindsay, R1, Riegelsville; Karen J. Homer, of 1704 Church Road, Oreland; and Jay Fulmer of R1, Lewistown.

According to Henry T. Moon, cultural exchange specialist, 4-H Youth, at The Pennsylvania State University, the four took part in Junior Farmers' Association activities designed to broaden leadership capabilities. They also participated in programs designed to help in explanding the image of local 4-H clubs.

Hosea Latshaw is currently attending Penn State and is majoring in Agricultural Engineering.

Steam Away Wrinkles

Wools will shed most wrinkles if allowed to "relax" for a day. But for a quick pick-me-up, Mrs. Ruth Ann Wilson, Extension clothing and textiles specialist at The Pennsylvania State University, suggests hanging the garment in the bathroom when taking a hot bath or shower to steam away wrinkles.

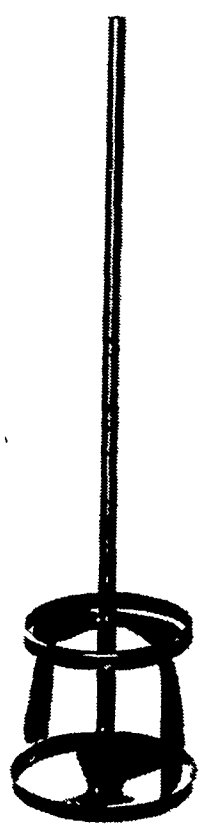
What's New



MIXING DEVICE ELIMINATES HAND STIRRING

Hand-mixing thick, viscous liquids is a laborious, slow, messy job which generally results in spillage, wastage of materials, contamination, and incomplete mixing. Potter Instant Mix units handle the really tough mixing jobs with unequalled efficiency - eliminating wastage and unwanted aeration of materials, and saving valuable labor by cutting mixing time up to 90 percent. Instant Mix is offered in sizes compatible with containers ranging in size from one pint cans to 55 gallon drums.

Potter Instant Mix units handle just about any mixing job from Adhesives to Zircon slurry - including mortar, mud, resins, epoxies, putty, foams, paints, plastics, plaster, clays, cement, salad dressing base, silica mixes, stains, pigments, emulsion fireproofing, and many more. Power for mixing is provided inexpensively by chucking Instant Mix tools into standard electric drills or motors; recommended operating speed is 450 to 750 rpm. Clean up is quick and simple - merely rotate the Instant Mix unit in thinner or cleaning solvent.

Patented Instant Mix tools will never splash if they are fully submerged in the material to be mixed before start-up. Twin horizontal impellers suck high density materials from the bottom of the container and simultaneously force low viscosity solvents from the top down. Twin rotating vertical blades confine the main mixing action to the area inside the mixing unit, thus increasing efficiency by pressurizing the materials being mixed. The exclusive safety double-ring design eliminates any risk of puncturing or damaging the mixing container. Construction is entirely of 304 stainless steel; special welds at all stress points are virtually impossible to break, even when mixing dense, heavy materials such as slurry and mud.

More complete information on this product may be obtained from Potter Industries, 421 Dover Drive, Des Plaines, Illinois 60018.

Stauffer Brochure Describes Weed, Insect and Disease Control in Potatoes

A new brochure available from Stauffer Chemical Company describes the Stauffer family of crop protection chemicals for weed, insect and disease control in potatoes.

The booklet details weed control with Eptam selective herbicide for tough problem weeds like quackgrass, nutsedge and bermudagrass. Application methods including preplant incorporation, split half rates or metered injection into irrigation water are explained. Also included in the brochure are photographs of some of the 38 grass and broadleaf weeds controlled with Eptam as well as formulation and rate information.

Soil insect control with Dyfonate insecticide for wireworms and symphylans and foliar insect control with Imidan insecticide are also detailed in the booklet.

Captan fungicide for protection from molds and storage rot in harvested potatoes rounds out the list with formulation and rate information explained.

Stauffer bulletin No. A 10607 can be obtained by writing: Stauffer Chemical Company, Agricultural Chemical Division, Dept. Ken Bowers, Westport, Conn. 06880.

New Catalog of Construction Specialties

Permanent steel fascia is offered for all concrete curbing applications - shopping centers, walkways around buildings, post protectors, service islands, anywhere that curbing is exposed to vehicular traffic. The fascia becomes a permanent part of the curbing structure, offsetting natural weaknesses in the mix and that caused by frost in cracks; wheel damage is also eliminated.

Offered in a new catalog are Outdoor Light Pole and Sign Pole Bases, Island Forms and Curbing Fascia, all for permanent installation in concrete applications.

Also shown are Modular Steel Trash and Storage Enclosures for outdoor locations, such as apartment complexes, service stations and restaurants.

Send for Catalog M-W 15010. Distributor inquires from Morgan Metal Fabricators, P.O. Box 208, Beaver Falls, Pennsylvania are invited.

What's New

WORMER DRENCH

A product that has for years provided excellent grub control in cattle has been registered by the Environmental Protection Agency for use as a wormer drench for cattle, Dow Chemical U.S.A. announced today.

The product, Ruelene Wormer Drench, became available shortly after January 1, 1976, for low-cost control of most major internal parasites in cattle in feedlots and on the range, said Tom Campbell, sales manager for Dow's animal health products.

Campbell said Ruelene Wormer Drench controls large stomach worms, medium stomach worms and Cooper's worms, and aids in controlling stomach and intestinal hairworms, thread-necked strongyles and modular worms.

With dosage figures at ¼ fluid ounces of Ruelene Wormer Drench per 100 pounds of body weight, Campbell said, drenching with the Ruelene formulation will save up to 30 per cent compared to other leading drench methods. The product will be marketed in half-gallon containers, each of which contains adequate product to treat 50 animals in the 550-pound range.

Dr. George J. MacLean, DVM, Dow livestock product technical specialist, said Ruelene is particularly effective against the most common stomach parasite, the large stomach worm (Haemonchus sp.), consistently achieving 95 to 96 per cent control of this pest.

Crufomate is the active ingredient in Ruelene Wormer Drench and other Ruelene products, including Ruelene 12R, Ruelene R, Ruelene 25E, and Ruelene 35D which have been used successfully for years to control grubs, lice, and hornflies on cattle. The products are formulated for use on cattle as a spray, dip or pour-on.

Mini Recharge Battery System
General Electric Company

announces introduction of a low-cost, modular "mini" Recharge Battery System incorporating nickel-cadmium batteries that are capable of being recharged up to 1,000 times or more.

The innovative BC-3 System offers reliable portable power for home, office and recreational products. The System offers four components that can either be purchased separately or together, including the model BC-3 charger and three battery-holding modules. Individual modules are designed to hold two pairs of AA and one pair of either C or D size GE nickel-cadmium batteries.

Because consumers buy only the components that are right for their particular needs, costs are held to a minimum. In fact, there are substantial savings for the economy-minded consumer who realizes that throwing away batteries is like throwing away money.

Auxiliary Step Fuel Tank

Year-A-Round's new Auxiliary Step Fuel Tank holds approximately 100 gallons of fuel and serves as non-skid steps to your cab. The Tanks, mounted on each side of your tractor, also serve as the front mounting brackets for your cab.

When installed on some John Deere tractors, using existing cables, the battery can be moved to a box at the front of the tank making the battery readily accessible.

Install yourself on your International Harvestor or John Deere tractor. More models being added continuously.

For more information write: Year-A-Round Cab Corp., P.O. Box 2075P, Mankato, MN 56001.

Create Own Furnishings

Create a floor lamp with hub caps for top and bottom connected by a pipe pole. An old car seat on a plywood base, covered with a fabric, can serve as a chair. Extension specialists at The Pennsylvania State University point out that many other imaginative home furnishings can be made out of scraps.

Montgomery Co. farmers learn safety techniques

A presentation of first-aid techniques was featured during the recent safety banquet and spring meeting of the Montgomery County Farmers' Association (MCFA).

Three representatives of the Lansdale Volunteer Medical Service Corps (VMSC) discussed safety suggestions at the meeting, which was held at the Montgomery County 4-H Center, Snyder Rd., Lansdale.

Following their presentation, the VMSC members allowed members of the MCFA and their families to inspect one of the corps' ambulances which they had brought to the center.

Also featured at the covered dish banquet of the MCFA, which is the local chapter of the Pennsylvania Farmers' Association (PFA), was a film on safe farm wiring.

The film detailed safety precautions farmers should take in order to eliminate wiring hazards on the farm, and also explained types of wires, plugs and transformers best suited to farm workloads.

Winners of the chapter's farm safety poster contest were announced following the safety presentations. The contest was open to children of the MCFA members between the ages of eight and 16, following the themes of farm safety or the Bicentennial.

First place winner in the eight to 11-year-old category was Kevin Nice, with second place going to Lori Musselman.

Debbie Moyer and Brian Landis were awarded first and second place, respectively, in the 12 to 16-year-old category.

First place posters will now be judged at the farm association's regional Ladies' Day Out, to be held in July.

It was announced that the MCFA Ladies' Day out will be held at 10 a.m. on April 7 at Mooreheads in Trappe. Featured at the meeting will be a slide presentation of Korean orphans, a plant demonstration, and music by a kitchen band.

During the safety meeting, a special guest appearance was made by the Easter Bunny, who distributed candy to the members' children.

Charolais bull tops Pa. sale

UNIVERSITY PARK, Pa. - A Charolais bull owned by Penn State University was the top performing bull at the 1976 Pennsylvanin Bull Performance Test held at University Park. The test was sponsored by Penn State University and Pennsylvania Cattlemen's Assn.

The bull, PS Sir Sam 065, had an average daily gain of 4.51 pounds and a weight per day of age of 3.24 pounds. This bull was sired by SHF Sir Royal Sam 1st and was out of PS Lady Rock.

In comparison, the average for the seven Charolais bulls in the test was 3.84 pounds average daily gain. This is 19 percent better than the average for all other bulls, which was 3.22 pounds average daily gain. The average for all Charolais bulls in average weight per day of age was 3.05 pounds, 13 percent greater than the 2.70 pounds average weight per day of age for the average of all other bulls.

Farm policy committee headed by Butz

Something unusual happened during President Ford's campaign swing through Illinois a few week s ago that pleased farmers.

The President announced, unexpectedly, that he was appointing Secretary Butz to head up a new cabinet-level farm policy committee. The committee is to include the Secretaries of State, Treasury, Commerce and others at the executive level.

The new policy group will replace three committees set up last year to coordinate national farm and food policy.

"This type of action is what farmers have been asking for since the '73 soybean embargo, and the '75 grain embargo to Russia and Poland," said Kenneth D. Naden, president, National Council of Farmer Cooperatives.

"Farmers don't object to some advice from other groups," added Naden, "but they dislike having agricultural policy pre-empted from them."

As added incentive to farmers, the President pledged last year's grain embargo wouldn't be repeated. He also defended the Soviet grain-buying plan which will guarantee U.S. farmers sales totaling at least six million tons annually through 1980.

The President's action appears to be an effort to correct an over-swing of the pendulum which put too much farm policy in non-farmer's hands during the past three years. The ultimate benefit of this new policy to farmers will be determined only after it has been tested by crises and political challenge.

Chester Co. Holstein Club tours Md.

Forty-five members and wives participated in the Chester County Holstein Club's tour on March 18.

The first farm visited was that of Ed Fry. They have 450 head of dairy cattle; 216 milking cows with a herd average of 17,488 pounds of milk and 633 of fat. This includes 16 excellent and 56 very good cows.

The group ate their lunch on the bus while traveling to the Ashton Garrett Farm. Here a father and his two sons built an all new set-up for 140 milking cows.

Jack King's Astronaut daughters were the center of attraction in the visit to his farm. He also has a herd of 185 cows and a herd average of 17,125 pounds of milk and 636 of fat.

To satisfy the history and hunting enthusiasts of the group they stopped at Remington Farms. Here they visited the old brick manor house built in 1708. This has been restored and is being used by Remington as a guest house. Included in the tour was a church built in 1715. The prime objective of this farm is to demonstrate how farming and wildlife management can work in harmony. Acres of sorghum and milo are planted and then flooded to provide a marsh feeding area for thousands of wild geese. There are also lots of protected areas for rabbits, pheasants, and raccoon.

Yorkshire Spring Invitational Sale Lebanon Fair Grounds March 20, 1976

A number of bidders were on hand for the annual spring sale of Yorkshire hogs at the Lebanon Fairgrounds recently. Abe Diffenbach served as auctioneer with Leroy Poorman serving as the type judge.

Donald McCauslin, New Oxford, exhibited the grand champion bred gilt of the show and sold the animal to Martin Zerby for $500. Leroy Poorman purchased the reserve champion animal for $370 - it was also consigned by McCauslin.

In the single open gilt division - Reno Thomas had the champion which sold to L & I Farms for $260. William Smiley of Middletown NY purchased the reserve champion for $225 which was consigned by McCauslin.

Joel Stern consigned the champion littermate pair which sold for $440 and Charles Erb had the reserve pair selling for $380.

Ralph Treadmore purchased the champion boar of $420 which was consigned by Reno Thomas. Real Farms received $410 for their reserve entry. High selling boar went for $440 and was exhibited by Penn State.

The sale totaled $18,880 with the average of all the lots being $304.52.

Farm Equipment Martin Auctioneers

A farm equipment sale was recently held at the Paul Z. Martin's auction building. Three-hundred bidders saw the following items sell as highlights: Stone wagon $500; Ford 8N tractor $900; 3 bottom Ford plow $1250; NH haybine $1450 and NH baler $800.
